TIPS & TRICKS Editor in Chief **Chris Bieniek** just acquired a used copy of *Alfred Hitchcock's Ghostly Gallery*, which he describes as having been the only book in the St. Pancratius school library that was worth checking out. He's now looking for a copy of *SuperJock*—the autobiography of disk jockey Larry Lujack—to replace the one that was taken away from him in the 7th grade.
Current Favorite Games: Jet Grind Radio, RC de GO!, Dynasty Warriors 2, Mario's Picross

Executive Editor **Anatole Brown** was recently treated to an evening of pro basketball at the invitation of *TIPS & TRICKS Sports Desk* editor Mike Daly. Mike insisted on paying for both of their tickets because—as he rightly pointed out—there's no way that Anatole would have attended an L.A. Clippers game of his own volition.
Current Favorite Games: SSX, Madden NFL 2001, Phantasy Star Online, Onimusha Warlords

In her previous position as the Art Director of *Handguns* magazine, **Lisa Beattie** used the term "dummy" to refer to a page-by-page breakdown of the magazine's contents. When she uses that term in the *TIPS & TRICKS* offices, however, everyone assumes that she's referring to our beloved-but-absent-minded Editor in Chief Chris B.
Current Favorite Games: Madden NFL 2001, NFL GameDay 2001, NCAA GameBreaker 2001, NFL 2K1

Brazilian Sega Master System cartridges are the latest collecting obsession of **Jason Wilson**. Games like *Street Fighter II* and *Virtua Fighter Animation* appeared there long after the system was pronounced dead (even in the United Kingdom). If this keeps up, there may yet be some underdeveloped country where Master System versions of games like *Dino Crisis 2* and *Samba de Amigo* are being released.
Current Favorite Games: Capcom vs. SNK: Millennium Fight 2000, Mario Bros., Duck Tales, Legendary Wings

Associate Editor **Ara Shirinian** has a large collection of unusual PlayStation controllers, including just about all of the keyboard, guitar and "turntable" devices made for use with games like those in Konami's *Beman*i series. He's also our second-fastest typist, the only one who can even come close to challenging Charlotte's outrageous high scores in *The Typing of the Dead*.
Current Favorite Games: SSX, Keyboardmania, Dragon Warrior Monsters, Dynasty Warriors 2

Associate Editor **Charlotte Chen** has made a hobby out of trying to identify the usernames of celebrities who buy and sell goods through the popular eBay online auction service. Rock stars are the easiest to spot, she says; they always bid on expensive sports cars, vintage electric guitars and medical bags made from alligator skin.
Current Favorite Games: The Typing of the Dead, Shenmue, Escape From Monkey Island, The Sims: Livin' Large

While reading *Timeline*—the latest novel by author Michael Crichton—*TIPS & TRICKS* Contributing Editor **Pat Reynolds** couldn't help noticing how often its characters use the phrase "in point of fact" throughout the book. It was driving him nuts; now he wonders if people in the scientific community really talk like that.
Current Favorite Games: Final Fantasy IX, Jet Grind Radio, Ready to Rumble Boxing: Round 2, Cannon Spike

TIPS & TRICKS contributor **Geoff Arnold** wants to know why third-party videogame controllers don't get the endorsements of professional game players for advertising and promotional purposes, much in the same way as musicians endorse instruments and athletes endorse shoes. He would also like the manufacturers of such peripherals to know that he's available...
Current Favorite Games: SSX, Summoner, Capcom vs. SNK: Millennium Fight 2000, Street Fighter III: 3rd Strike

Rich Krupa watched VH-1's "100 Greatest Artists of Hard Rock" with one raised eyebrow and a sour taste in his mouth. He can live with the fact that legends like UFO, Deep Purple and Judas Priest didn't make the top 10...but leaving Manowar off the list in favor of bums like Ratt and Quiet Riot is an oversight that he describes as "just plain inexcusable."
Current Favorite Games: Jet Grind Radio, Kessen, Madden NFL 2001, Super Metroid

Weaned on the *Madden* series for Sega Genesis, *TIPS & TRICKS Sports Desk* editor **Mike Daly** has a casual demeanor that's far from the curmudgeonly stereotype of the American sports journalist. He reluctantly admits that his life's ambition is to have his features digitized for use as a secret character in any Midway coin-op sports game.
Current Favorite Games: Super Runabout, Knockout Kings 2001, Madden NFL 2001, Joust

Although Editorial Assistant **Jamie Andrew** claims that she once berated a stalker at a previous job by loudly "cussing him out" in front of co-workers, she's still the only *TIPS & TRICKS* staff member—past or present—who doesn't use profanity in the office on a regular basis. Jamie prefers Gatorade's Propel "Fitness Water" over the standard stuff.
Current Favorite Games: Crash Bash, Banjo-Tooie, Ms. Pac-Man Maze Madness, Super Bust-A-Move

HOW TO HOLD A CONTROLLER

My name is Lynell Harris. My question is stupid, but I'll ask anyway. What is the correct way to hold an N64 controller? Please answer; all my friends want to know also.

—Lynell Harris
Biville, OK

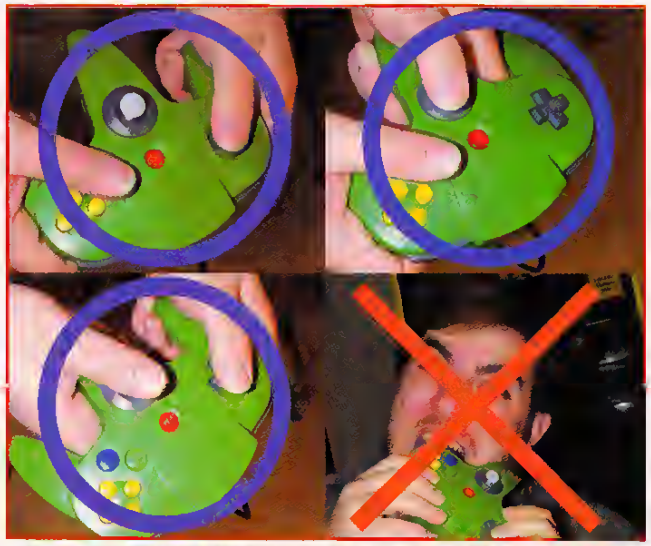

It may seem like a trivial issue, but you bring up an interesting point. Actually, there are a number of different ways you can hold the N64 controller. Usually, it will depend on what kind of game you're playing. For example, in The New Tetris, *you would hold the left prong with your left hand and the right prong with your right hand. A few games, like* Chopper Attack, *allow you to play by holding the left prong in your left hand and the center prong in your right hand. For the majority of N64 games, however, you'll hold the center prong in your left hand and the right prong in your right hand. As far as we know, those three configurations are the only "correct" ways to hold the controller, although no one will stop you from holding it any way you want to.*

PS3

I heard that Sony is coming out with a PlayStation 3. Is that true? Will it be better than the PlayStation 2—or the same—and when will it come out?

—Daniel Jimenez
Cathedral City, CA

Thanks for your letter, Daniel! Eventually, a third PlayStation console might appear in four or five years. A company as big as Sony usually has long-term plans for the next five, ten or even twenty years. There's probably a strategy already in place that covers what happens after the end of the PS2's life cycle. Marketing and selling a game console takes years of research and planning. There's no doubt that Sony is already working on it, but it's very unlikely that the is anything more than a general idea of what the next step would be. Besides, the PlayStation 2 just came out! Enjoy what you can play right now! For us as a magazine and for you as a consumer, it's silly to speculate about anything that's so far into the future. 2004 is way ahead of us and a lot of things in this industry can change in that space of time. Just think about what kind of games you were playing in 1996!

You can hold the N64 controller in many different ways. Ara likes to hold the right side with his mouth.

SUNNYVALE, WE HAVE A PROBLEM

I have one thing I need to know: Does Capcom work for NASA?

—Julia
Eatontown, NJ

Well, Julia, the answer is both yes and no. It's not known to most people, but the abbreviation "CAPCOM" in the context of NASA stands for "Capsule Communicator", which is the title of a person at Mission Control who directly communicates with whoever it is in space for a particular mission. Sometimes it appears in all capital letters, and other times you may see it capitalized as "CapCom." However, this has absolutely nothing to do with the video game company known as Capcom, most well known for its Street Fighter *series. As another point of trivia, the name of Capcom (the game company) is abbreviated from "Capsule Computer." At one point, the company also had a mascot named Captain Commando, which obviously led some people to believe that the company's name may have been derived from that character and not the other way around. If you missed his self-titled arcade or Super NES games, you can see Captain Commando in the* Marvel vs. Capcom *series.*

FOUR QUESTIONS

1) I have a game for the original NES called *Street Fighter 2010: The Final Fight*. I want to know if this is the original *Street Fighter* game, because

INFOGRAMES™

all I ever heard of was *Street Fighter II*. Since it's a "II," it has to be a sequel.

2) Will there be any *Street Fighter* games for PlayStation 2?

3) In *Marvel vs. Capcom*, there's a character named Jin; what game was he originally from?

4) I have *Chocobo's Dungeon 2*; what system is the first one on? Did it even come to America?

—Johnathan Ficarra
Fort Walton Beach, FL

Okay, Johnathan, here are some answers for you:

1) The original Street Fighter *was an arcade game, released in 1987.* Street Fighter 2010: The Final Fight *was released for the NES in 1990, but—aside from the main character being a futuristic version of Ken—the game was only part of the series in name; it was nothing like any of the other* Street Fighter *games.*

2) The PlayStation 2 version of Street Fighter EX3 *is on store shelves right now!*

3) Jin is a mecha pilot from Cyberbots, *one of the more obscure Capcom fighting games.*

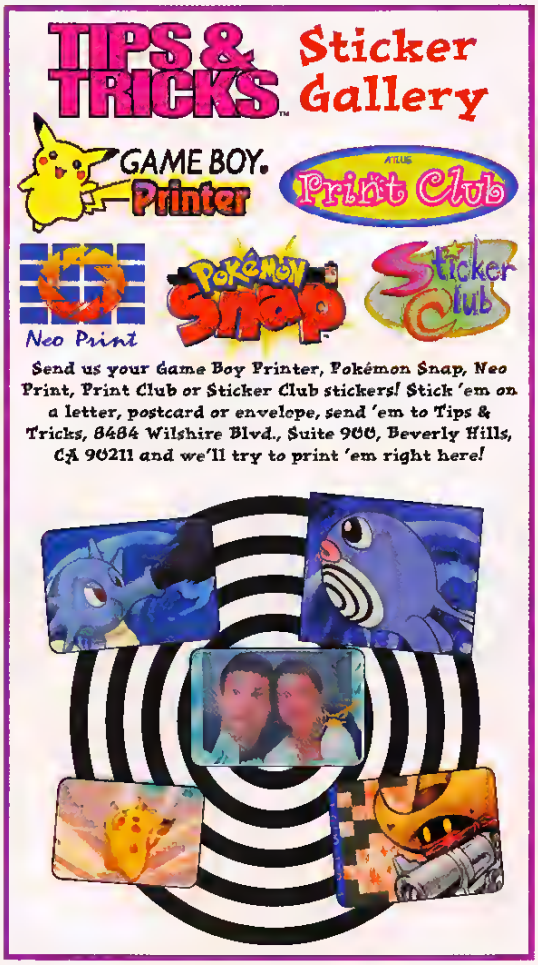

4) The original Chocobo's Dungeon *only appeared for the Japanese PlayStation in 1997 and was never published in America. It was titled* Chocobo no Fushigi Dungeon, *which means "Chocobo's Mysterious Dungeon."*

GOLEMS & DRAGONS & SLIMES...

I bought an NES and it came with the game *Dragon Warrior*. In issue #60, page 102 of your magazine, in the *Dragon Warrior Monsters* strategy, the Slime caught my eye because that is a monster I fought that day in my game! Is *Dragon Warrior Monsters* a sequel to my *Dragon Warrior*?

—Dereck Cook
St. Catherine, MS

Dragon Warrior Monsters *is indeed part of the same series of games, but it isn't quite a sequel. It would be more accurate to say that it's an original game that takes place in the world of* Dragon Warrior *(a.k.a.* Dragon Quest, *its title in Japan). Slime isn't the only monster that appears in both games! See if you can find Wyvern, Dragon, Golem and others!*

BLACK MARKET PLAYSTATIONS

I received a Sony PlayStation for Christmas of 1999. Well, all was good until I went to put a GameShark in my PlayStation...and found that it had no slot for a GameShark! All my friends are calling it a black market PlayStation. Do you have any explanation?

—Matt Tisiot
Hamilton, Ontario

You can tell your friends to knock it off, because there's a perfectly good explanation why your PlayStation has no port for a GameShark. You can also stop worrying, because it's got nothing to do with any kind of black market either. Over the years, Sony has quietly modified the composition of new PlayStations. You can tell whether one PlayStation is different from another by looking at its model number. Each time the console was changed, it was given a new model number. It may seem confusing, but for most practical purposes, all the different model PlayStations were identical. However, one of the significant changes that occurred between models was the removal of the parallel port, where you connect the GameShark. Why did Sony do this? Well, it's important to note that this isn't the first time that a manufacturer has modified its console. Both Nintendo and Sega have made subtle changes to many of their game systems after their initial release. It's a common practice, and one of its primary motivations is to reduce the cost of the console if possible. The PlayStation was originally $299 when it was first released in 1995. Just before it was superceded by the PSone this year, it had a $99 price tag.

While the cost of production naturally goes down over time, Sony was able to sell PlayStations at such a bargain price by whittling down the manufacturing cost as much as possible. Including an extra port requires additional parts, and additional parts cost money that adds up to quite a significant amount if you're producing millions of them. Besides, if no one is using your port for anything besides hacking games (which was the case), that's another incentive to remove it. Sony is highly protective of its intellectual property and will do everything it can to prevent users from hacking into the PlayStation console. Why was it included in the first place? Perhaps there were other plans for it that fell through. Certainly, older consoles had unused expansion ports too. In any event, the good news is that you can go out right now and buy a GameShark CDX, which has the same functionality of a standard GameShark, plus it will work on all PlayStations!

Here is a rear view of two different PlayStation models. Note the missing parallel port of the newer model on top.

Shenmue

by Pat Reynolds

Sega's long-awaited epic adventure for Dreamcast is finally here! *Shenmue: Chapter 1* follows the journey of Ryo Hazuki as he attempts to track down the man who murdered his father. All Ryo knows at the outset of the adventure is that a man named Lan Di is the culprit and that he arrived in a black car. Ryo will talk to hundreds of people, contend with street gangs looking to do him harm and take on various side quests along the way. This guide will provide you with all the answers you'll need to successfully navigate the world of *Shenmue*.

IMPORTANT PEOPLE

The world of *Shenmue* is populated by literally hundreds of fully realized characters who go about their business, work their jobs and roam the streets. A handful of key people play larger roles in the game, they'll pop up numerous times throughout Ryo's adventure. Here is a brief list of these important individuals.

Ryo Hazuki
The main character, 18 year-old Ryo is an exceptional martial artist and is well-liked by the citizens of the neighboring towns. When his father, Hazuki-sensei, is killed over a mysterious object called the Dragon Mirror, Ryo is determined to find out who the responsible parties are and bring them to justice.

Masayuki Fukuhara
A live-in student of the Hazuki dojo, Fuku-san is practically a brother to Ryo. He often serves as comic relief, but there are several times during the game when Ryo will be required to seek out Fukuhara's advice in order to advance in his quest.

Tom Johnson
The perpetually dancing Tom runs a hot dog cart in Dobuita and New Yokosuka Harbor. He is a priceless source of information; if you find yourself unsure of where to go next, try asking Tom. He usually has the right answer to set you straight. Later in the game, Tom will teach Ryo a new martial arts move.

Goro Mihashi
Goro starts out as just another punk looking to make Ryo's life difficult, but after learning his lesson he becomes a valuable friend in Disc 3, often pointing Ryo in the direction of his next goal.

Master Chen
The wizened Chinese master gives Ryo information about the Chinese mafia and the mysterious Phoenix Mirror. He also teaches Ryo an important move late in the game.

Chen Gui Zhang
Master Chen's son appears throughout the game, occasionally sparring with Ryo and offering advice. Late in the game he will become a valuable ally in a last-ditch fight against overwhelming odds.

Nozomi Harasaki
Poor Nozomi is smitten with Ryo, but he never seems to catch on to this fact, instead focusing like a laser beam on his mission of revenge. Nozomi can usually be found outside of her grandmother's flower shop, she is an important source of information whenever Ryo is searching for something

Lan Di
A master of a powerful martial art, Lan Di is the man who killed Ryo's father and then disappeared, leaving Ryo with unanswered questions and a burning desire for vengeance. Ryo trails the mysterious Lan Di throughout the adventure.

Chai
Chai aspires to become a member of the Chinese mafia; he believes he can attain this goal and win favor with Lan Di by thwarting Ryo's quest. Chai is a powerful fighter and the real villain of *Shenmue: Chapter 1*, providing the most challenging battles of the entire game and also acting as the final "boss."

THE F.R.E.E. SYSTEM

Shenmue uses the F.R.E.E. (Full Reactive Eyes Environment) system. While the name is a mouthful, what it means is that practically everything in the game is interactive, even if it serves no purpose. A good example of this system is Ryo's house. You can open any drawers or cabinets you see, look inside boxes and rummage through desks and appliances. You can even pick up and examine many objects around the house. It's easy to spend the entire first day (of game time) simply exploring the house, even though there are only a handful of areas you really need to examine. You can also speak to every single person in the game, although it becomes apparent early on that only a few of them have anything useful to say. Still, the responses you get from some people are often quite amusing, especially the "rude girls" that start calling you names and mocking you when you attempt to start a conversation. Generally, anyone who is walking along the streets won't have anything important to say—the people you have to speak with to advance the story are almost always standing in one place or manning a shop of some type.

QUICK TIMER EVENTS AND FREE BATTLE

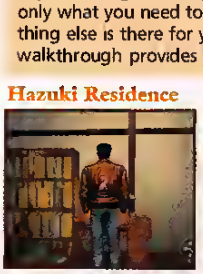

Action sequences and some fights use the Quick Timer Event (QTE) system. QTEs are semi-interactive events during which you'll see an icon flash on the screen indicating one of the controller buttons or D-pad directions; you must press that button (or direction) quickly to advance. QTEs range from very easy (a single button) to complex (strings of buttons and directions). Some QTEs require that you complete them (failing will restart the event) while others will produce an alternate outcome upon failure. (Note: Most longer QTEs will allow you to miss a button press or two. If you miss a button, the QTE usually adds a different one before returning to the main series. Throughout this guide, I've provided you only with the correct set of button and directional inputs to get through each QTE perfectly.)

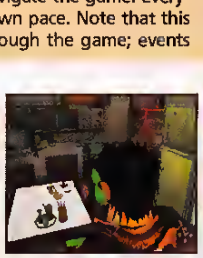

Shenmue also uses a *Virtua Fighter*-like interface for many battles, giving you full control and a nice variety of attacks to use against your opponents. Be sure to practice your moves so you have a full arsenal of attacks when the Free Battles get hairy later in the game; you can practice in several places, including the Hazuki dojo and a parking lot in Dobuita. Like QTEs, Free Battles allow you to replay them if you lose (except for the first fight against Chai). I'll try to give you enough pointers for the Free Battles so you'll win every time.

WALKTHROUGH - Disc 1

This walkthrough is designed to cover *Shenmue* from start to finish, guiding you through all of the different areas of the game in as efficient a manner as possible. While there are loads of "side quests"—like collecting all of the trinkets from the vending machines, winning the Sega Saturn games or prizes in the arcade—this walkthrough provides only what you need to know to successfully navigate the game. Everything else is there for you to explore at your own pace. Note that this walkthrough provides just one way to get through the game; events might change based on how you decide to pace your stay in the world of *Shenmue*. Also, there is almost always more than one way to get a piece of information, especially in the many "clue hunt" parts of the game. If you get off track, don't worry; your experience with *Shenmue* will simply be a little different from mine, but the major events are the same. I encourage you to try to play through *Shenmue* on your own, using this guide only if you become stumped during the game, as the experience will be richer and much more interesting.

Hazuki Residence

Spend some time in Ryo's room getting used to the search controls as you go through the drawers of his desk and dresser. Grab the two cassette tapes (*Shenmue* and *ShaHua*), the Cassette Player and the Photo of Friends before leaving the room to explore the rest of the house.

Explore the rest of the house, making sure to pick up the following items:

- **Twin Blades Scroll:** It's in the back hallway that connects Hazuki Sensei's den and shrine, in a basket on the floor. Use the scroll to learn the move.
- **Shadow Reaper Scroll:** You'll find this move scroll in Fuku-san's room (the parchment outside the room reads "Fukuhara"). Search the top of the desk to find it. Use the scroll to learn the move.
- **Photo of Hazukis:** In the right drawer of Ine-san's small desk. Her room is opposite Ryo's bedroom.
- **C Size Batteries:** In the living room, in the left drawer of the cabinet in the corner.
- **Mysterious Key:** Search the desk drawer in Ryo's father's room and he'll automatically open the box with this key inside.
- **Box of Matches:** On the altar in the shrine room.
- **Flashlight:** In the entranceway to the house, search the cabinet under the telephone.

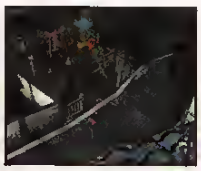

There are also two areas in the Hazuki Residence where you can trigger automatic flashback events. Looking at the food on the kitchen table kicks off the first one, and walking near the big tree in the corner of the outside yard triggers the second.

While wandering around the house, collecting the items, be sure to talk to Ine-san and hear about Fuku-san's depression. She'll ask you to pay a visit to him out in the dojo, which is separate from the main house. When you have all of the items, head there to watch a short cutscene. This officially kicks off Ryo's quest to exact revenge for his fathers' death. Checking Ryo's journal after this event will show you that he's written down the words "I'll get revenge for my father!!" in case he forgets his mission.

You've done everything there is to do at home at this point. Time to venture out into the world.

Yamanose

Shenmue eases you into the world by making this small, easy-to-navigate town your first stop. Yamanose consists of one street and leads to the town of Sakuragaoka, where the real adventure begins. There are a couple of kids playing in the street, but talking to them won't get you anywhere.

As you pass the Yamanose Shrine for the first time, Ryo will automatically be attracted to the cries of a small kitten. He discovers a local girl named Megumi tending to a lone kitten. You'll have the option of taking some dried fish or fried tofu from the nearby temple to feed the kitten. Choosing the fish will serve to forward the story and set you on the path to your next destination, while feeding the tofu to the kitten turns out to be a bust, the kitten won't eat, and Megumi clams up and won't give you the info. Choose the fish. As a side note: Now that you've seen the baby cat, you'll find two new items in the kitchen at home. Milk from the refrigerator and Dried Fish from the counter near the sink. You can use these items to feed the kitten. Continue to feed the kitten throughout the game as you pass the Yamanose Shrine and it'll get healthy and survive.

Yamanose QTE

This Quick Timer Event happens on the second full day of the game when you walk through Yamanose in the morning. A cutscene will take over as Ryo walks down the road and you'll see some children playing soccer. One of the boys kicks the ball too hard and it flies right at Ryo. Be ready to tap the **A** button as soon as it appears onscreen, you'll safely catch the ball and warn the kids about playing too rough. If you miss the button press, the little girl sitting nearby gets hit in the head and runs home crying. Note that if you skip Yamanose and go straight to Sakuragaoka or Dobuita from your house, this QTE will occur the next time you enter Yamanose from your house.

Sakuragaoka

There are just a few things to do in the small town of Sakuragaoka. This section lists the events in roughly the order you'll encounter them in the game.

Helping an Old Lady

This event is triggered as you enter the town for the first time. Take a right at the first crossroad and an elderly woman will ask you to find the Yamamoto household for her. She then heads to the nearby park to wait for you. Yamamoto's house is actually near the park, the easiest way to find it is to head around the corner from the park and use the map posted there. You'll see that the Yamamoto house is just opposite from your position at the map. Look at the nameplate and then head to the park, where Ryo will automatically escort the old woman to the house (note that this event might not happen for you at this time, it seems to be tied to which food you feed the kitten).

Get a Clue

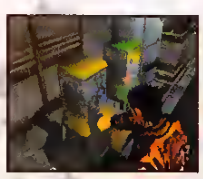

If you fed the kitten the tofu instead of the fish—and didn't get a lead from Megumi—talk to the women standing near the telephone booth as you enter town; they'll direct you to Yamagishi-san. If Megumi already mentioned Yamagishi after you fed the dried fish to the kitten, skip this event and head straight to Yamagishi-san's house.

Yamagishi-san

You'll find Mr. Yamagishi in his side yard, tending to a tree. Talking to him will allow you to access the next area of the game, Dobuita.

What else is there to do in Sakuragaoka? You can purchase soda from the outdoor vending machine and start a trinket collection from the prize machines next to the soda machine. There are two of these machines, one dispensing random character figurines from the Sonic series of games and the other giving out *Virtua Fighter* characters. You could waste a lot of time and money trying to collect them all. Then there's the only shop in town, the Abe Store, where you can buy a variety of foodstuffs and also get the chance to enter a drawing for prizes. Purchasing candy or chips gives you the ability to draw a ticket from a box. You might win and you might not, it's totally random. You can win various toys (of the same variety you can buy from the vending machines) and you might even win the Saturn version of *Hang-On* or *Space Harrier*!

Dobuita

Ryo's adventure in Dobuita starts with a long string of people to find and question about the black car involved in his father's death. Before we get into that, here are a few places you'll want to be familiar with.

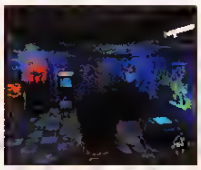

Tomato Mart

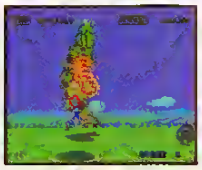

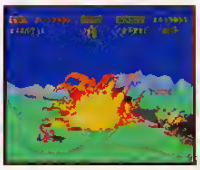

Tomato Mart is like the supermarket version of Abe Store back in Sakuragaoka. You can buy the same chips and candy in order to take a chance at the prize drawing, but there are also many more items for sale. You can stock up on milk and sliced fish to feed the kitten in Yamanose. You'll also find batteries for your flashlight, and even flashlights if you didn't take the one from home. I'd also recommend buying a light bulb while you're here, it'll come in handy later in the game.

Shenmue

Game YOU

There's a full arcade in town where you can hang out and play a mix of games. Most notably, they have full cabinet versions of classic Sega titles *Hang-On* and *Space Harrier*. You can also practice your QTE reflexes on one of two QTE Event games (highly recommended), or play a game of darts. Do well enough at any of the games and you could win prizes!

Try your luck at the Slot House and play—what else—slot machines. This is another way to pass the time while waiting for another shop to open or a time-specific event to occur.

Practice Moves

There are a lot of time-specific events in Dobuita, and you'll often find yourself arriving at your next destination too early. Instead of waiting around, head to the empty parking lot next to Game YOU and prepare to "get sweaty," practicing your martial arts moves. You can unlock new moves by performing them during practice—try all of the standard *Virtua Fighter* button combinations (like ←, →, Punch, for example) and you'll unlock most of Ryo's arsenal in no time.

Good Deed #2

Here's another instance where you'll have the chance to help someone out. This one doesn't usually happen right away, but will show up on the second or third day of visiting Dobuita. A young man near the soda machine doesn't have enough money to buy one; you get the choice of buying one for him, or not. Try talking to him after you spring for his drink.

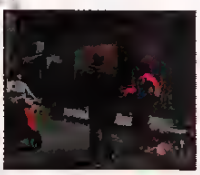

Dobuita Conversations

Your adventure in sleuthing begins by talking to the guy working at Happy Bear Burger (which isn't on the map, but it's not hard to find). Head down the main street and you'll pass Tom's hot dog cart and the Tomato Mart. Happy Bear is at the end of the street. Talk to the man behind the counter and he'll direct you to Nozomi at Aida Florist.

Finding Aida Florist is a snap. Turn and look back down the street from Happy Bear Burger, you'll see it just ahead on the right. Nozomi is the young girl standing out front in the plaid skirt and white sweater. Nozomi thinks Tom might know something about the men you're looking for, continue heading down the street (away from Happy Bear) and you'll find Tom and his hot dog cart along the right side of the road.

Tom is a dancing fool, but he'll stop for a few seconds to give you the next clue in your search. Try putting your cassette tapes in Tom's radio and watch him get down to the *Shenmue* theme!

Street Fight QTE

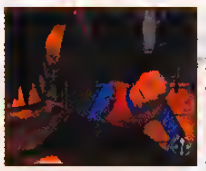

Your next stop, Global Travel Agency, is directly across the street from Tom's cart. The man inside gives you the biggest "no duh, Sherlock" clue of the entire game—he suggests that Ryo try looking for Chinese people at the Chinese restaurant, Ajiichi's. I started to wonder about Ryo's mental prowess at this point in the game.

After leaving the travel agency, head back toward Aida Florist—Ryo will be accosted by a couple of thugs looking for a fight. You'll get your taste of a real QTE (←, A, B) here, as Ryo defends himself against the ruffians. Mess it up and Ryo will take a beating.

Just past Aida Florist, turn left and follow the street as it curves around. You'll see the Ajiichi Restaurant on the right (look for the bright red awning and Chinese lettering). Talk to the man and women inside and they'll set you on the task of seeking members of the "3 Blades," a barber, a tailor and a cook.

Manpukuken Ramen is where you'll find the cook. It's also the closest of your new set of three goals. When facing out of Ajiichi's, turn left and follow the road until you see Manpukuken on the right. It also sports a traditional Chinese appearance with a red awning. They don't open until 5:00, so if you're early you can either wait around outside or head to one of the other two locations on your list first. The woman inside tells you that her husband, a member of the 3 Blades, passed on a year ago, but she tells you that you can find some other 3 Blades members in one of the bars at night.

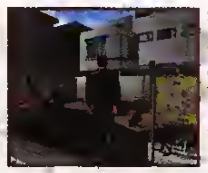

Upon exiting the ramen shop, turn left and follow the road all the way to Mary's Patches, where Itoi-san will suggest that you visit Liu at his Barber Shop. You can finish your hit list of 3 Blades by continuing down the street to Maeda Barber Shop. It's located right across from Game YOU. Note that some of these shops close up early; you might have to divide your time between a couple of days. If it gets too late, head over to the parking lot to practice your karate—or to the arcade to play some darts—and you'll automatically return home when it gets too late (around 11:00 PM).

You can talk to the man in Maeda Barbershop, but it seems that Liu Barber & Hair Salon is the place to be. Maeda-san will tell you how to get there. It's pretty simple. Head back to Happy Bear Burger and turn left. You'll find Liu's up ahead on the left.

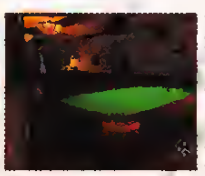

The barbers in Liu's have the lowdown on the Chinese situation, after all the runaround. Liu directs you to his father, who hangs out at Suzume Park.

Suzume Park is hidden in a side alley near Game YOU. When facing Game YOU, you'll see the alley to the right of the building. Enter it and you'll find the park on the right. Speak to Liu Senior, who's sitting on a bench, and he'll set you on your next mission. "Must find sailors," writes Ryo in his notebook after this encounter. (Hmm...) Asking around town—or simply using common sense—will get you another clue: Sailors hang out in bars. Luckily, there are several bars in Dobuita. The Yokosuka and the MJQ are the most likely places, according to some people. Yokosuka opens first, at 5:00 PM, with MJQ following a little later at 7:00. Both bars are located near the Manpukuken Ramen shop, on the map, Yokosuka is shown, but MJQ is not (it's right next door to Yokosuka). Once again, practicing your martial arts skills is a good way to kill time if you're early.

The bartender at Yokosuka will tell you to check either MJQ or the Heartbeats.

Talk to the men playing pool in MJQ and they'll challenge you to make a shot. Lose and you'll have to buy them an expensive drink. Win and they'll point you toward the Heartbeats bar. Here's a surefire way to make the shot. When the overhead view of the pool table comes up, press A to switch to the first-person view, then tap Right on the D-Pad exactly 17 times. You'll be aiming slightly toward the right side of the target ball. Press A to take the shot—the ball should ricochet off the side and drop into the corner pocket on Ryo's side of the table. If you miss, you'll lose a little money. No big deal.

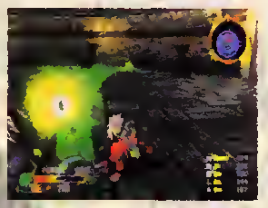

Dobuita QTE

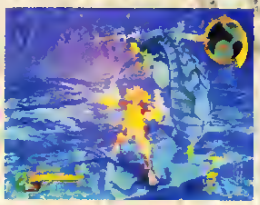

The path to the Heartbeats bar is now open—opposite the Knocking Motorcycle shop you'll see a narrow set of stairs leading down. This path was previously inaccessible. Head down and you'll have a QTE (B, A, B) with two thugs. Win the battle and continue on to the bar.

Heartbeats Bar QTE

You'll be attacked by thugs after entering the bar. Ryo can fight them off during this short QTE (B, A, B). After the brawl, the bartender tells you to look for someone named Charlie who hangs out at the motorcycle shop.

Head back to Knocking Motorcycle Shop and talk to the guys out front. If they're not there, come back later. They can usually be found outside of the shop in the early evening hours. The owner will direct you to Jupiter's Jackets, which is up the street near Mary's Patches.

The man at the jacket shop tells you that Charlie came in around 7:00 a few days ago...and that Charlie is "as ugly as the worst sin." Yikes.

Talk to the man at the Kurita Surplus store (it's on the other side of the street near the jacket store). He'll tell you that Charlie comes by around 7:00 PM, and that he's seen him leaving the jacket store around that time as well. That information confirms what the jacket vendor told you, so either wait around nearby until 7:00 or come back at that time.

Dobuita Free Battle 1

Although Charlie never shows up at either the jacket shop or the military surplus store, you'll automatically bump into one of his stooges if you head down the street toward Game YOU after 7:30 PM. Your first Free Battle occurs automatically, and you'll face off against five thugs. A few combo attacks on each ▶

Tattoo Parlor

▶ of them and they'll drop. After winning the fight, Ryo gets new information about the mysterious Charlie, your next mission is to locate a tattoo parlor.

You can ask around about the tattoo parlor, but nobody knows anything about it. The only people who can tell you where it is are the bikers hanging out in the arcade. They'll ask you to join their gang, if you accept, they'll tell you that the tattoo parlor is in Okayama Heights. It's located on the second floor of the tenement building directly across from the Yokosuka Bar. It has operating hours from 2:00 PM to 12:00 AM. If you try to go there on the same night as your fight with Charlie's cronies, the tattoo artist will tell you to come back the next day. Since it's probably pretty late by this time, you might as well head home for some sleep and return tomorrow. When you enter the Tattoo Parlor, you'll have to get through a simple QTE (←, A) before Charlie will talk. Charlie tells you he'll meet with you tomorrow at the arcade.

Hanging at the Hazuki's

Now you've got some time to kill and nowhere to be until 3:00 tomorrow. You haven't done much of anything at home except sleep and collect your daily allowance. This is a good time to take care of some business at home. (Note that these events will happen later if you don't jumpstart them now, so if you want to hang out in Dobuita playing arcade games or practicing your skills, feel free to do so.) 7:00 PM is the magic hour for you to be at home both today and tomorrow, as important events occur on both days at this time. Approach the dojo after 7:00 and an automatic sequence with Fukuhara will occur. You'll be able to practice your Free Battle skills while Ryo and Fuku-san spar. When this is finished, a long non-interactive cutscene occurs, during which Ine-san finally gives Ryo the letter that arrived shortly after his father was killed. It's written in Chinese, so Ryo now has another quest: to find someone who can read Chinese. Grab some sleep first, then head out in the morning.

Battle in Sakuragaoka

You'll notice that the game doesn't give you the option of "warping" straight to Dobuita this morning, and there's a good reason for this. As you enter Sakuragaoka on your way to Dobuita, a young boy will approach Ryo and tell him that some mean men stole his soccer ball and won't give it back unless he brings Ryo to them. Sure enough, it's Charlie and some thugs. Get ready for an easy Free Battle, followed by a very cool QTE (A). Afterwards, Ryo discovers that the boy speaks Chinese, but can't read it yet. Upon entering Dobuita, you'll bump into the boy again; he'll suggest that you speak to his grandmother, who works at the Russiya China shop.

Russiya China Shop

Finding Russiya China is easy—when facing Happy Bear Burger, turn left and it's up ahead on the left. Look for the purple sign and Chinese lettering. Inside, an automatic cutscene occurs as the boy's grandmother translates the letter. The letter contains two very important pieces of information. First, there's a code you'll need to use later in the game:

Father's Heaven
Nine Dragons
Mother's Earth
Comrades

Second, there's a phone number for someone named Master Chen: 0468-61-5647.

Now, you have a meeting with Charlie at the arcade at 3:00, but he won't show...or at least he never showed up for me in any of the games I played. It might have something to do with the fact that he's a hooligan (and they aren't known for keeping promises), but I suspect it has more to do with Ryo's hitting him in the face with a soccer ball during the recent scuffle in Sakuragaoka.

The Phone Call

While you're hanging around the arcade waiting for Charlie to not show up (and you know you will, just to be sure he doesn't appear), you might as well head up the street to the Hirata Tobacco shop and use the pay phone to dial that number from the letter. You don't have to do this here—it can be done from any phone in the game—but this is practical, since you're most likely early to the arcade anyway. When the man on the other end answers, he'll say a line from that mysterious message on the back of the letter. This is important. Whichever line he says, you must answer with the following line. For example, if the man says "Mother's Earth," you say "Comrades." You'll have to give two passwords in this manner, and then he'll tell you that you've called Warehouse #8 and hang up. Talk to the old lady working in the tobacco shop and she'll suggest that you look in the phone book to find the address of the warehouse. There's a phone book on the counter next to the phone, so use it to find the address. (Note: You can also get this clue from Nozomi—and use the phone book at home to find the address—but if you placed the call from the tobacco shop, then this is the most efficient way to advance the story.)

Optional Social Life Opportunity

This part is purely optional—if you wait at home by the phone at 7:00 PM, you'll get a call from Nozumi and a cutscene with Ryo and Nozumi talking will be shown. If you miss the call, don't worry; it doesn't seem to change anything else in the game.

Back on Track

Now that you know Warehouse #8 is located in Amihama, you just need to figure out how to get to Amihama. Just about everyone in Dobuita knows how to get there, so talk to any of the locals and you'll receive the info. You'll find that the formerly inaccessible street at the end of the road (near the tobacco shop) is now accessible, and you can catch the bus to Amihama at the bus stop. Wait at the bus stop and when it arrives, press A to pay your fare and climb on board. This also ends Disc 1.

WALKTHROUGH – Disc 2

New Yosuka Harbor
Finding Warehouse #8

As soon as you enter New Yokosuka Harbor, you'll see some thugs attempting to mug a young boy. Some of them recognize Ryo and are afraid to fight, but their leader, Goro, wants to show off and attacks. A short QTE (←, A, B) follows. Afterward, Goro happily gives Ryo directions to the warehouse district.

Warehouse #8 is easy to spot—it's got a giant "8" painted above the door—but the guards won't let you in through the main entry.

Head around to the back of the warehouse and you'll see some tall boxes with an open window above them. Push the dark orange-colored box nearby over to the stack and use it to boost up to the top and climb through the window. Once inside, follow the catwalk around to the far office. Ryo will overhear a conversation between two workers and learn that there's another Warehouse #8 on the old warehouse district.

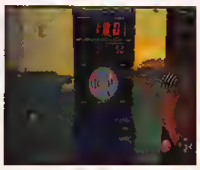

Old #8

Ask around the area and you'll learn that the old warehouse district is nearby. I spoke to the girl working at the food table near the soda machine and she pointed it out for me. In fact, if you face away from the soda machine and go straight ahead, following the streets around, you'll come across it. You'll find that Tom and his mobile hot dog cart have made the journey to Yokosuka Harbor as well; the gates to the old warehouse district are just past Tom's new post. It's heavily guarded and not open to the public. Try to enter and the guard will ask you to leave. Ryo notes that he'd better wait until night to try again.

Killing Time in Amihama

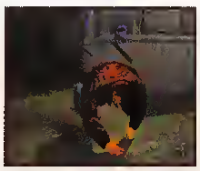

There are a few things to do in Amihama while you wait for dark and the opportunity to sneak into old Warehouse #8. There's a Tomato Mart, which stocks everything you've seen in the stores before as well as some new music cassettes. You can play the prize drawing here by purchasing the usual candy and chips—and the cassettes let you draw for a prize as well! Stock up on new music for Tom's radio. The store also has a small arcade, with two different dart games and a jukebox. There are also a couple of good deeds you can accomplish. Head over to Warehouse #14 and you'll see an elderly man being treated badly. Buy him a drink from the nearby vending machine and he'll be grateful. Also, the girl selling lunchboxes who pointed you to the old warehouse district has a problem with her younger sister that you can take care of, talk to her to get started on that quest.

Sneaking into Old #8

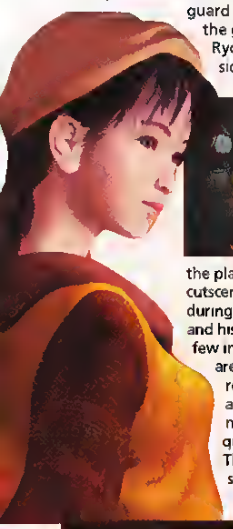

This part of the game can be frustrating if you don't know where to go. You must avoid the guards—if you step into their flashlight beams, you'll be thrown out. More importantly, you'll lose a whole day of game time as you'll try again automatically the next night. Here's the easiest way I found to make the run to Warehouse #8. As soon as the guard closest to your starting point turns his back, step out into the main corridor and dash for the junction on the right. Head down this corridor, ducking into the opening at the right if a guard is walking toward you. As soon as the guard passes, return to the corridor, continue the way you were going and turn left at the second junction. You'll see a gray door up ahead, and there may be a guard nearby—if so, wait for him to turn and walk the other way, then dash through the door. (Note: If you fail to successfully sneak into the warehouse several times, the old man you met earlier will give you a map of the area. Fail some more and he'll mark off the routes of the guards and the warehouse numbers on your map).

Return to the entrance to the old warehouse district after dark and you'll find that the guard has gone inside the station. Approach the opening in the gate and Ryo will automatically attempt to sneak past the guard. An easy QTE (➔) will prevent the guard from being alerted to Ryo's presence; now you're inside the area.

Inside the warehouse, there's nothing to do except examine the plate on the wooden shelf. A cutscene will automatically occur, during which Ryo meets Master Chen and his son Gui Zhang. Watch as a few important pieces of information are revealed. You'll automatically return to the Hazuki residence and sleep for the night. In the morning, you'll have a new quest written in your journal. The Phoenix Mirror is hidden somewhere on the Hazuki property and you must find it.

Searching for the Phoenix Mirror

Find Ine-san and talk to her; she'll tell you that Fuku-san is looking for you. Head out to the yard and a cutscene will automatically play. Ine-san tells Ryo that his father left an important item at the Bunkado Antique Shop in Dobuita. Go there next.

On the way into Dobuita, stop at the Shrine in Yamanose to see the kitten. This triggers another cutscene with Nozomi; you'll find that the kitten is out of her box.

The man at the antique shop gives Ryo an antique Sword Guard, but doesn't know anything about the Phoenix Mirror. (Note: The Bunkado Antique store sells several scrolls that can be used to learn new moves for Free Battle fights. This is a good point in the game to start buying these scrolls and practicing the new moves.)

Make your way home after getting the sword guard from the antique shop. In Sakuragaoka, you'll be attacked by Gui Zhang Chen and a Free Battle will ensue. Give it your all; after a couple of minutes he'll stop fighting and start a conversation with Ryo. Afterwards, continue toward home.

Once back in the yard, Fuku-san will talk to Ryo and suggest that you seek out Ine-san, who is in the altar room. Find her and she'll give you a clue about the sword guard.

Enter the dojo and use the mysterious key (the one you took from Hazuki-sensei's desk way back at the beginning of the game) on the long wooden box. You'll find a Katana, minus a hand guard, inside.

Now it's time for the single *Resident Evil*-like puzzle in the game. Move to the area of the dojo where the two scrolls are hanging on the wall. Take down the left scroll and place the sword guard in the wall indentation. Next, remove the right scroll and slide the sword into the slot in the wall. A secret door opens, which Ryo will automatically walk through.

You'll need a flashlight with working batteries to enter the basement room. You should still have one or more on hand—if not, a quick trip to the Tomato Mart will remedy the situation. Explore the basement room and you'll find these items on the shelves: Book of Matches, Stab Armor Scroll, Photo of Father (in chest), White Leaf (in a book on top of a chest) and Candles. Use the matches to light the candles as you search, or make use of a light bulb if you happened to buy one at the Tomato Mart (put the bulb in the socket located in the ceiling and flip the switch to light the room). After you've thoroughly searched the room, look around at the floor near the walls, you'll see some scuff marks that appear to have been made by one of the wooden shelving units. Stand next to the shelf and pull it back along the path of the scuffs to reveal an oddly discolored patch of wall. Grab the axe from next to the door and use it to break through the wall, revealing the Phoenix Mirror.

Another cutscene follows Ryo's acquisition of the Phoenix Mirror, after which he suggests taking the treasure to Master Chen. Use the phone in the entranceway to dial Master Chen at Warehouse #8. You'll have to give the passwords again. You'll be instructed to come to Warehouse #8. Head to the bus stop in Dobuita and make your way back to the old warehouse district. This time, the guard at the gate will give you the royal treatment and let you through without any of that "sneaking around" business like last time.

Master Chen will give you some more information about the Phoenix Mirror, after which you'll be interrupted by the game's villain, Chai, who grabs the Phoenix Mirror. A fast QTE (➔) will occur as Ryo regains the Mirror. More talking ensues after the evil Chai makes his escape, then you'll automatically return home and talk to Fuku-san about what you've learned. It'll be time to sleep, no matter how early you arrived at the warehouse. When Ryo gets up in the morning, he'll automatically find a bank statement on his desk, giving his bank account a cash infusion of roughly 35,000 Yen. Unless you've spent all of your money on trinkets and arcade games, this should give you a balance of between 40,000 and 48,000 Yen.

Ticket to Hong Kong

Ryo's journal seems to think that your next move is to talk to "comic relief" Fuku-san. You'll find him in his room in the main residence. Watch the wacky hijinks that ensue as Fukuhara "helps" Ryo explain his need to travel to Hong Kong to Ine-san. Now it's time to locate a ticket to Hong Kong.

Shenmue

Head into Dobuita and go to Global Travel; it's right across from Tom's hot dog stand. The man inside tells you that a ticket to Hong Kong is 220,000 Yen, much more than you have. Ryo suggests returning home and talking to Fukuhara again.

You'll find Fuku-san in his room; after some talk, he gives Ryo his life savings, roughly 40,000 Yen. (Before you start thinking that Fuku-san is rich, note that 40,000 Yen is less than $400 in U.S. currency.) This still isn't enough for the airfare, so Fuku-san suggests that you return to Dobuita and talk to Nozomi at Aida Florist.

Nozomi suggests going to Hong Kong by boat. Return to Global Travel and talk to the man again. He'll tell you that they don't sell boat fares. He directs you to Asia Travel Company. He even gives you directions to find it. Head toward Happy Bear Burger and turn right. The travel agency is diagonally across from the burger stand. It turns out that they have a boat fare to Hong Kong for 79,000 Yen, which you should be able to afford. The girl tells Ryo to return in a few hours. In reality, however, you need to return the next day.

Drunken Man QTE

Around this time, as you're hanging around in Dobuita, there's a QTE (A, B, ←) with a belligerent drunkard that occurs if you run around near the bars. If you want to see a falling-down-drunk guy attack Ryo, head over there before going home for the night.

Return home to sleep, then head back to Dobuita the next morning. You should be able to go back to Asia Travel anytime after they open; you'll watch a cutscene during which Ryo gets tough with the workers after they try to give him the runaround about his ticket. The man tells Ryo that he'll call in the morning, so there's nothing to do but kill time until then.

When you return home you can seek out Fuku-san, he'll tell Ryo that Nozomi left flowers in the altar room. You can head there to watch a short cutscene with Ine-san. Praying at the altar at this point has a slightly different effect than usual. When it gets late, sleep and then get ready for the busiest day of the game so far... and the end of Disc 2.

In the morning, Fukuhara will answer the phone call from Asia Travel. Jimmy, the man from the travel agency, tells you to meet him at the arcade at 12:00. You can actually enter the arcade earlier than noon, so head there right away.

In the arcade, Ryo is attacked by the vicious hunchback Chai, who apparently wants to win favor with Lan Di by defeating Ryo and keeping him from traveling to Hong Kong. A Free Battle with Chai takes place inside the arcade. This is a tough fight, so it's good to have practiced your attacks beforehand. Remember to use the dodge button often to avoid his attacks. You can use a standing kick to knock him out of his jumping attacks. If you lose the fight, Fuku-san will interrupt and take you back home to rest for the remainder of the day. If you win, you won't lose a day and can continue your quest for the ticket right away. Whatever the outcome of the fight, your next stop is Asia Travel—one last time—to get that ticket from Jimmy.

When you try to enter Asia Travel, Jimmy will burst through the door and try to run away from you. This leads to the longest QTE yet (←, →, ←, →, ←, →, A, ←, ←, ←, →, →, A) as Ryo gives chase. You're allowed a couple of misses on the dodging of pedestrians, but any more and you'll have to start over again from the beginning. After the long chase through the streets, Ryo catches up to Jimmy and you'll be prompted to load Disc 3.

WALKTHROUGH – Disc 3

Get a Job

Disc 3 opens with Jimmy giving Ryo another clue about the Mad Angel gang. It looks like it's time to find a job in New Yokosuka Harbor in order to get close to the gang members. Catch the bus to the harbor and start looking for work.

Talk to the guard at the main gates, then to the second guard you come across, they'll lead you to either the offices or the Foreman at Warehouse #18. The building is directly opposite the main gate. Head inside and talk to the Foreman, who directs you to Warehouse #12.

Head toward Warehouse #12. As you approach, a cutscene with Goro (one of the punks you fought earlier) takes place. Goro seems more than happy to help now, as he instructs you to go to Warehouse #1 the following day at 12:00 PM.

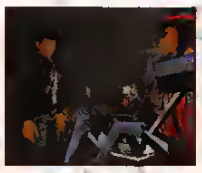

Be outside of Warehouse #1 at 12:00 on the appointed day and you'll hear Goro's distinctive '50s rock n' roll theme song announcing his presence. Goro will talk to you and then point you toward the Alpha Trading Office, which is very close to Warehouse #1. Head over there before 2:00 and the Foreman inside will start you on the job right away.

Working on the Docks

The next section details Ryo's five-day stint as a full-time forklift operator on the harbor. These days are very different from what you've been used to up to this point in the game. First, Ryo will get up in the morning and automatically report straight to work. You'll work from 9:00 to 5:00 moving crates from drop points into various warehouses. You'll get a two-hour lunch break from 12:00 to 2:00, which begins and ends automatically. You also won't be able to leave the harbor after work until you've completed the day's events, which usually involve asking around about the Mad Angel gang or getting into some sort of trouble with the gang members. Read on for in-depth accounts of the events of each working day.

Mark, one of the other forklift operators, will teach you how to drive the forklift. Then you'll be put to work moving crates into Warehouse #3. Get used to operating the forklift and move as many crates as you can before it's time to call it quits for the day. You'll then get a paycheck and Mark will tell you to return at 9:00 AM the next day. Ask around the harbor and you'll get some information on the Mad Angel gang.

If you're still hanging around the harbor after dark, you can stop the Mad Angels from terrorizing an old man—this QTE (A, ↓, ←, →) occurs near the Alpha Trade Office at around 7:00 PM.

Moving Crates—Day One

After sleeping for the night, Ryo will automatically get up and report to work, where you discover that each workday starts with a three-lap forklift race around the harbor. Try not to hit anything, as getting hung up on obstacles costs you a lot of time backing up and restarting. Also, it's easier to navigate the tight turns from the first-person perspective, which is activated by pressing B.

After the race, Mark gives you the day's agenda and quota. You'll need to take 10 crates from the nearby stacks to Warehouse #18. If you exceed the quota, you'll get a raise.

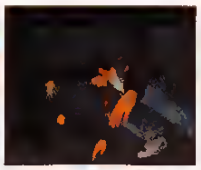

During your lunch break, you'll get into a Free Battle with some Mad Angels members who are hassling Mark. These guys can take more of a beating than the thugs you fought in Dobuita, but there are only two of them.

During your lunch break, you'll get into a Free Battle with some Mad Angels members who are hassling Mark. These guys can take more of a beating than the thugs you fought in Dobuita, but there are only two of them.

Use the rest of your lunch break to ask around some more about the Mad Angels. At 2:00, Ryo will automatically return to finish the work day (a two-hour lunch break?!) no matter where you are in the harbor. At about 3:30, three more Mad Angels will stop you in the warehouse and try to extort money. Another Free Battle occurs, but these guys must be the Mad Angel weaklings, because they fall after just one or two good hits. After the fight, Ryo returns to work. Try to beat the quota before 5:00. If you handle the forklift well, you can easily get all of the crates to their destination.

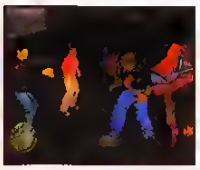

After work, Ryo will automatically have another conversation with Goro about the Mad Angels. Goro seems scared of the gang and doesn't want to talk about them. You can spend the rest of the evening asking about the Mad Angels and also learn some new skills. At around 6:30—again near the Alpha Trading Office—you'll run into Gui Zhang, he'll offer to teach you a new move. It's a fast kick called Swallow Dive. He tells you that you'll need to practice the move a lot more before you've truly mastered the kick. Next, head over to the area outside of the Harbor Lounge. If you helped the old man earlier, he'll reward you by teaching you a new move called the Shadow Step, a quick dodge that puts you behind the opponent. He also tells you that you can practice with him in Warehouse #4.

Moving Crates—Day Two

The second day of forklift driving starts with a much longer route but a more lenient quota of eight crates for the day. During your lunch break you'll be able to talk with the other workers, then you have the freedom to explore the harbor and ask about the Mad Angels some more—but you've probably already asked everyone in the area, so my recommendation is to spend the time by running through flocks of pigeons and making them fly away. During the afternoon shift, another fight with the Mad Angels occurs. After the Free Battle (against a group of five, then a group of four), one of them gives you a clue about the Mad Angels' headquarters.

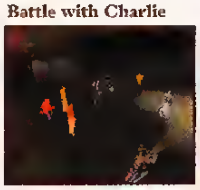

When your work is finished, you once again have some free time to hang out on the harbor. Head over to the old man and he'll teach you part two of the move he showed you yesterday—the Shadow Blade, which you can perform immediately after executing the Shadow Step. After this, follow up on the lead you got from the gang member earlier by heading over to Warehouse #17. As you approach the warehouse, you'll get a cutscene of Ryo intervening in a gang attack on Mark. This is a tough battle, some of the Mad Angels fall quickly, but the guy wearing the camo pants blocks just about everything and has some good moves. After the fight, wander back to the area near the Harbor Cafeteria. The old man will teach you another move—the Cross Charge—which he says is useful for fighting multiple opponents. Talk to him again after that and he gives you some more info on the Mad Angels. After talking to the old man, you can go home and sleep for the night.

Moving Crates—Day Three

The third day starts with the usual forklift race, then it's straight off to work. Today's route is simply day two's in reverse. You shouldn't have any problem making the quota of eight crates. At lunch, a cutscene with Nozomi automatically occurs and you'll receive a Photo of Nozomi. Talk to the other workers for some humorous conversations, then ask around about the Mad Angels some more. Goro tells you that the gang rides around the harbor at night on their motorcycles.

Battle with Charlie

You've heard that the Mad Angels hang out near the Harbor Lounge area, so wander around there after it gets dark (around 7:00) and you'll encounter some Mad Angels on bikes. One of them is Charlie! A long QTE (→, ←, A, ←, ←, A, →, →, →, ←) takes place. This one is a little different at the end, though, both left and right arrows will flash on the screen and you need to push in the direction that the biker ahead of you goes. Watch carefully and you'll catch up to Charlie with no problems. After the chase, you'll have to fight off five gangsters, then Charlie will challenge you. Make use of your combo attacks (Punch, Punch, Punch, Kick works well here) and you shouldn't have much trouble with Charlie. After the fight, Ryo gets some startling information out of his opponent. There's nothing else to do at this point, so pack up and head for home.

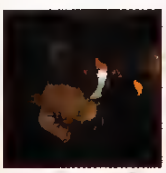

Moving Crates—Day Four

The morning goes as usual a race and then a very long forklift route from Warehouse #15 all the way to #18. At lunch, talk to the guys and they'll all give you advice on your love life. Mark's line is the best. "It's a great thing to have a women." If you find Goro and talk to him, Ryo notes that he seems "especially happy." You'll find out why tomorrow. (Here's a hint for locating Goro if you feel like talking to him: He walks a roughly triangular route between the harbor entrance, Alpha Trade Offices, and Harbor Lounge.)

Moving Crates—Day Five

During your afternoon shift, you'll come across Goro, who appears to have been beaten badly. A thug appears and leads Ryo on a chase, which culminates with Ryo once again face-to-face with gang members. This time it's a QTE (B, A, B, A, A, B, ←, ↓, A) when they attack him, as Ryo deftly puts each of them on the ground.

After work, Mark tells Ryo he heard something about a deal called Long Zha, which occurs between the Mad Angels and the Chinese Mafia. Look around for Mark afterwards and you'll find him standing near the water (if you're facing the Alpha Trade Office, turn right and he's straight ahead). Talk to Mark and he'll give you additional information about the Long Zha. You can ask around the harbor about Long Zha, but nobody seems to know much. Head home for the night.

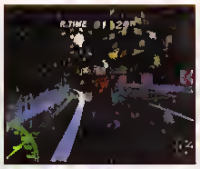

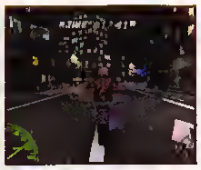

The big event of the day occurs at during the two-hour lunch break—a cutscene with Goro explains exactly why Goro's been so happy lately. Talk to the co-workers and hang out until 2:00, when it's back to the grind.

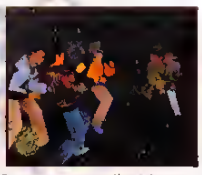

During the afternoon, Ryo spots two Mad Angel members and confronts them. This leads to another QTE (←, B, B, ←, A, ←/→, ←, ←, →, →, →, ←/→) as Ryo chases the thugs. Note that this QTE changes slightly depending on which direction you choose in the left/right sequences. Ryo collects his pay immediately after the event and goes to see Master Chen. After the cutscene, head home to get a good night's rest.

Shenmue

Let's Go by Motorcycle!

Ryu gets up during the night and receives a disturbing telephone call from the Mad Angels They've kidnapped Nozomi and want Ryo to meet them at Warehouse #17 within four hours Once in Dobuita, you'll discover that the bus to the harbor has finished running for the day The only places that are open in Dobuita are the bars, so head over there and talk to Akimi (the perpetually drunk woman in the Yokosuka), she'll suggest you find a motorcycle You can also pound on the door of Knocking Motorcycle Shop, where the proprietor suggests you try borrowing Naoyuki Ito's hog—he just finished tuning it up and it should run well Ito is Ryo's pal from Sakuragaoka—he lives in the house with the motorcycle out front If you leave Dobuita via the back alley exit next to Game YOU arcade, you'll enter Sakuragaoka directly across from Ito's house Ito is more than happy to loan Ryo his bike This leads to a motorcycle mini-game with Ryo racing to reach the harbor in two minutes or less (This doesn't actually make sense, since I obtained the bike at about 1 45 AM and Ryo supposedly has until 3 30 to reach the harbor. but I digress) As long as you keep your speed up and don't hit the side of the road too many times, you'll make it to the harbor with seconds to spare There are no other cars on the road to worry about, so your only concern is taking the curves without losing too much speed

Upon reaching the harbor, Ryo automatically rides through to Warehouse #17, where gang members confront him Two Free Battles take place, and they're both pretty easy Once again, you'll face the Mad Angel wearing the blue camouflage pants, he's your toughest opponent during these two battles He seems susceptible to grabs and throws, though

After the fights, Ryo finally meets Terry, the leader of the Mad Angels Nozomi is handed over, on the condition that Ryo fight with Gui Zhang and cripple him Ryo agrees, but only after Terry promises to take Ryo to Lan Di. Ryo and Nozomi return home on the hog in an extended cutscene while a touching love song plays When control is handed back over to you, Ryo is back in his bedroom, where you'll want to get some sleep before morning

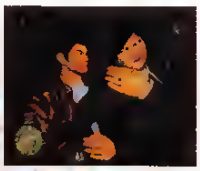

Fired!

The next morning after arriving at work, the Foreman takes Ryo aside and tells him that he's been fired After this event, Ryo notes that he should go "talk to everybody." In reality, you only need to talk to one person. your old buddy Tom

Head over to Tom's and he'll teach you a new move—the Tornado Kick! Afterward, Tom gives Ryo some shocking news. And after this, time skips forward to 10 00 PM, when Ryo meets with the Mad Angels to keep his promise to fight Gui Zhang Chen

The Main Event

Ryo will start the battle with Gui Zhang Chen as you enter a Free Battle This is a scripted battle, though, with certain actions happening automatically as Ryo tries to convince Chen to pretend to lose so that Terry will lead Ryo to Lan Di Eventually, Ryo and Gui Zhang will both fall to the ground Terry tries to capitalize on this by taking them both out with a giant pipe A short QTE (→) occurs and this leads into the biggest Free Battle of the game—Ryo and Gui Zhang against 70 Mad Angels!

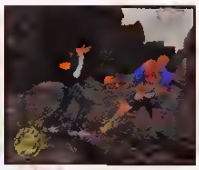

This is actually an easy fight—most of the punks fall after just a couple of hits, and Ryo's health refills automatically In the breaks between attackers, he'll regain health quickly There are three bosses, but the first two are not much harder to beat than the average opponent The final (70th) Mad Angel is a different story, though This guy is super-tough He blocks almost everything and has some devastating attacks, including a particularly nasty drop kick Luckily, you can capitalize on the fact that Ryo regenerates health automatically If you take too much damage, run away from him for a while to build up your life meter before attacking again He'll go down after a good deal of punishment.

Afterward, the score with Terry is settled through an easy QTE (A). After the battle, Ryo automatically returns home to sleep for the night

In the morning, Ryo sets out for the harbor with the intent of following Lan Di to Hong Kong On the docks, Master Chen and his son will teach you a new move, the Swallow Flip This is a defensive counterattack After you learn this attack, you'll have to face Chai one last time.

Chai is just as tough as he was when you fought him in the arcade—but you have more room to move around this time Use your new techniques, especially the Tornado Kick and Swallow Flip, keeping at him until you win Unlike the last fight, you actually have to beat Chai now I stood my ground and used fast punches every time he tried to attack Quick punches and kicks will take him out of the air when he jumps in—and you can catch him off-guard with the Swallow Flip when he moves in to attack After Chai falls, another cutscene plays, then there's a final QTE (↓, A, A, B) with Chai Sit back and enjoy the ending

Congratulations! You've made it through *Shenmue Chapter 1*. Are you prepared for *Chapter 2*?

HIDDEN STUFF AND BONUSES

- *Shenmue* begins on Dec. 3rd, 1986 It took me 22 game days to complete the game on my first time through, and approximately 20 hours of playing time. My game ended on Dec. 25th.
- Beating the game allows you to replay the 70-Man Battle from the title screen any time you want. This time you won't have Gui Zhang to help you out and you'll be timed.
- Trying to collect all of the prizes from the vending machines? Be sure to check the machines located in different areas of the game—they each have unique prizes you won't find anywhere else.

SHENMUE PASSPORT DISC

The fourth disc included with *Shenmue* is called the *Shenmue* Passport. This disc connects you to the Internet and allows you to view an incredible amount of information on just about everything in the *Shenmue* world. You can read biographic data about every single character in the game, get detailed information on all of the shops and locations and even trade your collectibles for Passport-only prizes The most astonishing thing about Passport (for me, at least) is the fact that you can use it to check the status of your current game, and it will give you the most comprehensive list of figures I have ever seen in a video game You'll be able to track how many times you've played the different mini-games, what your current goal is, your percentages in QTE and Free Battles, the number of people you've spoken to, how many times you've used the Help button. even wacky stats like the number of times you bumped into a wall!

ROOMMATE WANTED

Half-man, Half-fish Seeking Single Human Companion

Attractive human and aquatic hybrid creature looking for a compassionate, caring, well-spoken and out-going individual to share intimate conversations with and moonlight rendezvous by the fish tank. Must be an avid videogame player, a good cook, and love watching movies like Splash and Free Willy. Sense of humor a plus.

Are you tired of playing the same boring videogames with similar plots and repetitive gameplay? If so, pick up a copy of Sega's new innovative game "Seaman," and you'll be moving in with a highly eccentric, off-the-wall man-fish. If you fit the description or meet any of the criteria listed above, you're a perfect match for Seaman. He's not too picky so long as you feed him daily. Developed by Sega, "Seaman" is a highly creative interactive game that allows players to speak with Seaman in real-time via a revolutionary microphone peripheral. Players are challenged to raise Seaman by interacting with him, feeding him, and controlling the environment of his tank to meet his needs. Neglect him and you'll be face to face with a man-fish with an attitude and a lot of spunk.

Seaman continually evolves throughout the game and can become your friend or foe depending on how you raise him. He can be quite moody if mistreated and his responses will reflect his true feelings. He's not afraid to say what he's thinking. You'll hear phrases like "Pipe down youngster, or I'll give you a slap," or "I'm so mad, I could shoot poison arrow frogs from my bottom," if you catch a glimpse of his bad side. He's also an intelligent creature and will recall past conversations and events so be weary of what you say.

SMUGGLER'S RUN

by Ara Shirinian

Developed by Angel Studios, *Smuggler's Run* is arguably one of the best new games for the PlayStation 2. Its claim to fame is a vast world of seemingly unending terrain that you can explore. Thanks to the muscle of the PS2, the graphics engine draws detail further out toward the horizon line than any other console game has ever done before! In this strategy, I'll give you some general driving strategies, secret codes and exclusive terrain maps.

SMUGGLING BASICS

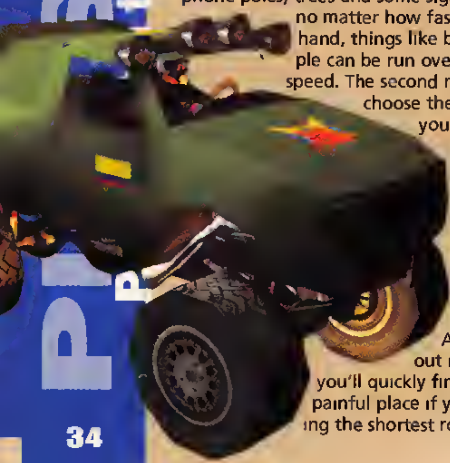

The key to completing missions in *Smuggler's Run* is understanding how your vehicle interacts with its environment. You'll have to make the same decision over and over: Should you drive to your goal the long way around (which usually involves terrain that's easy to traverse) or should you get there the short way (which usually involves terrain that's difficult to traverse)? In every mission the answer to this question will be different and you'll have to learn to recognize where the optimal route is. Your vehicle also determines what kind of terrain you can handle. For example, the Massive Truck can power up steep hills that are totally inaccessible to the Buggy. Remember, the fastest route between two points in this game is often not a straight line.

TERRAIN

Fighting against the police and rival smugglers is bad enough, but sometimes it seems like you're fighting the terrain itself! For all vehicles, the way they interact with the shape of the ground is often unpredictable and frustrating. You might be zooming along at 100 mph on a flat plain, only to be thrown spinning into the air by some tiny bump or obstacle that you didn't see. Or you might just run over a small cactus plant and lose half of your speed. The first rule is that running into obstacles like rocks and cacti will hurt much more than you expect them to. Don't try to power through these obstacles, no matter how much you may want to. The same goes for things like telephone poles, trees and some signs. You can't run through those no matter how fast you're going. On the other hand, things like bushes, fences, animals and people can be run over without losing significant speed. The second rule is that you should always choose the smoothest path in front of you. Abrupt changes in terrain height will do three really bad things: They will cause damage to your vehicle, they will slow you down and they will increase the probability of your vehicle tipping over. If you see that you're heading toward this kind of difficult terrain, change your direction. Although it's a good idea to try out new routes during a mission, you'll quickly find yourself stuck in a painful, painful place if you're too stubborn about taking the shortest route possible.

POLICE

If you've played *Driver*, you'll already be familiar with these guys. However, the cops are much more aggressive in *Smuggler's Run*. No matter which vehicle you're using, they can outperform you in all respects. Once a cop is on your tail, at best you can only elude him temporarily. Even if he drives off a steep cliff, runs into a tree or rolls over, 90% of the time he'll bounce right back. There is always a chance that your pursuer will get stuck for more than a brief moment, but there's no repeatable strategy you can use to ensure this. However, you can drive in a certain way to increase the probability of it occurring. For example, cops are terrible at driving through areas that are densely populated with obstacles, like forests. One other thing that cops are poor at is braking. In fact, they almost never brake. They always go as fast as possible, irrespective of their surroundings. What's more, they'll *pass* you if you brake for a moment (provided they are not directly behind you). They'll even continue to drive ahead of you before realizing that you're not in front of them anymore. Since the cops don't react to the terrain, try stopping just short of a cliff ledge when they are chasing you—they'll all drive into the valley below!

The worst possible scenario is when there is a police car directly behind you. If the cop decides to accelerate, he will push you forward; it will be impossible to stop and difficult to steer. If there is more than one cop in this kind of situation, that's extra-bad, because you will usually end up getting boxed in. If that happens, you won't be able to steer or brake! Alternatively, if the cop who's tailing you hits your rear at a sufficiently high speed, he will actually go *under* your vehicle! Again, there's nothing much you can do to save yourself once the situation develops. You're just going to have to depend on luck!

SUMMARY: POLICE BEHAVIOR

- Always drives at the maximum speed possible, regardless of the situation.
- Always attempts to drive straight into your vehicle, regardless of the situation.
- Acceleration, cornering, top speed performance is better than your vehicle.
- Is aware of your position and orientation.
- Is not aware of height differences in terrain.
- Cannot effectively maneuver around dense groups of obstacles.
- Gets confused if you're behind him.

GAME PROGRESSION

When you first begin, you'll only be able to access the SUV and the Buggy. As you complete missions, you'll gain access to more powerful vehicles. The sequence of missions in *Smuggler's Run* is linear, so you'll have to clear each one before moving on to the next.

Clear this Mission...	To unlock these vehicles...
13	Trophy Truck, Rally Car
24	Massive Truck, Military Vehicle

HILL CLIMBING

There is another way to tackle steep hills apart from the "go fast and pray" strategy. Even if the hill seems super-steep, try climbing it at a small diagonal instead of parallel with the incline; you won't lose as much speed and you won't need as much torque to get you to the top. However, if your angle is too great, the tires won't have enough grip to keep you in place. In general, unless you're sure you have enough power to make it all the way up, driving up hills in this way will help more than you think. If you get stuck while climbing a hill and you're almost at the top, try turning your wheels to the right and left, alternating every second or so. You may be able to squeeze a little bit further up the incline if you do this.

It's not always the best idea to just drive up a hill as fast as possible. If you're climbing a hill too fast, you might catch varying degrees of air when you reach its crest. It looks cool and it's quite dramatic. However, unless you know what's beyond the hill and where you're going to land, jumping into the air is something you should minimize, since you can't control where you might land after the short flight. While your vehicle is airborne you can adjust the pitch of its orientation by holding down ○. Ideally, you should attempt to land so that all four tires touch the ground at exactly the same time.

HILL DESCENDING

Going straight down a hill that's too steep is a definite no-no. If you do this, your vehicle will tip over. Some of the same strategies used for climbing hills also apply when you're traveling in the opposite direction. You can descend a steep hill at a small angle more safely than if you just went straight down.

VEHICLE CATALOG

Here's a list of all the vehicles in the game along with my comments for each. Each attribute rating is on a 1 to 5 scale. The "Strength" attribute represents how much damage a vehicle can take before the engine stalls. Also, the "Handling" attribute may be misleading. Vehicles with poor handling are more stable and are actually easier to drive. In this game, vehicles with good handling tend to have severe oversteer and are more difficult to control, even though they may be able to corner more sharply. In the context of the game, acceleration and strength are the most important attributes. Top speed is only important in some missions, while handling is the least important of all.

BUGGY

Top Speed	3	(127 mph)
Acceleration	4	
Handling	4	
Strength	2	

The Buggy is your vehicle of choice for missions in the first third of the game. It's lighter, faster and more maneuverable than the SUV. If you cannot complete a mission because you keep running out of time, try the Buggy.

SUV

Top Speed	2	(120 mph)
Acceleration	2	
Handling	3	
Strength	4	

If you find that you cannot complete a mission because you keep getting arrested, try the SUV. It's much slower than the Buggy, but it can sustain a lot more damage and it's more stable.

TROPHY TRUCK

Top Speed	3	(127 mph)
Acceleration	4	
Handling	3	
Strength	3	

The performance of this vehicle combines the best features of the Buggy and SUV. You should use this one for the majority of the second third of the game.

RALLY CAR

Top Speed	5	(133 mph)
Acceleration	4	
Handling	5	
Strength	1	

This powerful car is the fastest of all the vehicles, but it reacts so violently to the smallest dips and bumps that it's not worth using at all. Even though it's really fast, you seem to end up wasting more time than usual just trying to keep it pointed in the direction you want to go.

MASSIVE TRUCK

Top Speed	1	(117 mph)
Acceleration	5	
Handling	1	
Strength	5	

Here is the best overall vehicle. It should be your choice for the final third of the game. It's got immense torque that lets you power over rough terrain that would be impassable for the other vehicles. It's really tall so you have to be especially careful to avoid tipping over.

MILITARY VEHICLE

Top Speed	4	(126 mph)
Acceleration	2	
Handling	2	
Strength	4	

This vehicle would be great if you had access to it in the first half of the game. Unfortunately, by the time it's unlocked, its performance is only average compared to your other choices.

MAPS

Smuggler's Run takes place in three areas: Forest, Desert and Snow. You'll be in the Forest for Missions 1 through 13, in the Desert for Missions 14 through 24 and in the Snow for Missions 25 through 34. The Forest and Snow areas are actually the exact same terrain, the only difference is that you'll be able to drive over frozen lakes and the ground will be more slippery in the Snow. Here are maps of the Forest and Desert regions, with some points of interest for each.

1. Wasserman Lake
2. Eubanks Mountain
3. Town of Fredrickson
4. North Village

Interview with Alan Wasserman of Angel Studios

Alan Wasserman is the producer of *Smuggler's Run*. We got a chance to briefly speak with him about the game.

T&T: The gameplay in much of* Smuggler's Run *seems similar to that of the* Driver *series. Did you examine that game or any others specifically while* Smuggler's *was being designed? How did the idea for this game come about?

Alan Wasserman. *Driver*? [grinning] Actually I had only briefly played the game prior to coming to Angel Studios, and never really went back to it. This is not to say it's not a great game, but personally I'm not the biggest driving game fan out there. This fact probably has a lot to do with the success of the game, since we weren't out to make just another racing game or try to emulate someone else's game. So the team set out to make something different that we—and hopefully a few million others—would want to play. Trying to be like other games was the furthest thing from our minds.

In terms of the core idea for *Smuggler's Run*, it came out of a brainstorming session where the team was trying to come up with an off-road driving game concept that would mesh with our physics engine, Traxx (our vast world building tool) and [publisher] Rockstar's "Bad Boy" image.

T&T: What was the most difficult part of developing this game, technical or otherwise?

A.W. Developing a new game from scratch is always a daunting task. But when you combine the technical unknowns of working on a completely new platform (even one that is as powerful as the PS2), delays in getting development hardware and a tight schedule, it's hard to point to just one. Fortunately, we have a very talented group of individuals that made [development] a relative walk in the park. There were a LOT of great ideas that just couldn't make their way into *Smuggler's Run*. But don't worry ..we wrote them all down, so you never know when they might find their way into another game.

T&T: Such as...?

A.W.: If I told you what they are, then we'd have to kill you. But let's just say our current mantra is "Polish, Depth and Danger!"

T&T. The cactus plants in the desert area seem really tough to drive over. Are cacti really that hard in real life?

A.W. I don't know. I'll have to go out into the local desert and give it a try. Can I send you the repair bill? Actually, the amount of mass, elasticity and force needed to break the cactus (or any other in game object) had more to do with game tuning and making the game fun. Since the desert level is a bit more open than the others, we wanted to make sure there were enough obstacles that affect and add to gameplay. This requires that the player build up their skill set as they advance through the game, having objects like the cactus that take a bit of force to drive through adds to this.

T&T: Have you heard of any complaints to Rockstar or Angel about being able to drive over animals and people in the game?

A.W. Actually, yes. The first one came from my four and seven year olds when I accidentally hit a deer while driving around in Joyriding mode. Both of them [said], "DADDY! You just hit Bambi!" Another example came from a reporter doing a piece on the game, who—after hitting a person—was a bit "concerned." Of course, he spent the next 10 minutes hitting every person and animal he could find, laughing with glee and calling over his colleagues to see, all the while with a BIG grin on his face.

However, I think the heart of your question is aimed at violence in video games. To that point I think it's important that parents take full responsibility for what they let their kids play. Personally, as a parent I don't think some of the voice-over work in the game is appropriate for young kids, so there's an option to keep it turned off. In hindsight, even though we don't ever kill or permanently hurt any of the animals or pedestrians—there's no blood and they always pop right back up—I'd consider adding an option to just turn them off as well if desired. As it is now, they're in the game to add a bit of levity and life to the environments; it's done in a very non-realistic manner.

T&T: What's next for Angel Studios? Are there any projects in the works that you can tell us about?

A.W.. We have a full slate of products—and not all driving games—on multiple platforms, keeping everyone busy. As of today the only announced project that I can mention is the upcoming *Test Drive Off-Road: Wide Open* that is to be published by Infogrames. But there should be some real interesting news very soon.

by Geoff Arnold

Over the past few years, several companies have tried to capture the realism of wrestling on several different game platforms, often resulting in mediocre games with a lack of moves, poor or slow gameplay and sub-par graphics. Fortunately for WWF fans, THQ has established itself as the undisputed king of wrestling titles with gems like the #1 selling wrestling game of all time, *Wrestlemania 2000*. Continuing to uphold these high standards, THQ and developer Asmik Entertainment are back with their latest gift, *WWF: No Mercy*. With revamped graphics, better music and an arsenal of moves that will take you the better part of a month to master, this cart will keep players entertained well into the new year. Can you smell what THQ is cookin'?

Outside the Ring

Beating your opponents into a bloody pulp inside the ring is as fun as ever, but in *No Mercy* you can also drag them outside of the ring and into the wings for a little back room action. Besides the obvious choice of fighting in hallways and parking lots, you can even drag opponents into one of several side rooms for a true hardcore-style match. As Jerry "The King" would say, *"Woo-hoo!"*

What's New?

Although most of the features and characters' moves are taken directly from *Wrestlemania 2000*, *No Mercy* showcases many new and interesting items and events. And with so much drama going on in the WWF from week to week, it's gotta be tough for any game creator to keep up with the changes! Surprisingly, the WWF's current superstar lineup is represented; everyone from The Rock to Too Cool to Trish Stratus is here. The game also contains more secrets than *Wrestlemania 2000*, with a roster of over 65 wrestlers (including secret characters). Even veteran players will find themselves challenged by the sheer number of man hours it takes to earn enough money to buy a secret character such as the Ho. There are also new rings to fight in and new matches, including the following.

• Ladder Match

Usually seen only when a title is on the line, the Ladder Match finds the championship belt literally locked in a briefcase and tied to a rope suspended from the ceiling in the center of the ring. The idea is to pick up one of the ladders that are randomly scattered near the ring, haul it inside and use it to climb up to the suspended prize. Whoever grabs the belt first is the winner! The key to winning a ladder match lies in the positioning of the ladder. The apex of the ladder must be directly under the shadow of the suspended belt, otherwise you will not be able to grab the title. As soon as you make it to the top of the ladder, press the A button as quickly as possible to grab the briefcase. The ladder match becomes a little bit more interesting at the harder difficulty settings because the computer-controlled wrestlers rarely give you a chance to get close to the ladder. If you beat your opponent with the ladder for a bit, toss him or her outside of the ring, then climb the ladder as quickly as possible, you might be able to grab the briefcase before your foe makes it back in the ring.

• Guest Referee Match

Ever wanted the chance to be a referee? Now you can pick any wrestler and have him or her be the special guest referee for any match, title or non-title. Most characters even have special guest referee uniforms which make them look right for the part. As the referee, you can taunt, interfere with the match by beating on any person in the ring at any time or even perform the count by pressing the C◀ button when someone has been pinned. To top it all off, you can give the edge to a friend by controlling how fast you perform the three count...or by simply choosing not to count at all!

• Ironman Match

The Ironman Match is a test of pure will and finger stamina. Battle it out with your favorite superstar for an hour, earning points to decide who wins at the end of it all. You get points for pinfalls and count outs, so try to pin your opponent as many times as you can in succession for easy points.

The Lineup

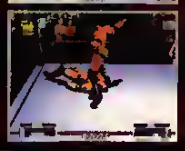

Each wrestler in *WWF. No Mercy* has his or her own unique moves as well as several finishing moves that are available when you're "pumped up." Having the ability to go toe-to-toe with an opponent is important—especially when playing through a long event such as a Royal Rumble—but there are also times when showboating and performing special finishing moves are almost a necessity. Not only does each character have a "trademark" finishing move, but these moves can be devastating to an opponent's health meter, giving you the edge and allowing you to turn the tide of a match almost instantly. Although not all characters' finishing moves are shown on the following pages, each character does have one or two trademark finishing moves that will be listed. Note: Some finishing moves can be performed at any time during a match, but most of them can only be done when your Attitude Meter is flashing on "Special," the latter are identified in the moves lists by a Ⓕ symbol.

Secrets

In addition to the 55 or so initial playable characters, there are also 12 hidden characters in the game. There are two ways to unlock these characters, neither of which is very easy. You must play through the single-player mode and fight against one of the hidden characters first. In order to play as that character, you must play through and win one of the championship belts—or you can earn enough money to contract the player through the Smackdown Mall. There are also new rings to wrestle in and even secret weapons, costumes and special moves that you can buy as you progress through the single-player mode. Everything costs a certain amount of money, of course, which you can earn by playing through the game in single-player mode; the prices range from a $500 painted mask to a $500,000 character like The Ho. See if you can unlock all of the hidden characters or even build yourself a Superstar with the money that you make from wrestling!

RC de GO!

RC de GO!

by Rich Krupa

Converted from the little-known Japanese arcade machine, Taito's *RC de GO!* attempts to simulate the experience of remote control car racing in the same vein as the company's *Densha de GO!* and *Jet de GO!* (which put you in the shoes of a passenger train conductor and commercial airline pilot, respectively). It's the first console game in the series to be released in North America—and our bet is off to Acclaim for releasing it here without heavy-handed attempts to "Americenize" the game or its title. In this PlayStation version, you build and race your very own RC car on a total of fourteen different tracks. Unlike previous RC games on this console, *RC de GO!* shows all the action from a dynamic camera viewpoint that duplicates the perspective of a real-life RC car enthusiast whose eyes follow his or her car from an elevated platform above the track. Four different game modes are available: Practice, Quick Race, Time Attack and Championship Mode. The Practice and Quick modes will familiarize you with the controls of the game, while Time Attack delivers the excitement of competing with your friends for the best time.

PRACTICE MODE

In the practice mode you will have to complete four steps within a given time limit.

1) When you start, eight arrows will surround your car. When an arrow lights up, move your car in that direction. You have sixteen seconds to earn twelve points for a perfect score.

2) In the second step, you have 21 seconds to accelerate and stop on eight STOP markers to receive a perfect score.

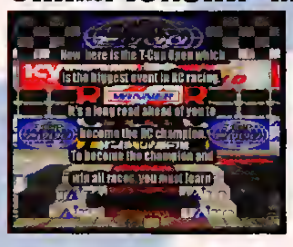

3) In the third step, follow the arrow to pop 20 balloons in 33 seconds. Use the radar at the bottom left of the screen to help you find any balloons you missed.

4) The final step is a practice race. You have 68 seconds to complete three laps on the Sky Float Park course.

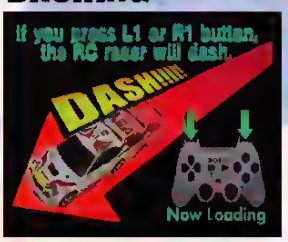

Don't worry about running out of time in any of these events. If you run out of time, you'll still advance to the next step. You will be graded on your performance after the fourth step. Keep trying until you master each step to reach your personal best score.

CHAMPIONSHIP MODE

The championship mode offers the biggest challenge and the most fun in the game. This mode lets you put together your own vehicle, then race it on fourteen different tracks. They are divided into six on-road and six off-road courses. There are also two bonus tracks that become playable only when you have placed first on all the other tracks. You won't come in first all the time, but you can always go back and race again. This is also a great way to earn cash to buy parts in the Kyosho shop to make winning easier!

DASHING

The most important trick to learn in *RC de GO!* is how to dash. Dashing is a speed boost that is performed by hitting either the **L1** or **R1** button. If used correctly, hitting the dash button while entering a turn will cause you to drift, which will help you to follow a more efficient "racing line" and shave seconds off your lap times. You can also ram other cars while dashing—and by doing so, cause them to flip over or even crash into obstacles or track boundaries!

CHASSIS TYPE

When you start the Championship mode you are asked to choose one of three different chassis. Each chassis has its own strong point: either Top Speed, Acceleration or Handling. You should choose either the Top Speed or Acceleration chassis to start off the game. With either one of these, you should be able to win the first two tracks of the on-road and off-road courses with ease. You can always upgrade your handling after you win a few courses. The key is to start with a fast car to earn some money, then upgrade to increase your handling for the more advanced courses.

Thanks mainly to the popularity of the *Gundam Wing* TV show, Bandai has finally selected one of its best Japanese Gundam video games for release here in North America. Known overseas as *Gundam The Battle Master 2*, *Battle Assault* features highly detailed Mobile Suits from a wide variety of different *Gundam* series, setting them against one another in 2-D combat, *Street Fighter* style. This guide is designed to help you take advantage of each Mobile Suit's strengths and weaknesses and beat the tough bosses you'll have to face during the Story Mode.

by Pat Reynolds

Gameplay Basics

Gundam Battle Assault breaks from the traditional "best of three round" formula used by most fighting games. Instead, each Mobile Suit begins the battle with three full Armor Gauges stacked on top of each other. As damage is taken, the Armor Gauge on top drains until it is empty, revealing the second Gauge. When all of either competitor's Armor Gauges are empty, the battle ends. Beneath the Armor Gauges is the Thruster Energy Meter. This drains whenever thrusters are used and refills automatically when not in use. Below that meter are the Mega Special Attack bars and the projectile weapon ammo indicator. Using a Mega Special Attack removes one bar; when they are all gone, you won't be able to use this attack for the rest of the fight. Similarly, the weapon ammo indicator will be reduced to 0 as you fire your projectile weapon. When the ammo is depleted, you won't be able to engage in long-range combat for the remainder of the battle.

Gundam Combo Theory

Fans of Capcom's *Street Fighter Alpha* series will find that combos in *Battle Assault* are remarkably similar to the chain combos from the original *SFA*. Starting with a weak punch or kick and working up to the strong attacks, you can chain several attacks together in an unblockable combo as long as the first hit connects. For example, weak punch, weak kick, strong punch and strong kick will generally chain together. Some Mobile Suits are better at combos than others, so experiment with all of them to find the one best suited to your own play style. Note also that you can continue to pound on your opponent even while they are laid out on the ground! Take advantage of this fact to tack on a few free hits before they can get up.

Gundam Combo Theory

Although each Mobile Suit has its own set of special attacks and abilities, there are several commands that are common to them all. These are listed below with brief descriptions.

Thrusters—By holding **R1** or **R2**, the Mobile Suit can take to the air and fly for a short period of time. Use this to get out of the way of cannon fire and certain Mega Special Attacks. When thruster energy runs out, the Mobile Suit returns to the ground while the energy refills.

Thruster Mode (↓ ↘ → + **R1** or **R2**)—This command puts the Mobile Suit into Thruster Mode, which allows it to fly and hover in place until its thruster energy runs out.

Evade Meve (push two attack buttons simultaneously)—Every Mobile Suit (except for Byg-Zam, Neue Ziel and Psycho Gundam Mk III) has an evasion move which costs a small amount of Armor but allows it to avoid damage. Mobile Suits with the Dodge function will sidestep out of harm's way and avoid any kind of attack for the short amount of time they are dodging. (Note: Press **Up** and two attack buttons to dodge and thrust upward at the same time). Shield-equipped Mobile Suits can create an energy barrier, which protects them from energy attacks, but not physical attacks. The shield lasts for several seconds and the Mobile Suit can move and attack normally while shielded.

Stun Attack (→ + ▲)—This move is the Gundam equivalent of a throw in standard fighting games. It momentarily shorts out the opponent's computer systems and leaves them open for an attack. This is a great way to ensure that your Mega Special Attack will connect.

Projectile Attack (↓ ↘ → + punch)—Each Mobile Suit is equipped with a projectile weapon, usually a beam rifle. You can engage in long-range combat with this weapon for as long as there is ammo left to fire. Your projectile weapon will auto-aim at the opponent, meaning that you can fire from above (or below when your opponent is thrusting) and still hit with your weapon. Note that firing with weak punch will result in a short burst, while using strong punch triggers a longer burst.

Melee Attack (→ ↘ ↓ ↙ ← + punch)—Each Mobile Suit employs a close-range energy weapon, generally a Beam Saber, for a powerful, unblockable attack. These attacks are slow and broadcast like mad, so use only when you see a solid opening or think your opponent doesn't expect it. Listen for the announcer to say "You can't defend" before a melee attack is performed for advance warning.

Mega Special Attack (↓ ↘ → ↓ ↘ → + ▲)—Each Mobile Suit has a different Mega Special Attack, which can be used three times during battle (indicated by the yellow bars under the thruster energy meter). These are the most powerful attacks in the game and can easily cause more than half of an Armor Gauge when unblocked. They even cause a decent bit of damage when blocked.

The Mobile Suit—Story Mode Characters

This guide to the Story Mode Mobile Suits lists their attacks and specials and gives tips on how best to use each of them in combat. I've also listed the *Gundam* series in which each Mobile Suit made its appearance, should you want to watch them in action (many of the *Gundam* videos are readily available in the states now). I've also noted which techniques must be executed in the air. Note that attack commands assume the Mobile Suit is facing to the right, and are reversed when facing left.

Wing Gundam

First appearance: *Gundam Wing*

Evade Type: Dodge

Special Techniques
Hyper Punch—↑, ▲ in air
Spin Kick—● in air

Special Attacks
Beam Rifle—↓ ↘ → + punch
Hyper Dash—↓ ↘ → + kick
Rise Down Kick—↓ ↙ ← + kick
Beam Saber—→ ↘ ↓ ↙ ← + punch

Mega Special Attack
Wave Rider—↓ ↘ → ↓ ↘ → + punch

Wing Gundam is an all-around good choice. It's got a solid projectile, if a bit slow, a fairly quick Beam Saber and a couple of surprise moves that can close the distance on the opponent and get over their projectiles. Use the Hyper Dash to close the gap between you and the opponent quickly. This is useful if you see a Beam Saber attack coming out—jet inside and hit them with a quick punch or kick to shut it down. If you see a projectile attack coming, use the Rise Down Kick to get above it and come down on the opponent to set up a combo. The only sticking point with Wing Gundam is its Mega Special Attack. The Wave Rider Mega Special Attack requires that you be right next to the opponent; it'll fizzle otherwise. Also, if it's blocked, it won't do much damage since the Mobile Suit boosts upward.

Zaku II

First appearance: *Mobile Suit Gundam*

Evade Type: Dodge

Special Techniques
Shoulder Tackle—→, ●
Stomp—↓, ● in air

Special Attacks
Zaku Machine Gun—↓ ↘ → + punch
Cracker—↓ ↙ ← + punch
Rising Tackle—↓ ↘ → + kick
Heat Hawk—→ ↘ ↓ ↙ ← + punch

Mega Special Attack
Cracker Special—↓ ↘ → ↓ ↘ → + punch

Zaku II is a small Mobile Suit and is one of the fastest in the game. Zaku's machine gun is great for playing an early keep-away game, firing out streams of very fast bullets The Heat Hawk melee weapon has shorter range compared to some of the others; it's best not to bother with it unless you have a clear opening. To aid in playing keep-away, Zaku can hit jump-ins with either the Rising Tackle or the Cracker Grenade. Like all rushing attacks, the Shoulder Tackle works great against opponents winding up for a melee weapon strike. Finally, Zaku's Mega Special is best used against jumping opponents, as it will hit and continue to juggle the target in mid-air. On the ground, opponents can block after the first hit, lessening the impact.

Zeong

First appearance: *Mobile Suit Gundam*

Evade Type: Shield

Special Techniques
Vertical Punch—←, ▲
Sweep Punch—↓, ▲ in air
Down Burner—↓, ✕ in air
Double Down Burner—↓, ● in air

Special Attacks
Hand Beam—↓ ↘ → + punch
Punch Rush—↓ ↙ ← + punch
Hand Blade—→ ↘ ↓ ↙ ← + punch

Mega Special Attack
Psycho Mu Attack—↓ ↘ → ↓ ↘ → + punch

While it may not look like much, Zeong is one of the best Mobile Suits in the game. Its arms separate at the elbows and extend during punches, giving Zeong long reach for regular attacks. Use the Vertical Punch to take down opponents who try to get above you—and use the Punch Rush when close for an easy three-hit combo, which can be linked into a Mega Special Attack for added damage. Zeong's Mega Special is one of the best in the game; it hits nearly everywhere on the screen and even does good damage when blocked.

Sazabi

First appearance: *Char's Counterattack*

Evade Type: Dodge

Special Techniques
Hover Slide Kick—↓, ●

Special Attacks
Beam Rifle—↓ ↘ → + punch
Spin Kick—↓ ↙ ← + kick
Funnel Shot—← ↙ ↓ ↘ → + punch
(↓ ↘ → + punch to attack after funnels are launched to have them attack)
Beam Axe—→ ↘ ↓ ↙ ← + punch

Mega Special Attack
Beam Shot Flush—↓ ↘ → ↓ ↘ → + punch

If you want to play with brute force but still have some speed, Sazabi is the way to go. Use the Hover Slide Kick to get in close, then break out a Spin Kick. At a distance, break out the Funnels and move in for a combo while they're firing on the opponent. The Beam Shot Flush Mega Special is long-range, but travels in a fairly straight line, so make sure your opponent isn't in a position to thrust up and avoid the attack. This is an excellent move to pull off after knocking the enemy down. Sazabi also has one of the best melee attacks in the game: the Beam Axe hits twice and comes out fairly quickly compared to the others.

Q-Mantha

First appearance: *Gundam ZZ*

Evade Type: Shield

Special Techniques
Double Elbow—→, ▲
Tackle—→, ●
Body Press—↓, ▲ in air
Heel Kick—↓, ✕ in air

Special Attacks
Beam Launcher—↓ ↘ → + punch
Beam Shower—↓ ↙ ← + ▲ in air
Funnel Shot—← ↙ ↓ ↘ → + punch
(↓ ↘ → + punch to attack after funnels are launched)
Hyper Beam Shovel—→ ↘ ↓ ↙ ← + punch

Mega Special Attack
Wave Rider—↓ ↘ → ↓ ↘ → + punch

A towering, slow Mobile Suit, Q-Mantha is a power player with a well-balanced assortment of attacks for both close- and long-range combat.

It uses the small hovering beam weapons called Funnels, which can be a great asset for confusing opponents and diverting their attention from your Mobile Suit. Launch the Funnels, have them attack and then thrust upwards and come down with a Body Press to catch them off-guard. Be sure that your opponent is below you when pulling off this attack, though; miss and it leaves Q-Mantha wide open for a pounding. Take advantage of the Beam Shower—it's a top-down projectile attack that doesn't cost ammo! The Wave Rider Mega Special hits from across the screen, but smaller enemies like Hygog and Agguy can get underneath it and avoid the damage.

Full Armor ZZ Gundam

First appearance: *Gundam ZZ*

Evade Type: Shield

Special Techniques
Guard Punch—←, ▲
Mega Particle Cannon—●

Special Attacks
Double Beam Rifle—↓ ↘ → + punch
Knee Lift Shot—↓ ↘ → + kick
Spray Missile—↓ ↙ ← + punch
Mega Beam Saber—→ ↘ ↓ ↙ ← + punch

Mega Special Attack
Hyper Mega Particle Cannon—↓ ↘ → ↓ ↘ → + punch

If you like to play keep-away, ZZ Gundam is your Mobile Suit! Although it's incredibly cheap, the Mega Particle Cannon is a Cyclops-like energy beam that fires across the screen instantly...

and doesn't use weapon ammo! Simply press ● as often as you want to keep your opponent either blocking on the ground or in the air trying to avoid your shots. If they take to the air, you can toss out Spray Missiles, another unlimited projectile that fires nine small tracking missiles. Finally, the Hyper Mega Particle Cannon is a continuous stream of tracking energy that can hit from anywhere on the screen. To balance this seemingly overbearing arsenal of long-range weaponry, ZZ Gundam is very slow and doesn't combo well at all. Its only useful close attack is the Knee Lift Shot, which automatically tacks on a few Double Beam Rifle hits if it connects.

Hy-Gogg

First appearance: *Gundam 0080*

Evade Type: Dodge

Special Techniques
Tackle—→, ●
Down Kick—● in air
Shoot Down Kick—↓, ● in air

Special Attacks
Machine Gun—↓ ↘ → + punch
Homing Missile—↓ ↙ ← + punch
Jumping Tackle—↓ ↘ → + kick
Hand Burner—→ ↘ ↓ ↙ ← + punch

Mega Special Attack
Hell Burner Rush—↓ ↘ → ↓ ↘ → + punch

Hy-Gogg is a well-rounded character. It's fast and can play a solid game both in close and at a distance. Its Machine Gun attack is similar to

Zaku's, firing rapid bursts that can keep opponents at bay. The Homing Missiles pack serious punch, especially if all three connect. Use Hy-Gogg's quickness to get in close and combo like crazy. The Mega Special Attack works great as a finisher to a combo string, since you'll need to be in close for the "hundred hand slap"-like move to connect.

The-O

First appearance: *Z Gundam*

Evade Type: Shield

Special Techniqaes
Hidden Arm—→,
Rifle Slap—→, ▲
Anti-Air Hidden Arm—←, ▲
Sweep Hidden Arm—↓, in air

Special Attacks
Beam Rifle—↓ ↘ → + punch
Hidden Burner Assault—↓ ↙ ← + punch
Rifle Slap Tackle—↓ ↘ → + kick
Beam Saber—→ ↘ ↓ ↙ ← + punch

Mega Special Attack
Beam Saber Dance—↓ ↘ → ↓ ↘ → + punch

The-O is a large Mobile Suit, and very slow. It's Hidden Arm attacks come out very quickly, though, and are excellent rush stoppers. The Hidden Burner Assault is also a very fast move that hits multiple times and is hard to see coming. The-O's Beam Rifle is of the slower variety, as is its melee attack. The Mega Special, though, can be devastating; after initiating the Beam Saber Dance, you can control the Mobile suit—and for a few seconds, your strong punch attacks with a quick Beam Saber swing,allowing multiple high damage hits.

GP-02A

First appearance: *Gundam 0083*

Evade Type: Dodge

Special Techniques
Shield Smash—→, ▲
Shield Tackle—↓, ✕

Special Attacks
Hyper Bazooka—↓ ↘ → + punch
Shot Bazooka—↓ ↙ ← + punch
Shield Buster—↓ ↘ → + kick
Beam Saber—→ ↘ ↓ ↙ ← + punch

Mega Special Attack
Atomic Bazooka—↓ ↘ → ↓ ↘ → + punch

GP-02A isn't a combo machine, but it has the power and defensive ability to sit back and lob bazooka shells from two different directions. The Shield Tackle is pretty slow, but it's a great move to use after knocking the opponent down to tack on extra hits. Stop jump-ins with the Shield Buster and keep them confused by launching a Shot Bazooka followed immediately by the Hyper Bazooka. The Atomic Bazooka creates a giant fireball in the middle of the screen...but it won't hit most standing Mobile Suits, even if they're right underneath it. Unless you catch the opponent jumping, you'll have to hit them with a low kick or punch that pops them up and into the fireball. Once caught by it, they'll be sucked toward the middle and take multiple hits.

Agguy

First appearance: *Mobile Suit Gundam*

Evade Type: Dodge

Special Techniques
Knee Press—↓, ✕ in air
Double Fist Hammer Drop—↓, ▲ in air
Handstand Kick—→, ●

Special Attacks
Agguy Machine Gun—↓ ↘ → + punch
Agguy Jump Upper—→ ↘ ↓ ↘ → + punch
Agguy Claw Rush—↓ ↙ ← + punch
Agguy Drill Claw—→ ↘ ↓ ↙ ← + punch

Mega Special Attack
Agguy Rolling Maximum—↓ ↘ → ↓ ↘ → + punch

Although Agguy is small and silly-looking, it's a monster-combo MS-stomping mayhem machine! Especially against bigger Mobile Suits. Try thrusting up to the top of a big opponent like Neue Ziel or The-O and then busting out a crazy 10-hit combo as you fall back to the ground. Agguy can effortlessly link the Machine Gun and Jump Upper attacks into its combos, and its Mega Special Attack is a great combo finisher. The other advantage to using Agguy is that the slight size makes hitting it hard; Agguy can avoid attacks that the bigger, slower Mobile Suits can't.

Quebley

First appearance: *Z Gundam*

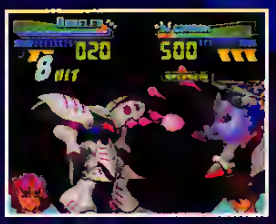

Evade Type: Dodge

Special Techniques
Knee Press—↓, ✕ in air
Mule Kick—←, ●

Special Attacks
Hand Beam—↓ ↘ → + punch
Double Kick—↓ ↘ → + kick
Somersault Kick—↓ ↘ → + kick in air
Homing Kick—↓ ↙ ← + kick
Funnel Shot—← ↙ ↓ ↘ → + punch (↓ ↘ → + punch to attack after funnels are launched)
Beam Saber—→ ↘ ↓ ↙ ← + punch

Mega Special Attack
Full Funnel Attack—↓ ↘ → ↓ ↘ → + punch

Playing as Qubelay is lots of fun because it's fast and has some hugely effective technique. This is a purely offensive Mobile Suit; its variety of kick-based Specials let you take the fight to the enemy in style. Use the Homing Kick to jet across the screen and get right in his face (note that shorter opponents won't be affected by this attack unless they're in the air). Both the Somersault and the Double Kick are excellent against jumping attackers, and the Funnels are always a good offensive tactic—send them out to attack while you move in with a combo at the same time. The Full Funnel Attack will home in on the opponent, meaning that if they don't block, it's going to hit them no matter where they are on the screen.

Z Gundam

First appearance: *Z Gundam*

Evade Type: Dodge

Special Techniques
High Punch—↑, ▲ in air
Spin Kick—● in air

Special Attacks
Beam Rifle—↓ ↘ → + punch
Hyper Dash—↓ ↘ → + kick
Rise Down Kick—↓ ↙ ← + kick
Beam Saber—→ ↘ ↓ ↙ ← + punch

Mega Special Attack
Wave Rider—↓ ↘ → ↓ ↘ → + punch

Z Gundam is identical to Wing Gundam in terms of speed, power and attacks. This means that it's a well-balanced Mobile Suit with a couple of nice attacks; use the Rise Down Kick to get over projectiles and hit the opponent (you can even use this move repeatedly against the really tall boss characters to repeatedly kick them in midair). The Mega Special Wave Rider requires that you be right next to your opponent for it to connect; try to use the stun attack before pulling this move out.

Gundam Battle Assault

Boss Mobile Suits

There are four boss characters in *Gundam Battle Assault*, and they are all playable as hidden characters in Versus Mode only. Below you'll find the methods for unlocking each of them as well as their special attacks and weaknesses. Note that you can unlock more than one boss character at a time—for example, beating the game at Normal difficulty unlocks both Neue Ziel and Byg-Zam, while beating the game on Hard without continuing will unlock all four bosses.

Byg-Zam

First appearance: *Mobile Suit Gundam*

Unlock Method: Beat the game on Easy Difficulty with any character (unlimited continues)

Evade Type: None

Special Techniques
High Beam Attack—▲
Low Beam Attack—
Knee Press—↓, ✕
Rush Tackle—↓, ●
Full Body Press—● in air
Jumping Knee—↓, ▲

Special Attacks
Homing Missiles—↓ ↘ → + punch

Mega Special Attack
Mega Particle Cannon—↓ ↘ → ↓ ↘ → + punch

Although Byg-Zam's inability to block and extreme lack of speed may seem like handicaps, the fact is that—like the other bosses—this is one of the most powerful characters in the game. It's got free projectiles that come out by simply hitting the punch buttons, and it can damage its opponents simply by touching them while walking. It also has Homing Missiles, which use very little ammo to fire, and one of the nastier Mega Specials in the game (it shares the Mega Particle Cannon with ZZ Gundam and Neue Ziel). When fighting against Byg-Zam, try to stay as far away as possible. Hammer it with projectiles and Mega Specials from a distance, if possible. If you must get in close to trade blows, get behind it and then block its mule kick attack, quickly hit it with a strong punch or kick, then repeat until it's defeated.

Neue Ziel

First appearance: *Gundam 0083 Stardust Memories*

Unlock Method: Beat the game on Normal Difficulty with any character (unlimited continues)

Evade Type: None

Special Attacks
Hand Laser—↓ ↘ → + punch
Rushing Tackle—↓ ↘ → + kick
Homing Missiles—↓ ↙ ← + punch
Beam Saber—→ ↘ ↓ ↙ ← + punch

Mega Special Attack
Mega Particle Cannon—↓ ↘ → ↓ ↘ → + punch

Like Byg-Zam, Neue Ziel cannot block...but that's really not too much of a setback when playing as this behemoth. Neue Ziel is perpetually in flight and has an unlimited Thrust Meter. This gives you the high ground advantage, forcing the opponent to come to you if you hang out at the top of the screen. Use Homing Missiles to annoy enemies, and nail them with a Rushing Tackle if they get too close (note that the Rushing Tackle can also be used to make Neue Ziel change direction if the opponent gets behind you—go to the corner and use the move to reverse your facing). This is the largest Mobile Suit in the game, but not that difficult to defeat. Because it can hit you with a variety of range attacks from above, playing an offensive game against Neue Ziel is often met with crushing defeat. Play defensive and block an attack, then counterattack. If you are across the screen and are playing an MS with a long range Mega Special Attack, exploit that to get some easy hits. Neue Ziel uses the same Mega Special Attack as ZZ Gundam and Byg-Zam, so be careful and try to avoid taking the block damage by boosting over the beam if you see it coming.

Psycho Gundam Mk-III

First appearance: *Gundam The Battle Master 2*

Unlock Method: Beat the game on Hard Difficulty with any character (unlimited continues)

Evade Type: None

Special Techniques
Double Fist Drop—↓, ▲ in air

Special Attacks
Spread Beam Cannon—↓ ↘ → + punch
Rising Fist—→ ↘ ↓ ↘ → + punch
Ultra Mega Hyper Beam Saber—→ ↘ ↓ ↙ ← + punch

Mega Special Attack
Super Hyper Mega Particle Cannon—↓ ↘ → ↓ ↘ → + punch

Psycho Mk-III is perhaps the toughest boss in the game. For starters, it's huge, and can hit with most of its regular attacks from across the screen. Secondly, almost all of its attacks do monster damage. There are a couple in particular you'll want to be very careful about. Its Beam Saber attack has a very long range, but is swung underhanded, so thrusting up is a good way to avoid being cleaved for huge damage. Also, be careful when taking the fight in close on the ground. Psycho has a devastating double-hit knee attack that'll shave more than half of an Armor Gauge away! Turtle up against him and attack when he leaves an opening after a missed move. I also wouldn't recommend using this Mobile Suit against friends in Versus Mode...unless you don't want them as friends any longer. Psycho Gundam is cheesy like the Extra Cheese Nacho Supreme Double Decker Combo at Taco Bell!

Hydra Gundam

First appearance: *Gundam Wing G-Unit*

Unlock Method: Beat the game on Hard difficulty with any character without continuing

Evade Type: Dodge

Special Techniques
Flip Kick—→, ●

Special Attacks
Beam Rifle—↓ ↘ → + punch
Double Beam Cannon—↓ ↙ ← + punch
Beam Saber Double Slash—→ ↘ ↓ ↙ ← + punch

Mega Special Attack
Beam Saber Rush—↓ ↘ → ↓ ↘ → + punch

Hydra's another cheap Mobile Suit, but at least it takes some skill to play. The biggest advantage this character has is its shield. Regular blocking will deflect any energy projectile attack just like a Shield Evade move, causing no damage to Hydra Gundam. Combine it with the Dodge ability and you have a character that can avoid any attack thrown its way! It also has a free projectile in the Double Beam Cannon and is very fast and combo-matic. However, when facing Hydra in Story Mode, it's almost anti-climactic after the intense battle with Psycho Gundam. It's not nearly as well armored as Psycho, which means your attacks will do more damage. And although Hydra is very quick, it leaves itself open to a lot of regular attacks, and doesn't seem to make use of its special shield to block projectiles as often as it should.

Special Hidden Characters

The following characters are fun bonuses for *Gundam* fans, but aren't very useful since none of them have Mega Special Attacks (save for Zaku II Custom, which both has a Mega Special and is extremely useful). Some of them are holdovers from the original *Gundam The Battle Master* title...which explains the lack of Mega Specials, which were added in the sequel. Note that these characters are available only in Versus Mode.

Gundam

First appearance: *Mobile Suit Gundam*

Unlock Method: Beat the game using Z Gundam on any difficulty. Next, play as a different Mobile Suit and Gundam may appear to fight you during the game. Win the battle, and then beat the game, and Gundam will be selectable in the Versus Mode screen.

Evade Type: Dodge

Special Techniques
Stomp—↓, ✕ in air

Special Attacks
Beam Rifle—↓ ↘ → + punch
Rising Shield—→ ↘ ↓ ↘ → + punch
Beam Saber—→ ↘ ↓ ↙ ← + punch

The original Gundam makes an appearance in the game, but because of the lack of moves and Mega Special Attack, is relegated to the bottom tier with the other Mega Special Attack-deprived Mobile Suits. Still, Gundam is quick and has good combo ability. Useful only for playing against other Mobile Suits in this section.

Ball

First appearance: *Mobile Suit Gundam*

Unlock Method: Beat the game with all 12 regular Mobile Suits on any difficulty (unlimited continues)

Evade Type: Dodge

Special Attacks
Beam Cannon—↓ ↘ → + punch
Rising Chopper—↓ ↙ ← + kick
Jackhammer—↓ ↙ ← + punch

You might feel somewhat cheated after playing through the game 12 times just to unlock this tiny robot. Although it's not a viable character at all, Ball does have a couple of strong points. One, its melee Jackhammer attack comes out very quickly and does a good chunk of damage. Two, its Beam Cannon does lots of damage, but runs dry quickly. Finally, like the other shorty in the game, Agguy, Ball is all about the crazy combos. Just about anything links with this little guy, and the Jackhammer is a great finisher to a long combo.

Nu Gundam

First appearance: *Char's Counter Attack*

Unlock Method: Beat the game using Zeong on any difficulty. Next, play as a different Mobile Suit and Nu Gundam may appear to fight you during the game. Win the battle, and then beat the game, and Nu Gundam will be selectable in the Versus Mode screen.

Evade Type: Dodge

Special Attacks
Beam Rifle—↓ ↘ → + punch
Rising Knee—↓ ↘ → + kick
Funnel Shot—← ↙ ↓ ↘ → + punch (↓ ↘ → + punch to attack after funnels are launched)
Beam Saber—→ ↘ ↓ ↙ ← + punch

Nu Gundam fares better than original Gundam, with more effective attacks. It's Funnels are more powerful than the other Funnels in the game, and they serve as effective combat tools as well as free projectiles—get close and hit ● to unleash an automatic three-hit Funnel attack

Zaku II Custom

First appearance: *Mobile Suit Gundam*

Unlock Method: Our contacts at Bandai requested that we keep the method for unlocking this Mobile Suit a secret (in fact, they wouldn't even tell me how to do it; this screen shot is from the Japanese game). They did, however, confirm that Zaku II Custom is unlockable in the game, so check future issues for the code.

Evade Type: Dodge

Special Techniques
Shoulder Tackle—→, ●
Stomp—↓, ● in air

Special Attacks
Zaku Machine Gun—↓ ↘ → + punch
Cracker—↓ ↙ ← + punch
Rising Tackle—↓ ↘ → + kick
Heat Hawk—→ ↘ ↓ ↙ ← + punch

Mega Special Attack
Cracker Special—↓ ↘ → ↓ ↘ → + punch

Zaku II Custom is identical to the regular Zaku II Mobile Suit with a couple of key differences. The first is physical; the Custom MS is painted crimson in color and has the distinctive crest on its head, signifying a team leader. Secondly, this version of Zaku II boosts at an incredibly fast speed, faster than any other MS in the game! Also, it is very good at combos, better even than Agguy! Definitely a force to be reckoned with.

East vs. West

We often see games undergo changes, from slight to significant, when they make the transition from Japan to the U.S. *Gundam Battle Assault* is no exception. There are some inexplicable spelling changes; Acguy became Agguy and Hygog became Hy-Gogg, for example. Then there are the major changes. Check out the screens below to see what we're missing from our version of *Battle Assault*...and what Japanese gamers didn't get in theirs..

In *Battle Master 2*, the Story Mode followed the journey of this female Mobile Suit pilot and her younger sidekick...

...while *Battle Assault* puts you in the role of Heero Yuy, a young male MS pilot fighting for world peace.

H-Hemme?! What happened to this Mobile Suit, seen here in the Japanese game?

The answer: The more recognizable Wing Gundam (from the popular *Gundam Wing* cartoon) replaced H-Hemme. Bandai confirmed that Hemma-Hamma was completely removed from Battle Assault.

The Mobile Suit that American gamers won't see in *Battle Assault* in action.

...and the one that Japanese gamers didn't get in *Battle Master 2*. Even though Wing Gundam plays like a carbon copy of Z Gundam, it's pretty cool to get a character that wasn't in the original game.

DRIVER 2

by Ara Shirinian

Last year, Driver enjoyed one of the most unexpected successes ever for a PlayStation game. In this sequel, Reflections has improved upon the original by adding features like curved roads, the ability to walk around on foot and four all-new cities to explore. In this strategy, I'll guide you through all the missions in the last and most difficult city in the game: Rio de Janeiro.

RIO MISSIONS

Each mission is made up of one or more goals, and there's usually a time limit associated with each goal. Sometimes, the time that you had left over from the previous goal is added to the time limit of the current goal. Such time limits are denoted by a + sign in front of them.

BUS CRUSH

Goal 1: Steal the strengthened bus.

Time Limit 6:00

Goal 2: Now go wreck Vasquez's cars.

Time Limit +0:00

Vasquez has five cars you must wreck. Just ram them with the bus until the arrow on each one disappears. Instead of driving the bus back for the third goal, it's possible to drive one of the cars you just wrecked!

Goal 3: Now get out of there and back to your lock up.

Time Limit +0:00

If you're approaching from the west, your lock up will be on the left side of the street.

STEAL THE COP CAR

Goal 1: Get to the police station and steal a cop car.

Time Limit 1:40

As you leave the garage, make a right onto the first street and head west. When you reach the police station, stop in front of the door and get out of the car. On foot, you can open the door and walk through it. Once inside, the cop car will be to your left. Be careful not to park your car too close to the door or you won't be able to walk up to it!

Goal 2: Get back to the hideout.

Time Limit +3:00

The additional time won't be added to your time limit until you actually enter the cop car. It's a long way to the hideout. Drive north first before moving east.

CAINE'S CASH

Goal 1: Stop the limo before it gets away.

Time Limit 2:00

As soon as you leave the garage, turn left. The limo will appear on your right at the very first intersection. Stop in front of the limo and get out of your car. It won't move as long as your car is obstructing it from the front. Get inside the limo, then drive it to your next goal! This portion of the mission should not take much more than 15 seconds.

Goal 2: Now get to the mansion and collect the cash.

Time Limit +0:00

You won't receive any extra time for getting into the limo, but you'll still have a long distance to drive. The limo is already oriented in the right direction, so once you have control, just step on it! When you approach the mansion, the entrance is on the east side of the block. You must drive through the front gates to complete this goal.

Goal 3: Get out of there.

Time Limit 2:00

SAVE JONES

Goal: Chase the green sedan and wreck it.

Time Limit 4:00

You'll start out on foot in this mission. There's only one car that's close by, so get in it and start driving! Even though you have four minutes, it still doesn't seem like enough time. The driver in the green sedan is really skilled, so you may have trouble even keeping up with him. However, he's also unpredictable. You may have to attempt this mission repeatedly until he makes enough bonehead maneuvers to allow you to smash up his car.

BOAT JUMP

Goal 1: Get to the docks.

Time Limit 2:50

Another long distance to cover in a short amount of time. The best you can hope for is to reach the dock with about 20 seconds remaining. The entrance is a gap in the gates just south of the goal point on the map. Once you enter the dock, you must drive onto the boat, get out of your car and set one detonator before obtaining the time limit increase.

Goal 2: Drive into the ship and set the detonators.

Time Limit +0:20

Just walk up to the arrows and press the action button to set the detonators. There are three in total.

Goal 3: Hurry, the ship's pulling away.

Time Limit +0:00

In order to escape, you'll have to drive off of the south side of the ship and land back on the dock. Make sure you have enough room to accelerate!

JONES IN TROUBLE

Goal 1: Vasquez is onto Jones, save him.

Time Limit 2:50

At the beginning of this mission, back your car all the way out onto the street before moving forward.

Goal 2: Get out and run into the cabin.

Time Limit +0:00

When you reach the first goal, you'll see a fence and another car. You've got to stop your car and get out, then run into the shack that's beyond the fence. Even if you have only a few seconds left, don't give up! The mission actually ends when you reach a few feet in front of the shack, so you really have just a tiny bit more time than you expect.

CHASE THE GUN MAN

Goal 1: Run the gunman off the road.

Time Limit 2:00

When this mission begins, press the action button immediately to step into the car in front of you. You have the option of driving the second nearby car, but it will take too long to walk up to that one. The gunman is fast and even though he drives like a maniac, he's really tough to keep up with. In fact, he's too fast for you to be able to wreck his car directly. You've got to tail him until both of you reach the mountain pass area, where there's an open ledge along the right side of the road. Sideswipe him and run him off to the right!

LENNY ESCAPING

Goal 1: Get to Jericho.

Time Limit 1:40

Jericho's car is in a north-south alley that doesn't appear on the map. You must stop your car and get into his.

Goal 2: Lenny is escaping in the chopper, move it.

Time Limit 2:50

When you reach the southeastern-most corner, you'll see a ramp in the direction of the goal. Drive up it and just go straight. The goal is immediately after a second ramp a little further east.

LENNY GETS CAUGHT

Goal: Stay with the chopper. Keep it in sight.

Time Limit None

There's no time limit for this mission, but if the chopper gets too far ahead of you, it'll be game over. The chopper follows the exact same path every time. Don't be afraid of driving ahead of it; you'll have to, anyway, if you want to make it all the way to the end. Near the end of its flight, the chopper will speed up considerably. When you see the message that tells you the chopper is going down, just drive up to it to complete the mission. You've just finished the game!

SELECT GAMES

Hey, you—listen up! This isn't your typical "review/preview" section. The purpose of *Select Games* is to show you a bunch of games that are out there—or are coming out soon—so YOU can decide which ones you'd like us to cover with in-depth strategy guides in future issues! See that postcard that's stuck between pages 66 and 67? Rip it out and write down the names of the games you're interested in. Drop it in a mailbox; we'll total up the responses and give you the kind of coverage you asked for!

Pick it!

The elite "*Tips & Tricks* Pick" is given to those select few games that are highly recommended by the *T&T* staff after we've tested them thoroughly. Many hot games that are previewed here are not eligible for the pick until they are considered "reviewable" by the publisher, which means they're finished or nearly finished. Pay special attention to the picks, these are our favorites!

Watch for it!

Games with the *Super Import* symbol were only available in Japan at press time. Be on the lookout for a possible American release sometime in the near future!

ONIMUSHA WARLORDS

Capcom • 1st Quarter • 1 Player

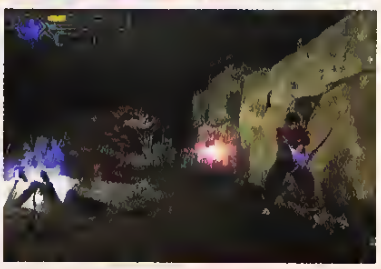

Onimusha Warlords is proving to be Capcom's most ambitious and expensive project to date. Leading the team for *Onimusha* is Keiji Inafune, the mastermind behind Capcom's *Mega Man* series (see *Japan Report* interview, August 2000). He was also very involved in the creation of *Resident Evil 2*. At first glance, *Onimusha Warlords* will certainly remind people of the *Resident Evil* series with its macabre backdrop, oodles of undead enemies, fixed camera angles and the signature submenu inventory system. Capcom has already won an award for the opening movie of *Onimusha*; it is no doubt one of the most dramatic and riveting intro sequences we've seen in a video game. The action takes place during the sixteenth century when the powerful warlord Nobunaga campaigned to conquer and unite Japan under one rule. The *Onimusha* story mixes an ample amount of Japanese feudal history along with ancient Japanese folklore involving ghosts and demons. Our main samurai hero, Samanosuke, is immediately put into a quandary at the start of the game when the princess he is supposed to protect is kidnapped by a giant red ogre. In a strange dream-like sequence, Samanosuke is given a special magic gauntlet by a mysterious spirit, who instructs him to battle the powerful evil that lies ahead. Samonosuke is first a little disturbed by the new attachment to his arm, but he soon realizes that the monstrous appendage can only help him in battling other monsters. The gauntlet gets its power by feeding on the souls of dead enemies, much in the same way that Razel in *Soul Reaver* inhales floating souls. By finding various power gems, Samanosuke can also assign different special attacks to his arm. *Onimusha* has its share of puzzle solving and "key finding" just like Capcom's other horror titles, but the game's main focus is in the addictive hacking and slashing action which should be expected from a good samurai game. Will *Onimusha Warlords* do for the PlayStation 2 what *Resident Evil* did for the original PlayStation during its early days? With the immense production values Capcom has bestowed on the game, they hope to surpass it.

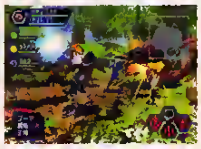

PHANTASY STAR ONLINE

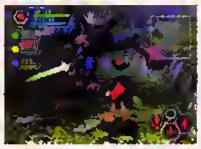

TIPS & TRICKS PICK!

Sega • 1st Quarter • 1 Player

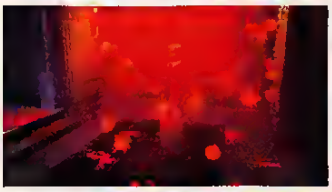

Developed by Sega's venerable Sonic Team, *Phantasy Star Online* brings Sega's classic RPG series into a new era. The most anticipated feature of *Phantasy Star Online* is its ability to have people from all around the world explore and adventure together via the Internet. Every character is an actual player online. Players begin their journey in a "lounge" where you can meet other players, trade or purchase items and create exploration teams. Your character starts as a hunter class with the ability to use a photon saber as a weapon. You are part of a planet-wide evacuation plan called the Pioneer Project. As the first interstellar transport ship, Pioneer 1 was sent to establish a colony on the newly discovered Planet Ragol because of its habitable conditions. Unfortunately, Pioneer 1 loses contact and is feared to be doomed. Your job as the crew of Pioneer 2 is to patrol Planet Ragol and determine what happened to the first wave of settlers. As you uncover the secrets of this strange planet, you and your party will come across perilous alien creatures and even rival exploration parties. The most fascinating aspect of *Phantasy Star Online* is that there will be no language barrier when communicating with other players from around the world. A new Word Select System enables people to communicate in any tongue. This unprecedented move to unite players from all around the globe should make *Phantasy Star Online* a truly ground-breaking achievement in console gaming.

ETERNAL DARKNESS

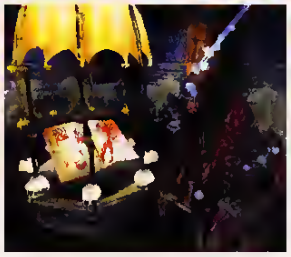

UPDATE!

Nintendo • February • 1 Player

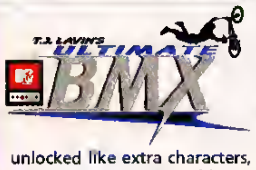

More info surrounding Nintendo's horror title, *Eternal Darkness*, is slowly coming to light. The game is arranged almost like an Edgar Allen Poe novel, where each chapter tells a different horror story set in a different era. Alexandra, the main character, will constantly be cast into a different scenario, whether it be in a medieval monastery or in the army bunkers during modern war. You will learn many spells as you progress. The spells can be combined to create even more devastating attacks. Another interesting feature is the use of what's called a Sanity Meter. If Alexandra uses too much magic or is exposed to too much mind-bending violence, then the Sanity Meter will go off the charts and Alexandra will cease to function rationally. With all these macabre undertones in the game, it's not surprising that *Eternal Darkness* will get the rare M rating for an N64 game. Another Mature game from Nintendo? Originally slated for October '99, *Eternal Darkness* will finally hit the shelves in February.

MTV SPORTS: T.J. LAVIN'S ULTIMATE BMX

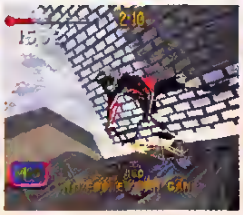

THQ • February • 1-2 Players

THQ adds another extreme sports pastime to its *MTV Sports* series: BMX. *MTV Sports: T.J. Perform hundreds of various land and air tricks: 720s, seat grabs, tailwhips and no-handers, to name a few. Could BMX games become the next new sensation in video games after snowboarding and skateboarding?

SONIC ADVENTURE 2

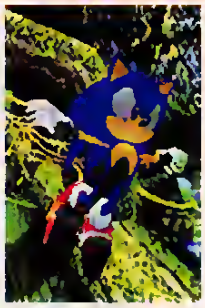

UPDATE!

TIPS & TRICKS PICK!

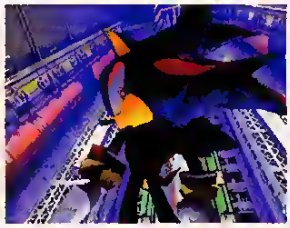

Sega • Possible 2001 • 1 Player

Here's another look at *Sonic Adventure 2*. There are still no specific details about the game, but some intriguing hints have been dropped to whet our appetites. The adventure begins as Dr. Robotnik is hanging out with a sinister black Hedgehog who looks a lot like Sonic. Is he an evil doppelganger created by Dr. Robotnik? According to the folks at Sega, Robotnik will also be a playable character at some points. Dr. Robotnik helping Sonic? Most curious! The little Chao creatures are also said to be more intuitive and responsive while increasing their role in the overall game. One of the coolest things we've seen is Sonic's sky surfing stage where he jumps out of a helicopter and into the atmosphere. Sonic then starts grinding and shredding the streets of San Francisco. *Sonic Adventure 2* promises to be a more action-oriented game than the first *Sonic Adventure*. We'll let you know more as the game comes closer to our grasp!

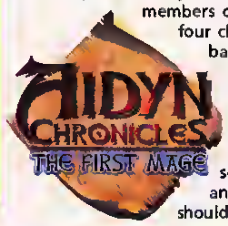

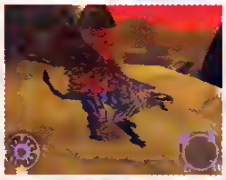

AIDYN CHRONICLES: THE FIRST MAGE

THQ • 1st Quarter • 1 Player

UPDATE!

Despite the age of the N64, it is still hard to find a true role-playing game for the system. N64 owners have been waiting in anticipation for the release of *Aidyn Chronicles: The First Mage* to quench their great RPG thirst. The game was scheduled to be released in the Fall of last year but has since experienced numerous delays and is now planned for early 2001. The story is about a young orphan boy named Alaron who embarks on a quest to find his true self. Like most fantasy stories with an orphan turned king, Alaron soon discovers that he is no ordinary peasant and that he is destined to become the greatest Mage ever known. In his journeys, he meets up with many brave folk who join his party. Up to thirteen members can travel with Alaron at one time, while four characters can battle during the turn-based battles. Each character is either lunar- or solar-based, and their performance depends on the time of day according to the game's continuous daytime cycle. Alaron and his companions will explore the vast cities of Mirari and Jundar while scourging monsters across the isles, forests and deserts. *Aidyn Chronicles: The First Mage* should be worth the long wait!

WARRIORS OF MIGHT & MAGIC

3DO • Available Now • 1 Player

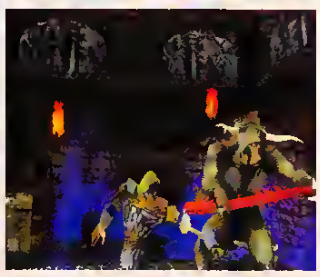

The PlayStation 2 version of *Warriors of Might & Magic* is the same game as the regular PlayStation version that came out several weeks earlier. However, that's not to say that this title should be passed up when deciding what games to buy for your new system. In fact, the PlayStation 2, with its overly simulation-oriented library, could use a action and adventure title to spice up its appeal. *Warriors of Might & Magic* fits the bill perfectly as a fun hack-and-slash romp through the dungeons. As the abolished necromancer, Alleron, you will also find plenty of new spells to help you get rid of the beasts of the underworld. Plenty of exploration also awaits with many key puzzles and secret little coves stashed with bonus items. *Warriors of Might & Magic* for the PlayStation 2 is a graphic treat, the environmental and spell effects will have your cathode-ray tube glowing like a Christmas ornament!

ONI

UPDATE!

Rockstar • 1st Quarter • 1 Player

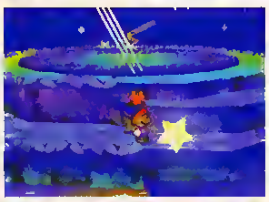

Inspired by Japanese anime like *Akira* and *Ghost in the Shell*, *Oni* takes you into an intense cyber world of hand-to-hand combat and deafening gunplay. You take on the role of Konoko, an innocent but deadly *La Femme Nikita*-style Tech Crimes Task Force member. Konoko (which oddly means "this girl" in Japanese) is a walking arsenal of fire power and bone-crunching moves. With seventeen huge outdoor and indoor levels, *Oni* immerses the player into a futuristic cityscape where the whole battlefield is your playground. The fully detailed 3-D characters all have seamless moves. For example, when Konoko goes up for a flying kick, tucks into a roll, then pops up into a flying upper punch, the action is all in one smooth, continuous movement. In order to give credence its anime style, *Oni* has plenty of 2-D anime cut scenes to propel the story. Without too many action games with engaging storylines in the early library of the PlayStation 2, *Oni* is sure to create a buzz among early adopters of the system.

PAPER MARIO

UPDATE!

Nintendo • February • 1 Player

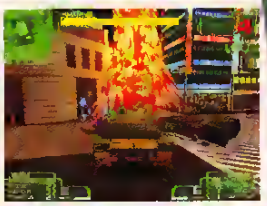

If there's one game that N64 owners have been waiting for a long time for it's *Paper Mario*, the sequel to Square-soft's Super NES classic *Super Mario RPG: Legend of the Seven Stars*. The simple 2-D sprite-based characters in *Paper Mario* may disappoint some people, but the game is meant to look like a children's pop-up book. Players will come across all their favorite characters from the Miyamoto universe, including Mario, Wario, Luigi, Yoshi, Bowser, Peach, Toad and more! Each character is paper-thin and will even "flip" when turning right to left and back again. The battle sequences are done in the traditional RPG style with turn-based attacking. As in Super Mario RPG, players can also press specific buttons to perform "timed attacks" to inflict extra damage. *Paper Mario* may seem like it's a little kiddie game at first glance, but don't let the simplicity of its storybook-like presentation scare you away. *Paper Mario* is an RPG after all, and with the glaring lack of RPGs for the N64, this may turn out to be a true gem.

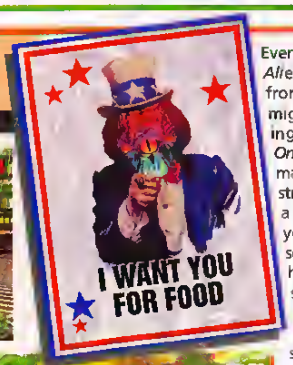

ALIENFRONT ONLINE

TIPS & TRICKS PICK!

Sega • May 2001 • 1-2 Players

Ever heard of Orson Welles' *War of the Worlds*? *AlienFront Online* definitely takes its inspiration from old-school alien invasion movies where the mighty U.S. military takes on hordes of colonizing spaceships. The cool thing about *AlienFront Online* is that you can either fight for the humans in an army tank or wreak havoc and destruction in an alien pod. Whether you fight as a human or an alien, the fate of the world is in your hands! Army tanks can wipe out alien scum with flame throwers, grenade launchers, homing missiles, machine guns, nuclear missiles and much more. Alien vehicles can demolish the earth weaklings with gravity balls, guided drones, cloaking spores, meteor showers and other out-of-this-world gadgets. *AlienFront Online*'s biggest attraction is the ability to pit Dreamcast owners against arcade players over the Internet. Home versus Arcade for the first time ever! You can also take your Dreamcast VMU to the arcade and use it to open up more secrets within the game by inserting it into an *AlienFront Online* arcade machine. *AlienFront Online* should be in arcades by now, but you'll have to wait until spring to challenge players from your own house.

EVIL DEAD: HAIL TO THE KING

THQ • Available Now • 1 Player

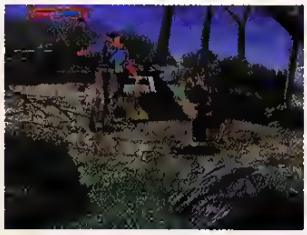

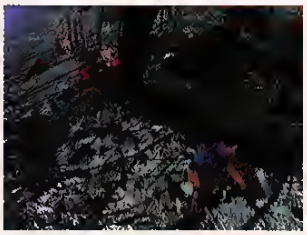

"Groovy!" *Evil Dead: Hail to the King* sticks to the same tongue-in-cheek horror that the *Evil Dead* movie trilogy is known for. Ash, whose voice is actually played by actor Bruce Campbell himself, is back at the familiar haunted cabin where the Necronomicon, or The Book of the Dead, is accidentally read aloud, causing every evil spirit to surface from the depths of hell. Hack off your hand, attach a chainsaw, pick up a shotgun and start taking care of holy business. Ash can perform multiple attacks by using the chainsaw arm or by using his other arm to shoot the undead. The chainsaw can be turned on or off, but Ash will eventually need fuel to keep it going. Ash can also taunt with little one-liners to keep his humor and sanity intact while battling Kandarian demons, ugly deadites and floating skeletons. *Evil Dead: Hail to the King* also has plenty of puzzle solving and exploration on top of sawdusting your enemies. *Evil Dead: Hail to the King* is also available for the Dreamcast.

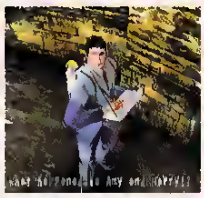

THE TYPING OF THE DEAD

TIPS & TRICKS PICK!

Sega • January • 1-2 Players

T&T Associate Editor Charlotte Chen has been burning up our Dreamcast with her superior typing skills while playing Sega's new *The Typing of the Dead*. Based on the gun shooting game *The House of the Dead 2*, *The Typing of the Dead* replaces your light gun with a Dreamcast keyboard and challenges you to speed-type your way out of the zombie-infested city. This game has a frenetic pace, if you've never learned how to type fast, then you'll never survive! Zombies get blasted by typing complete words or phrases. The phrases get longer and more complex as you get further in the game. There's so much humor in the game that you may end up laughing at a phrase before ever getting a chance to type it. The main characters in the game are all wearing keyboards with Dreamcast units strapped on their backs...and some zombies will even attack you with *Samba De Amigo* maracas! If typing isn't your thing, there is a tutorial mode that will help you to master everything from finger placement to speed typing. Different phrases and words will appear every time you play, which adds great replay value to the game. Now if we can just get Charlotte to unstrap the Dreamcast unit from her back.

PORTAL RUNNER

3DO • 1st Quarter • 1-2 Players

3DO couldn't resist having its own Lara Croft, so somebody decided that Vikki from the *Army Men: Sarge's Heroes* series should have her own game. As the only *Army Men* character without green skin, Vikki will soon appear in her own series of games starting with *Portal Runner*, an action-adventure title on the PlayStation 2. In *Portal Runner*, Vikki is teamed up with a lion named Leo. Brigitte Blue, Vikki's archnemesis, is plotting to eliminate Vikki so she can put an end to Sarge. Throughout the game, players will be able to control Vikki, Leo or Vikki riding on Leo at different points. The game is set in a variety of fantastic toy worlds with absolutely stunning visuals. Vikki is equipped with a bow and arrow that can be equipped with various magical arrows. Many of the challenges and puzzles in *Portal Runner* involve mastery of the bow and arrow. Although Leo helps Vikki during close-quarters combat, Vikki must also keep Leo's Fury Meter in check so his savage instincts don't take over.

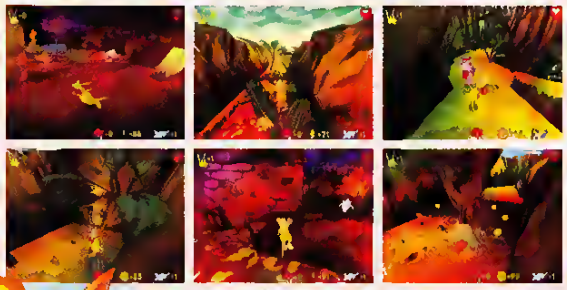

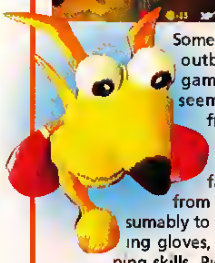

KAO KANGAROO

Titus • Available Now • 1 Player

Something nasty is about to go down in the Australian outback. In the intro to Titus' new action/adventure game, kangaroos are happily playing ball and are seemingly unperturbed by a mutant koala hanging from a tree who is easily three times the size of a kangaroo. The sugar-coated intro apexes with Kao chasing a butterfly with such single-mindedness he falls into a poacher's trap. Kao eventually escapes from captivity and attempts to make his way home (presumably to resume his butterfly chase), utilizing a pair of boxing gloves, his roundhouse tail attack and his inherent hopping skills. Picking up coins will get Kao bonus lives, or he can use them to purchase power-ups, which include alligators, snowboards and hang gliders. The environments are beautifully rendered and well-lit, but also show an obvious *Crash Bandicoot* influence. Instead of side-scrolling, Kao moves from the front of the screen toward the back in a linear path, and some of the obstacles and other designs are markedly similar to objects found in Crash's territory. However, Kao has a sweeter disposition than Crash—some of you may recall that Crash underwent some questionable experiments in Dr. Neo Cortex's laboratory before becoming a video game mascot, leaving him a tad mentally unstable—so Kao may be a little more appealing to a younger audience.

THEME PARK ROLLER COASTER

Electronic Arts • 1st Quarter 2001 • 1 Player

Bullfrog has pulled off the seemingly impossible task of creating a decent—nay, *excellent*—conversion of a PC simulation title to a console that doesn't suffer from the lack of a keyboard/mouse interface. Using only the four tried-and-true buttons on the PlayStation/PS2 controller, players can build up a theme park up from scratch. Given the god-like nature of this ability, it's easy to get side-tracked by the numerous possibilities for wreaking havoc on unsuspecting customers. Manipulating the pylons and loops on roller coasters to create a ludicrously convoluted experience can make for a nauseating experience; why not place a burger joint at the entrance...and maybe a few trash cans and janitors near the exit? In addition to building the park infrastructure, you must hire employees, guards prevent kids from setting off stink bombs in your rides, mechanics keep things running smoothly and mascots will caper along the paths so kids don't get bored while waiting in line. When changing to a camcorder perspective, you can zoom in on kid's faces and see by their expressions how much they're enjoying themselves. You can also get onto a roller coaster yourself anytime you want, play mini-games or go shopping. If you haven't played a simulation game before, prepare yourself to become yet another one of those pasty-skinned, bleary-eyed lost souls (a.k.a. Maxis addicts) who look up to realize it's been days since they've eaten or washed...but at least their sims are happy.

SUPER BUST-A-MOVE

Acclaim • Available Now • 1-2 Players

Known as *Super Puzzle Bobble* in Japan, *Super Bust-A-Move* is Acclaim's first PlayStation 2 entry and the second puzzle game to be released for the console. As you might expect, graphics aren't this game's strong suit. You would be hard pressed to find any polygons here, although that's not to say that it doesn't look good. The high-resolution graphics are exceptionally clean and sharp. It's by far the most polished version of *Bust-A-Move* yet. As far as gameplay goes, there are new giant bubbles that change all smaller bubbles on the screen to their color when popped. There are also rainbow bubbles that will match with any color and turn into a regular bubble when popped. Finally, on some stages you'll find moving walls that will alter the direction of a bubble upon contact. Game modes include a solo puzzle mode plus a versus mode in which you can battle it out against the computer or a friend. Check it out!

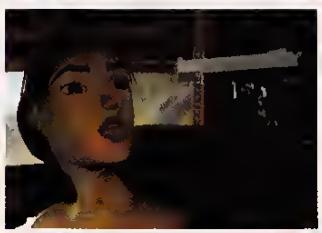

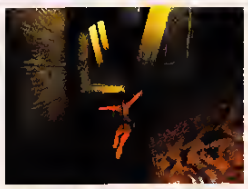

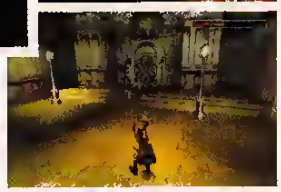

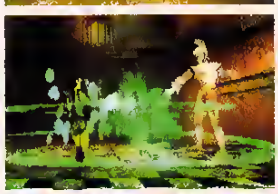

TOMB RAIDER CHRONICLES

Eidos • Available Now • 1 Player

Lara is back! No, Lara is dead. Seriously! In this fifth installment of the long-running *Tomb Raider* series, Lara Croft has passed away. The game starts with a Lara Croft memorial and everyone stands around reminiscing about their favorite Lara stories. Each Lara story is a playable adventure with all the staple Lara moves: climbing, jumping, crawling, shooting, hanging—you know the drill! If you're one of those guys who's played every *Tomb Raider* adventure, you'll be pleasantly surprised to see that *Tomb Raider Chronicles* plays a lot like the first *Tomb Raider* game. The puzzles start off pretty straightforward and are not as punishing as some of the other earlier levels in later *Tomb Raider* games. A PlayStation 2 *Tomb Raider* game is already in the works, so don't worry; she's still gonna be around.

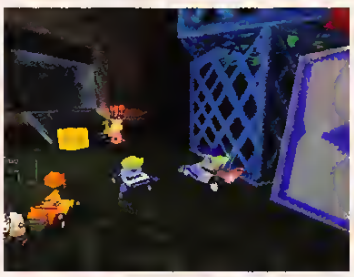

TOY STORY RACER

Activision • March • 1-4 Players

What?! Another character-based racing game? This time, the characters from Disney's *Toy Story* have been granted their own racing game. *Toy Story Racer* features ten of your favorite toys including Buzz, Woody, Hamm, Mr. Potato Head, Rex and more! Each of the game's 19 courses represents a familiar environment from either the original *Toy Story* feature film or its sequel. There are tons of challenges to complete like racing, stunt-driving, mini-games, etc. Like all character-based racing games, there are tons of power-ups on the courses to keep the race even. When all is said and done, *Mario Kart* has to be one of the most imitated video game franchises ever! We really want to see a *Mortal Kombat* racing game. Any takers?

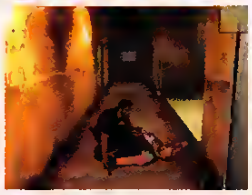

HEADHUNTER

Sega • Possible 2001 • 1 Player

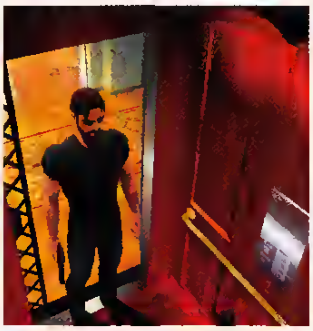

Here's an early look at a new action/adventure game from Sega. Developed by Sega in Europe, *Headhunter* lets you run around and shoot or get on a motorcycle and explore. The game comes across as a Hollywood movie with loud special effects and a John Woo-type script. The setting is California in a not-too-distant future where America is run by a fascist government. You play the role of a lone "headhunter," a lonely bounty hunter hired to enforce the law of the land. The game has plenty of gunplay, but it also offers several racing challenges on your motorcycle. The VMU unit will act as a personal beeper for messages, hints and cheats. Details are still vague at the moment regarding *Headhunter*, but we will keep you updated with this promising new title for the Dreamcast.

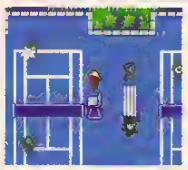

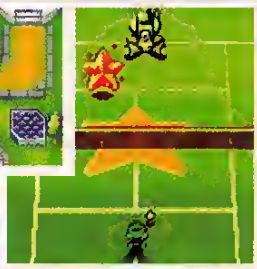

MARIO TENNIS

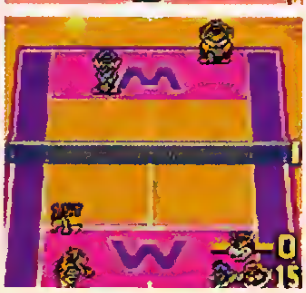

Nintendo • January • 1-2 Players

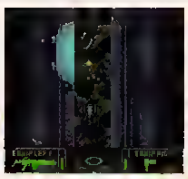

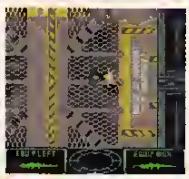

Not to be confused with the similarly-titled Virtual Boy cart, *Mario Tennis* is the latest game from Camelot, the developer of *Hot Shots Golf*, *Mario Golf* and the N64 *Mario Tennis*. All of the familiar characters from the 64-bit version are present, including Yoshi, Toad, Wario and Luigi's arch-nemesis, Waluigi. A two-player Link Cable mode is available, as are several different types of one-player challenges; your accomplishments can be saved in the cartridge memory. As in *Mario Golf*, you can create a tennis player in the Game Boy Color version of the game and build up his or her stats, then use the N64 Transfer Pak to play as a fully polygonal version of that character in the N64 *Mario Tennis* game!

ALIENS: THANATOS ENCOUNTER

THQ • February • 1-2 Players

Fans of the four *Alien* films can get a fix from this new Game Boy Color cart from developer Crawfish Interactive. With its bird's-eye view of the action, *Aliens: Thanatos Encounter* may remind players of other top-down adventures like the *Grand Theft Auto* series or even Konami's classic *Mission Impossible* game for the 8-bit NES. Players control a squadron of heavily-armed Marines which has been dispatched to investigate the Thanatos, a space freighter which—as you can imagine—has been overrun by face-huggers and acid-dripping aliens straight out of H.R. Giger's worst nightmares. The game's unique controls allow you to equip a different weapon or item in each hand, you can track the aliens with a motion sensor in one hand while you pick them off with a Pulse Rifle in the other, or you can mow everything down with flamethrowers in both hands.

AERO GAUGE

Extra Tracks & Vehicles
Note: You need two controllers to input this code, and it can be difficult to get the timing right, so if it doesn't work the first time, try again. First, turn the game on and hold L + R + Z on Controller 2. When the title screen appears with the words "Push Start" flashing in red, quickly tap **Up** on the D-pad and the C▼ button at exactly the same time (also on Controller 2); you must also be sure to release those two buttons at exactly the same time. Finally, press **START** or **A** on Controller 1 before the title screen disappears. If you've entered the code correctly, you should see two new courses at the track select screen and five new vehicles to choose from, including one that's shaped like a Nintendo 64 controller. Press the R button repeatedly at the vehicle select screen to change the color of the N64 controller to red, green, blue, black or yellow.

***Tekken Tag Tournament* Direct Audio**
TOKYOPOP Soundtrax
U.S. $14.95/CAN $20.95
ISBN 1-59182-000-3

Over the past few years, there's been a huge increase in the variety of styles of video-game music. At least for electronic game music (as opposed to VG music that's written for traditional instruments), some years ago one could practically tell what continent the music came from just by listening to it. It seemed like VG music that came from Japanese, American or European developers each had almost their own mutually exclusive domain of style. But in the past few years or so, that has certainly changed. While there is no well-defined criteria for deciding whether a piece of VG music is Japanese or American or what have you, however blurry the lines were beforehand, it's even more so now.

The *Tekken Tag Tournament* soundtrack is perhaps one of the best examples of this new mix of music styles. It seems like you even get a real good mix in the quality department—in terms of composition, anyway. Some tracks are amazing. For example, track #1 (Opening Movie) beautifully mixes an acoustic piano with a rapid-fire techno beat. Don't misunderstand; it's not the goofy, predictable piano that is characteristic of what I consider bad techno. The melody and rhythm sound great by them-

Play as Drumstick
To play as Drumstick, you must first earn all of the trophies and amulets in all stages. Once you've done this, return to the main area where Taj can be found and look for the frogs that jump around in the watery area in front of the giant WizPig head. One of the frogs will have a red rooster comb on its head; if you touch that frog with your vehicle, Drumstick will be released.

Play as T.T.
To play as T.T. you must race on each course in Time Trial mode until T.T. comes out to challenge you; he won't appear until you beat the pre-programmed track record in a particular track by a fairly large margin. When he challenges you, you must defeat him in a race on that course. Once you beat him in a particular track, a small T.T. icon will appear when you select that track in Time Trial mode. When you beat T.T. and earn this T.T. symbol in every single track, T.T. will appear as a playable character.

selves. Put together, it's absolute genius. Tracks like that are what you buy entire albums for. Too bad it's so short—just over a minute long. Most of the other tracks on the album are about three minutes long, but they just don't have the explosive impact of the first one. Unfortunately, many of these are too heavy rhythmically and highly repetitive. If that's your bag then it's cool, but hard repetitive rhythm is not my idea of good music.

Which brings me to another point. Video-game music by itself raises a number of interesting issues that just don't occur with motion picture soundtracks or straight-up albums. Some VG music sounds good when you're playing the game, and if you listen to it all by itself it still sounds good. Well, duh. Obviously. But then there is some VG music that sounds great while playing the game, but if you listen to it by itself, it's terrible! The opposite doesn't usually happen. However, you might notice that you actually like some VG music better than you thought you did when listening it out of context of the game for the first time. You might hear parts of melodies you never noticed while you were in the middle of gameplay. For fighting games it can go either way, and for *Tekken Tag Tournament*, the music is just not satisfying to listen to all by itself. Since most parts of the game are very short, the music seems purposefully designed with this high degree of repetition. Besides the first one, the most interesting tracks are #1 (Ogre's stage), #15 (Xiaoyu's stage) and #21 (Staff Roll). The rest is just a cacophonic mess.

***Final Fantasy IX*: Uematsu's Best Selection**
TOKYOPOP Soundtrax
UPC# 7-45573-02012-5

Here's another video-game soundtrack published by TOKYOPOP Soundtrax. It's always great to see music CDs like this one being published stateside. Even if they are far and few between, which has been the case thus far, one always hopes that the next soundtrack will firmly ground the game music market in America once and for all. All it takes is one soundtrack to sell like crazy, and you'll see the deluge approaching from not far behind. Whether consumers in this country are ready for it or not is another issue, but it will take a very popular game like the *Final Fantasy* series to do it, if it can happen at all.

At the very least, each time it's a small step forward as we struggle to catch up with Japan. Over there, the *Final Fantasy IX* soundtrack took up four CDs! This domestic release is a selection of 33 tracks on one CD. I don't know if composer Nobuo Uematsu personally selected each track, but it does seem to be a fairly representative sample of all the themes in the game. In general, RPG music has a tendency to be boring, following suit from the cookie-cutter approach taken by most Japanese RPGs. There's the rockin' "oh we're fighting" theme, the goofy upbeat "oh we're in a town now" theme, the spooky "oh now we're in the mysterious

cave/forest/etc. type area" theme, the "oh crap here comes a really evil bad guy" theme, and so on and so forth. Those rabid fans may say otherwise, but great RPG soundtracks are not easy to find.

While Uematsu has the experience to avoid many of these pitfalls, the end result is mixed. Some of the tracks are in his unmistakable distinctive style, like #6, #7, #15 and #29. They come out sounding much better than the ones that aren't quite as "Uematsu-ish." He seems to be exploring new music styles in tracks like #4, #14, #16 and #22, but it just ends up sounding either generic and uninteresting or awkward and lumbering. No doubt the *Final Fantasy* series is the most popular RPG that Square has to offer, and no doubt Nobuo Uematsu is their most famous composer. But in the same way that there are much better Square RPGs than *Final Fantasy*, there are also composers who have written much better music for Square. Hitoshi Sakimoto (*FF Tactics*, *Vagrant Story*) and Yasunori Mitsuda (*Chrono Trigger*, *Xenogears*, *Chrono Cross*) come to mind. There is certainly some excellent music here, and it's certainly a good soundtrack when compared to everything else out there, but it doesn't have that emotional spark of a truly great work of video-game music. However, whether you or I think this CD is good or not, if you like video-game music you should buy it anyway. Nothing speaks louder about the demand of a product than sales. Let your voice be heard and tell those publishers that you want more video-game soundtracks!

Choose "One Player" from the main menu and select "Tournament" mode. Choose "Password" at the tournament menu and enter the password "TSYBNS", then press **START**. With this code in place, you can now return to the main menu and choose any game mode. When you reach the "Race Location" menu, you'll find a new, secret track called "Lost Vegas".

"Rally" Tracks

With the cheat password in place, highlight any track and hold the **L1** and **R1** buttons. You'll see the name of the track change to "Rally", this changes the pavement to a slippery dirt road like those in *Sega Rally*. If you hold **L1+R1** while the "Rusty Springs" track is highlighted, you'll gain access to yet another secret hidden track, this one's a desert course called "Oasis Springs".

Secret Car

With the "TSYBNS" password in place as described, choose any game mode and access the car select screen. Highlight any car and hold **L1+R1**, now you can choose the top-secret "Warrior" car, a lightweight, futuristic vehicle that can zoom from zero to 60 in 3.5 seconds flat.

Arcade Mode

Again, with the "TSYBNS" password in place, get to the "Race Location" menu and highlight the "Segment View" (or lap-select) box. Hold **L1+R1** and you'll see the words "Arcade Mode" appear. Start the game in Arcade Mode and you'll find that the game plays much more like a *Ridge Racer* style arcade game instead of a full-on simulation.

RESIDENT EVIL 2
Secret Photo
In the S.T.A.R.S. office, check Wesker's desk—it's the one right in front of the S.T.A.R.S. logo. You'll get a message that says, "It's trashed. Someone must have searched the desk..." Continue to check this desk over and over again, on the 50th try, you will obtain a film. Take the film to the darkroom to develop it and you will get to see a secret photo of Rebecca from the original *Resident Evil*.
Alternate Clothes
Start a game in Normal Mode and go through the city area (including the gun store and the bus) without picking up any items. If you go to the alley by the stairs in the R.P.D. lot, you will meet a very special zombie. It's Brad Vickers, the helicopter pilot from the original *Resident Evil*. Enter the police department and get the rifle/grenade launcher from the S.T.A.R.S. room, then go back out and kill Brad (you can't take him down with your normal gun). Next, check his body, you'll find a special key. This key opens the locker in the darkroom, if you open it, you will be able to change into a different set of clothing at any time
Bonus Weapons
If you beat Scenario One with an "A" or "B" ranking and your total playing time is under two-and-a-half hours, you will get a rocket launcher with infinite ammo for your next game. If you beat Scenario Two with an "A" or "B" ranking in under three hours, you'll get a sub-machine gun with infinite ammo for your next game. If you beat Scenario Two with an "A" or "B" ranking in under two-and-a half hours, you get both of these "infinite ammo" weapons plus a Gatling Gun, also with infinite ammo. You'll find the bonus weapons in the chest
Secret Character: Hunk
To play as the bio-suit guy from the opening movie, you have to achieve an "A" Ranking in either Leon or Claire's Scenario Two, to do so, you must beat the scenario in under three hours without using any of the "infinite ammo" bonus weapons (see above). When you finish doing this, you will be asked to

save a second time after the normal Scenario One/Scenario Two save. The saved game will say "Hunk," choose this to play as him

Secret Character: Tofu

To play as a giant tofu, you must follow the instructions for playing as Hunk (see above). Once you've done this, you must continue playing until you have chained three sets of Scenario Ones and Scenario Twos (a total of six games). When you finish doing this, you will be asked to save an additional time. The saved game will say "Tofu," choose this to play as him. (Note: After you qualify for the "Hunk" save, you don't have to continue to get high rankings in order to access Tofu, just keep playing and always remember to save.)

RESIDENT EVIL 2 (DUAL SHOCK VERSION)

Extreme Battle Mode

Play through the game with either character and complete Scenario 2. After the credits roll, you will be rated as usual and a message will tell you that there is another mode. You will be asked to save the regular game and then it will ask you to save a second time for the Extreme Battle data. Extreme Battle mode can then be accessed by calling up the Load screen and selecting the EX Battle data from the Arrange Mode menu. If you're lucky enough to have kept a Scenario 2 save on your memory card from the original Resident Evil 2, you can use that with the Dual Shock version and simply complete the game to get Extreme Battle. When you beat the first level of Extreme Battle mode, you will earn the ability to play as Ada Wong; you can play as Chris Redfield if you beat the second level.

STREET FIGHTER COLLECTION

Super Street Fighter II Turbo: Play as Akuma

At the character-select screen, highlight Ryu for four seconds, then T. Hawk for four seconds, then Guile for four seconds, then Cammy for four seconds, then Guile again for four seconds, then highlight Ryu or Ken for four seconds, then hold down all three **PUNCH** buttons and the **START** button. If your timing is right, you'll see a mysterious silhouette on the match up screen. You're playing as Akuma.

Super Street Fighter II Turbo: Play Against Akuma

Play a one-player game in Arcade Mode at any difficulty level without losing a single match; you must also try to defeat each opponent as quickly as possible. If your total playing time is low enough by the time you reach the final battle against M. Bison, you'll see Akuma jump into the screen and defeat Bison for you, now you must fight Akuma instead.

Super Street Fighter II Turbo: Remove Super Meter

At the character select screen, choose your fighter with the □ (Jab) button, then release □ and quickly enter one of the following codes before the airplane flies across the map. For Ryu, Ken, Blanka, Zangief, Cammy, Fei Long, Balrog or M. Bison—Press **Left** and **Right** repeatedly on the D-pad while repeatedly tapping □.

For E. Honda, Chun-Li, Guile, Dhalsim, T. Hawk, Dee Jay, Vega or Sagat—Press **Up** and **Down** repeatedly on the D-pad while repeatedly tapping □.

If you've done this correctly, your character's color will change and you'll hear a shout to confirm. When the fight begins, you'll be playing without your Super meter.

Street Fighter Alpha 2 Gold: Play as Cammy

To access Cammy in Street Fighter Alpha 2 Gold, you must play as M. Bison in Arcade mode and beat the game with a score that's high enough to take the #1 position on the High Score list. Once you've done this, enter your initials as "C A M", now you can play as Cammy—in "Versus" mode only—by highlighting M. Bison at the character-select screen and pressing the **START** button twice.

Street Fighter Alpha 2 Gold: Alternate Characters

• If you press **START** twice while Ryu or Chun-Li are highlighted, you can play as "Evil" Ryu or the *Street Fighter II Champion Edition* version of Chun-Li, respectively.

Celadon "Rocket Game Corner" Tips
• Slot Machines—Watching the reels carefully can increase your odds of getting a match. For example, watch for a particular image or number to scroll by, and hit the A button as soon as it appears for each reel. The chances of you lining up another image is fairly high, as long as you don't get dizzy staring at the tiny Game Boy screen. Although it's claimed that the slot machines inside this casino have different odds, watching the reels works on all of them.
• Secret Coins—After speaking to the other people in the casino to get coins, you can discover secret coins lying around the floor of the Game Corner by moving around and pressing **A**.
Evolution Tip
Some Pokémon can only be evolved through the use of elemental Evolution Stones. It is a bad decision to evolve your Pokémon right away, since there may be some attacks it can only learn in its Basic Evolution stage that it would never learn if you evolved it right away.
Hidden Machine Tips
• Hidden Machines, or HMs, are permanent. If you teach them to one of your Pokémon, they will never forget it, therefore, don't teach weak HM skills like "Cut" to a Pokémon you intend to use as part of your main party.
• **HM 01 (Hiddan Machine 01) Cut**—When you use Cut in a grassy area, you will clear away four squares of grass. Using this method is one way to avoid random encounters with wild Pokémon.
Master Ball Tip
The Master Ball is an ultimate Pokéball that can capture any Pokémon instantly. It can only be used once, so don't waste it on a common Pokémon. It should be saved so it can be used to capture Mewtwo or one of the three Legendary Birds.
Fight Mewtwo
In order to fight Mewtwo, you need to gain access to the Unknown Dungeon. You must defeat the Elite Four before the man blocking the entrance will allow you through. Also, you must **NOT** reset your game after you've beaten it. Wait for the credits to finish, then go back to the Start screen by pressing **A**. Fly to Cerulean city, then use a Pokémon that knows Surf to get to the Unknown Dungeon, which lies to the northwest of Cerulean city. Right before you fight Mewtwo, save your game. That way if you lose or if Mewtwo faints, you can quickly reset the game. You should also do this before fighting other "one time only" Pokémon like Zapdos, Articuno and Moltres. When you fight Mewtwo, either use the Master Ball immediately or use sleep attacks and a lot of Ultra Balls.
Quick Experience Gain
If you have a group of strong Pokémon with one weak Pokémon, you can level up your weak Pokémon quickly by letting it share experience with a stronger one. Put the weak Pokémon at the top of the list so it always goes out into battle first. Switch it immediately with a strong Pokémon and the two will split the experience points in half. This is an excellent way to level up Pokémon like Magikarp, which are useless before they evolve.
Rare Candy Tip
Gaining levels by using Rare Candy on your Pokémon is not as effective as leveling up your Pokémon normally. Pokémon who legitimately gain experience improve their statistics more dramatically than Pokémon who only used Rare Candy, so it's not a good idea to use a lot of Rare Candy on one Pokémon at once, since it will be weaker than other Pokémon that are the same level.
Increase Stats
Use one of your Pokémon in battle until all of its PP for one move is depleted. Take it to a Poké Center to store it in Bill's PC, then immediately take it out again. Heal your Pokémon at the Poké Center, then check its statistics—you'll find that some of its attributes have slightly increased. This will occur even if you are using a Pokémon that is already at Level 100.

POKÉMON: SPECIAL PIKACHU EDITION (Yellow version)

Level Up Pikachu
When playing *Pokémon Yellow*, your starting Pikachu will obey you no matter what level he is or how many badges your character has earned. Knowing this, one quick way to blaze through the game is to trade your starting Pikachu into another *Pokémon* game that you've already finished and quickly level Pikachu up by having him lead off dunno battles in the Elite Four tournamant. When you trade him back into *Pokémon Yellow*, your character will have no trouble controlling him, even if his levels are maxed out and you haven't earned a single badge. This will only work with your *Pokémon Yellow* starting Pikachu, i.e, the one that follows you everywhere.
Bucket-Head Pikachu
Pikachu trails behind your character during the game, and you can turn around and "speak" to Pikachu to get a graphic representation of what's on his mind. When you take Pikachu fishing, maneuver your character so you're standing beside Pikachu. After fishing, turn to speak to Pikachu and he will respond with a bubble over his head with a picture of a fish in it. Zoom in on Pikachu and you'll see that he's put your fishing bucket on his head!

motogp worldwide time attack contest

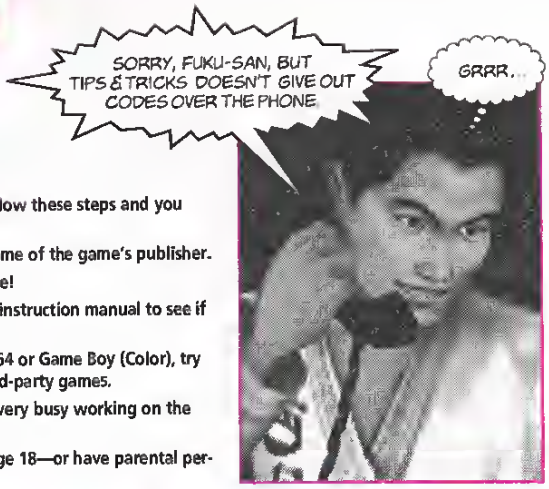

Namco is sponsoring a time attack contest for *MotoGP* on PlayStation 2! This includes countries all over the world, including Japan. We'll post the top times for the USA right here each month. Think you've got what it takes? All you need is a fast time in *MotoGP* and Internet access!

Submission Instructions
To submit your time, you must obtain a password from the *MotoGP* game: At the main menu, select "SAVE/LOAD," then select "RECORDS." Next, select "TIME TRIAL." Finally, hold **L1** + **R1** + **L2** + **R2** and press **SELECT**. A password will appear next to each time that you previously obtained in Time Trial. (If you don't have any lap times in Time Trial, no passwords will appear.) Next, you may submit your password, which has your lap time encoded within it, to Namco's web page (http://www.namco.com). You can also proceed to the submission page directly at the following URL: http://www.namco.co.jp/home/cs/ps2/motogp/ranking-world/. Here are the top USA rankings as of November 16, 2000. Only the top 200 rankings for each circuit are recorded. The Time Attack contest has just started, so get your times in and you might see your name in the next issue of *Tips & Tricks*!

HINT HOTLINES

If you're having trouble with a video game and you need IMMEDIATE assistance, follow these steps and you might get the help you need!

1) Examine the game, the box it came in or the instruction manual to find out the name of the game's publisher.

2) Check this page to see if that company has a tip hotline that you can call for advice!

3) If you can't find that company's name on this list, check the game, the box or the instruction manual to see if the publisher lists a phone number that you can call for tips.

4) As a last resort, if the game you're having trouble with is made for the Nintendo 64 or Game Boy (Color), try Nintendo's hotline; it's the only one we know of that can usually supply tips for third-party games.

5) Whatever you do, DON'T call *Tips & Tricks!* We don't have a tip hotline and we're very busy working on the next issue for you.

NOTE: All Hint Hotlines require a touch-tone phone; callers must be a minimum of age 18—or have parental permission—to call.

TIPS & TRICKS

TIPS & TRICKS SPORTS DESK

by Mike Daly

Greetings, sports fans, and welcome to the TIPS & TRICKS sports section! In this brand new monthly column, I'll be bringing you all of the freshest dirt on your favorite sports video games. Not reviews, but tips, strategy advice and roster changes that will keep you in the lead while keeping your games as true-to-life as possible. I'll also inform you the newest sports-related game goodies and comment on the latest happenings from right here behind the...

I'm not going to mislead you: Hockey has never really been my thing. Something about a bunch of neanderthalic foreigners moving at high speed on ice just doesn't do it for me (with all due respect to neanderthals). Maybe it's just that I've never really felt comfortable with games that involve sticks; bad things tend to happen. I could just be psychologically damaged from watching one too many lacrosse sticks intentionally broken over someone's fibula...at least in hockey, they wear more pads. (There's a lot of stuff packed under those jerseys; I know after watching Mark Messier getting dressed on national TV a couple weeks back. It gives me a new respect for football players.) With all that stuff in mind, here's my admittedly biased/ignorant take on this year's crop of ice hockey games.

NHL 2001 vs. NHL FaceOff 2001

This clash of the titans fares much like a real hockey game itself; a low-scoring tie. Both companies have developed competent, enjoyable simulations of hockey (as if I've put on a pair of skates in the last 20 years). Player animation and game realism are about the same. More experienced players and hockey fans will generally prefer *NHL 2001*. *NHL FaceOff 2001* is sluggish by comparison and doesn't match the high-speed action of EA Sports' game—though *FaceOff* does have a speed control. Most people feel this aspect of play should be covered by the skill level setting. Both games feature fighting and a shoot-out mode (which is good for practicing one-on-one against the goalie, but that's about it). Purists will definitely find *NHL 2001* more charming in subtle ways that clearly emanate from its Canadian design team. In addition, *NHL 2001* plays a lot like the old Genesis games with an almost arcade-like feel. The most glaring and recurring problem with *NHL 2001* is with the selectable levels of difficulty. Year after year, the difference between "Pro" and "All-Star" is so drastic that they almost feel like two different games entirely. Play the game at the "Beginner," "Rookie" or "Pro" difficulty setting and you will easily beat the computer opponent by seven to ten points. "All-Star" has the opponent scoring on you every thirty seconds. It's just a little pet peeve of mine that they've never seemed to fix.

Knockout Kings 2001

With the glut of lame pay-per-view boxing performances that Don King and Bob Arum have been giving us in the last sixth months (*De La Hoya/Mosley I* excluded), there's never been a better time to conduct your own bouts. EA Sports' *Knockout Kings 2001* doesn't pull any punches (pun intended) and picks up where its year *2000* predecessor left off. The meat and potatoes of the game are pretty much the same; two guys bobbing around in the ring in a punching contest that resembles *Tekken* as much as it does a real boxing match. (Obviously, 12-round split decisions don't play as well on a game console as they do in real life.) Gameplay and graphics are barely improved from last year's game. *Knockout Kings 2001* does gain ground stylistically, however. Actual referees Mills Lane and Richard Steele lend their voices, as do commentators Max Kellerman and ESPN's Al Bernstein (the acerbic Larry Merchant has been wisely avoided). A bio section features substantial statistical and biographical information about all of the fighters in the game and is a good supplement for anyone looking to brush up on their boxing history. *Knockout Kings 2001* also features a solid hip-hop soundtrack with songs from the likes of Tash, Tony Touch, Black Eyed Peas and Hieroglyphics. The game also gains from the addition of boxers such as Ruben "Hurricane" Carter and a women's division featuring bruisers like Christy Martin and former centerfold Mia St. John. This division also includes the incredible Lucia Rijker, a gorgeous former kickboxing champion who once punched out Martin after a press conference for systematically avoiding her. Don't get the wrong idea; Rijker ain't got nuthin' on Lara Croft, but she's all over the rest of her division. She out-fights the fighters and out-plays the playmate. Ultimately, however, like real boxing, *Knockout Kings 2001* suffers from matchup difficulties (TV contracts and all that). The game is missing some classic heavyweights—like Jack Johnson—as well as current prime time players like Mike Tyson. I was going to preview the Trinidad/Vargas fight, but Tito is suspiciously missing from the ranks.

NCAA GameBreaker 2001

Ah, college football! There's nothing quite like it; all of the fan enthusiasm, cheerleading squads and marching bands...but most importantly for our purposes, different playbooks. Especially on offense, college football runs a greater variety of riskier trick plays and formations that don't exist in pro football because defenses in the pro game are too formidable for such nonsense. 9B9 Sports' *NCAA GameBreaker 2001* features the gamut of formations (the Wing-T, Wishbone and so forth) as well as all the reverses and options (and triple options) that we've come to love watching through the years. Now you can play as any of the great college quarterbacks who probably played running back in high school and then went out and ran all over defenses only to find themselves ignored by the NFL draft (see Tommy Frazier). All of this makes for a fair amount of excitement...and fumbles. Game-time hype is furthered by the addition of celebration and show-off features after a play. Add in commentary by Keith Jackson and you've got a game that's about as close to the college football feel as we've seen.

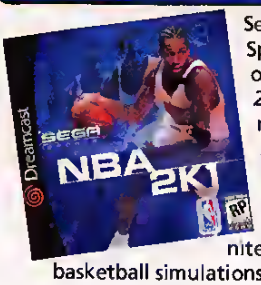

Big League Challenge Figures

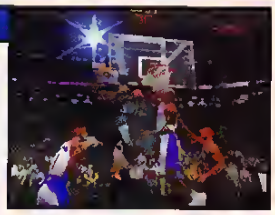

McFarlane Toys continues its "McFarlane's Sports Pick" series with *Big League Challenge*, which features the biggest names in Major League Baseball. Each figure is extremely detailed and captures each player's signature hitting stance. Shown here from left to right: Alex Rodriguez (A-Rod), Mark McGwire (Big Mac), Chipper Jones, Manny Ramirez, Sammy "So Real" Sosa and Barry Bonds. Like the hockey figures, McFarlane didn't get the team licenses so their jerseys only have their names on them. Each player does, however, have his own gear logos like Mizuno and Rossignol. You can even see Barry Bonds' earring! Look out for the second series, which will feature Piazza, Canseco, McGwire 2, Garciaparra, Giambi and Green. They're not very poseable, but they look great in any MLB fan's collection.

NBA 2K1

Sega Sports fills out its *2K1* series with *NBA 2K1* and delivers on the promise of its Dreamcast platform. The gameplay is definitely an adjustment from traditional basketball simulations, but it may be closer to playing a real game of basketball than anything else out there. The default viewpoint is that of the player coming down the court looking to make the play. This is far closer to reality than the side views we have grown used to over the years with games like *NBA Live*. Viewing the court and its players as you run your offense feels much like the real thing in that you are looking from the level of the floor rather than some arbitrary bird's eye view. In addition to dynamite player animation and awesome jams—most shots within two feet of the hoop result in dunks—*NBA 2K1* features a playground option where you can play on one of four famous urban pick-up meccas. With three courts from NYC (including the hyped Rucker Park) as well as Chicago's Franklin Park, you can play 2-on-2, 3-on-3 and so forth using NBA teams or East and West All-Stars from the '70s, '80s and today's game. The omission of any West coast spots (especially Venice beach) smacks of East coast favoritism (they must be jealous of recent Western Conference dominance). A big difference between last year's *NBA 2K* and this year's *NBA 2K1* is the significant reduction of blocks. *NBA 2K1* seems to favor the steal more this time when forcing a turnover. One notable shortcoming of *NBA 2K1* is its substitution system, which is a little too realistic. Other NBA games allow you to substitute players during a clock stop or time out, with the players selected going into the game immediately when the clock resumes. *NBA 2K1* will not make substitutions until the clock stops a second time which means that you have to pick your substitutions before you call timeout or the clock stops (dead ball, free throw, etc.), much like a real coach does. Unless you've done some coaching, though, this move does not come as easily as it seems. It's quite frustrating to watch your team take a slide, call a time out and make substitutions, only to see the same tired, outplayed unit walk back out on to the floor. To deal with this properly, you have to make your subs ahead of time; it takes some getting used to. As with *NFL 2K1*, *NBA 2K1* can be played online against other players where the competition tends to be more hardcore gamers than hardcore ballers. Try to take advantage.

TEKKEN TAG/MVC2 ARIZONA ACTION

Saturday, September 28, 2000 was the day for all the tournament-hungry freaks to come out and play at Sam's Place at the University of Arizona in Tucson for some *Tekken Tag Tournament* action! Dan Lite drove from Phoenix to capture the top spot, slaughtering all of his opponents on the way with teams of random characters. Joe Jennings, the "One Handed Terror of Tucson," took second with his team of Michelle and Julia. After the *Tekken* tournament, gamers headed to the Gameworks Studio on the other side of town for some *Marvel vs. Capcom 2* madness! Al Garci-Crespo took first with his team of Dr. Doom, Cable and Cyclops, while *Tips & Tricks Tournament Report* columnist Jason Wilson (that's me!) placed second with a team of Spiral, Doc Doom and Sentinel. Jennings picked up third in this tournament, surprising many onlookers because he was one of the only participants not to use a team with Dr. Doom! Congratulations to all the winners, and special thanks to all who attended.

THE GRID TOURNAMENT INVADES WINDY CITY

Many avid gamers swarmed to the Brunswick Gala West Lanes arcade in Naperville, Illinois on September 30, 2000 to compete in Midway's *The Grid*. Over 20 teams—each consisting of two or three players—competed for the chance to win a $500 first place prize! The top four competitors received cash and prizes while everyone who competed in the tournament received a *Grid* T-shirt! To make the tournament fair, players were not allowed to enter secret codes; it was truly a tournament to remember. Here are the top four players, with the arcade each represents in the Chicagoland area:

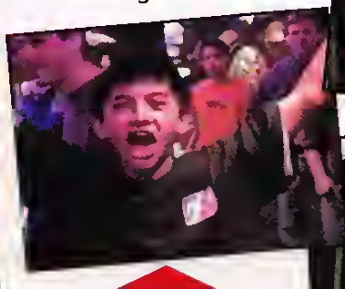

1st place ($500)—Jeff, Namco Cyberstation, Niles

2nd place ($100)—Derek, Brunswick Gala West Lanes, Naperville

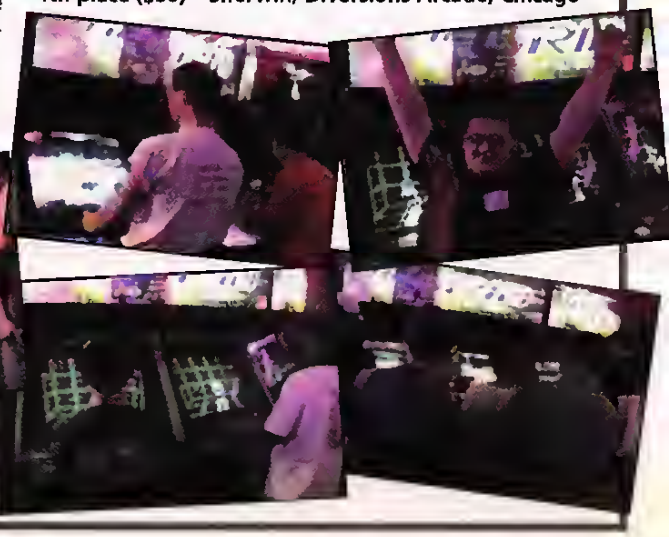

3rd place ($75)—Jason, Brunswick Gala West Lanes, Naperville

4th place ($50)—Sherwin, Diversions Arcade, Chicago

TOURNEY WINNER JEFF

Duc Hunting at Golfland

What a tournament this turned out to be! Competitors from all over the state of California—42 in all—came to Southern Hills Golfland to play in the second major California *Marvel vs. Capcom 2* tournament since the giant "B4" tournament held in July 2000. A group of players even came from as far away as Mexico City, Mexico to try to dethrone Duc Do, the undisputed *Marvel vs. Capcom 2* king! The Mexico City players surprised their California opponents by taking the third and fourth spots overall. Duc Do finished off everyone once again with his marquee team of Spiral, Cable and Cyclops. Ricky Ortiz from upstate took second with an annoying Storm, while Coyi Pineda of Mexico City placed third with a his team of Spiral, Cable and Blackheart. The winners received cash and Golfland tokens! Here are the rest of the top competitors:

1. Duc Do—San Bernadino, CA
2. Ricky Ortiz—Milpitas, CA
3. Coyi Pineda—Mexico City, Mexico
4. Jose Garcia—Mexico City, Mexico
5. Alex Valle—Westminster, CA (tie)

Hard Core is a special section of *Tips & Tricks* where we showcase some of the best custom Core designs created by you, our readers, in Agetec's *Armored Core* series of games for the PlayStation (and *Armored Core 2* for the PlayStation 2). If you're an *Armored Core* fanatic and you have a favorite Core you'd like to share with the world, send the specs, color scheme and a brief description to us at:

I'll personally take your Core for a test run and if it looks like a winner, we'll show it off here in the pages of *Tips & Tricks*. As always, overweight or otherwise illegal Core designs get tossed in the trash. Let's get on to this month's batch of new Core designs!

Our first Core design from the land down under is this month's Featured Core because it dares to be different. This is a refreshing design, especially since a lot of the designs I receive follow the same old Karasawa/WM-AT formula of powerful-but-boring Cores. Almost nobody uses weapon arms, and there is a reason for this: no Laserblade to fall back on if you run out of ammo. Vortex has a nice mixture of weaponry. Quick arm missiles and the mighty back-mounted Laser Cannons will keep opponents guessing, while the quad-type leg unit allows Vortex to stay on the move while firing the Cannons. The main drawback to using a Core like Vortex—aside from the lack of a Laserblade—is the relatively low Armor Points total. Balancing this, however, is the fact that Vortex is fast, light and can boost and fly for extended periods of time. Keep original designs like this one coming in, folks—they're much more likely to get noticed than the dime-a-dozen humanoid/Karasawa clones that flood my mailbox.

Speaking of plain Vanilla Core design, here's an example of what I'm talking about when I say humanoid/Karasawa/WM-AT clones. Eli's Reaper design falls squarely into that description, and it's the last Core of its kind to be featured in *Hard Core*. Now, don't get me wrong...this is a great design if you like heavy, slow Cores. Reaper is featured in our "AC Challenge" this month, and it cleans up the competition handily. The Karasawa is a great weapon; the best in the game as far as I'm concerned. Likewise, the WM-AT is also an incredibly powerful weapon; each hit will shave thousands of Armor Points off of your opponent. And of course, the Moonlight—the best Laserblade in the game. There's nothing wrong with using a Core like this; it's a solid design, has tons of AP and can dish out enough damage to win a battle in a matter of seconds. But it's also boring. It lacks finesse and originality. It's the Andre the Giant of *Armored Core*—it's big, it's strong and it's hard to knock down, but there's no subtlety, no surprise. Not like Vortex up above; it's not going to surprise you with a barrage of arm missiles followed by a Laser Cannon blast while boosting in circles around a confused opponent. Any *AC* player can peg Reaper's style as soon as they lay eyes on it; this Core was made to stand still and fire its weapons until its opponent goes down. There's nothing wrong with that—but there's no art in it, either.

Predator

Quad leg Cores have the speed they need to circle-strafe slower Cores into the ground, and there's no better weapon for a good long, strafe-pounding than the machine gun. It may look weak on paper—after all, the damage rating is nowhere near as high as that of plasma and laser rifles—but you have to bear in mind that the damage rating applies to each individual bullet, and that machine guns have the highest rate of fire in the game. If you can keep a bead on your opponent while you dodge his attacks and continuously nail him with machine gun fire, then you are a force to be reckoned with. This is the strategy that you'll need to employ to use April's Predator effectively. April chose to go without a Laserblade so her Core could carry both the best machine gun and a very good missile load. The WM-SMSS24 fires straight up and then tracks the target on its way down, which means that whenever you are doing battle in an open air arena and have lost sight of your opponent behind a wall or other obstacle, you'll be able to keep the pressure on by pummeling them with missiles from above. (By the way, April challenged the Chaos Core featured in October's issue to a duel, and although we used a different *AC* Challenge in this issue, we did indeed pit Predator against Chaos...and Predator won with a score of 4-2 overall. Congratulations, April!)

Acid Rain

Designed by Peter A. Jacob of Camp Springs, Maryland

Parts
Head: HD-ONE
Core: XXA-SO
Arms: AN-K1
Legs: LN-2KZ-SP
Generator: GBG-XR
FCS: FBMB-18X
Boosters: B-T001
Back Weapon L: WM-SMSS24 Missile
Back Weapon R: WM-SMSS24 Missile
Arm Weapon L: LS-99-MOONLIGHT Laserblade
Arm Weapon R: WA-FINGER Machine Gun
Option Parts: SP-MAW, SP-JAM, SP-ABS, SP-SAP, SP-CND-K, SP-AXL, SP-S/SCR, SP-E/SCR, SP-ABS/Re

Color Scheme (General)
Base: Red: 25, Green: 25, Blue: 20
Optional: Red: 31, Green: 22, Blue: 17
Detail: Red: 30, Green: 30, Blue: 25
Joint: Red: 25, Green: 25, Blue: 20

Grade: GREAT

Performance
Armor Points: 6850
Weight: 6088
Price: 1,406,800

Acid Rain is a fast humanoid-type Core with both distinct advantages and disadvantages that make it a mixed bag when playing Versus Mode battles. While Acid Rain has low overall AP, it is very fast—and speed is necessary to get in close enough to attack with the WA-FINGER Machine Gun, which has a very high rate of fire but is only effective at close range. In open arenas, the WM-SMSS24 Missile is perhaps the best missile unit in the game. They are hard to avoid, useful for thwarting opponents who like taking to the air, and can hit enemies who are hiding behind vertical obstacles like walls. However, if forced into a battle in an arena with low ceilings, Acid Rain's twin back-mounted WM-SMSS24s become useless. The missiles fire straight up...and explode harmlessly into the ceiling. This leaves Acid Rain with only the WA-FINGER and the MOONLIGHT for offensive attacks. This isn't necessarily a bad combination, but it forces the player to rely on close-range combat only. In this situation, Acid Rain is still a decent match for heavy, slow opponents, but a fast Core with a laser rifle and forward-firing missiles would likely chew Acid Rain up and spit out the pieces.

AC Challenge!

Eli Cuevas, designer of Reaper, writes "You can challenge any AC with mine, it will [defeat] them all with ease." Well, Eli, we matched up your Core against all three of this month's custom Core designs, and the results are shown above. Dayne Jacobs, a local *AC* enthusiast, served as my opponent. As always, each match consisted of six rounds, with Dayne and I switching Cores after the first three rounds. Although Reaper is prone to running out of energy, it's high AP and heavy damage-dealing ability allowed it to clean up the competition with ease, finishing with two wins, no losses and one draw overall. As you can see, Vortex, this month's featured Core design, gave Reaper the closest match; Vortex's ability to strafe while firing its cannons proved to be hugely useful, as did its better speed and boosting ability. Both Predator and Acid Rain had one win apiece, with Reaper trouncing then 5-1 overall. Machine Guns and conventional missiles just weren't enough to take on Reaper's Karasawa and WM-AT combo.

Core	Pat	Dayne	Overall
Vortex	2 win	1 win	3 wins
Reaper	2 wins	1 wins	3 wins

Core	Pat	Dayne	Overall
Predator	0 win	1 win	1 wins
Reaper	2 wins	3 wins	5 wins

Acid Rain	0 win	1 win	1 wins

POKÉMON GOLD AND SILVER UPDATE

BREEDING

The Pikachu cuteness factor is getting old quick, so a new pantheon of hyper-cute Poké babies are making the scene in *Pokémon Gold* and *Silver* to pick up the slack. Drop off two Pokemon at the Day Care center near the entrance of Goldenrod City and wait for some Poké loving to occur. If the chosen mates enjoy each other's company, eventually they'll produce an egg...which will hatch if you carry it around with your active Pokémon.

★ General Breeding Rules

1. The Pokémon will only produce an egg if they like each other. When you leave them at the Day Care center, you can walk into the backyard to check how they feel.
2. A Kangaskhan is always female. If you breed a Kangaskhan with a male Pokémon, the resulting egg will hatch into a Kangaskhan.
3. A Tauros is always male. If you breed a Tauros with a female Pokémon, the resulting egg will hatch into the same species of Pokémon the Tauros bred with. An addendum to this is that if Tauros is bred with Ditto, the resulting egg will be another Tauros.
4. Ditto does not have a gender, but can still be bred to produce an egg. The result will always be the lowest evolution of the Pokémon Ditto is bred with.

★ Results When Breeding a Male and Female Pokémon

Clefairy + Clefairy = Cleffa
Clefairy + Snubbul = Snubbul
Electabuzz + Electabuzz = Elekid
Jigglypuff + Jigglypuff = Igglybuff
Magmar + Magmar = Magby
Pikachu + Pikachu = Pichu
Venonat + Pinsir = Pinsir
Kangaskhan + Any male = Kangaskhan
Tauros + Any female = Female of species

★ Special Ditto Cases

Hitmonchan + Ditto = Tyrogue
Hitmonlee + Ditto = Tyrogue

★ Unbreedable

Articuno, Cleffa, Elekid, Entei, Ho-oh, Lugia, Igglybuff, Magby, Mew, Mewtwo, Moltres, Nidoqueen, Nidorina, Pichu, Raikou, Smoochum, Suicune, Togepi, Tyrogue, Zapdos

DAYS OF THE WEEK SIBLINGS

Thanks to the amazingly precise rhythm method prescribed by their obstetrician, the Day Parents managed to produce seven children, one born on each day of the week. Day Siblings are scattered throughout the world of Johto and will spawn into existence only on the days they're named after. Speaking to one of the Day Siblings will garner you an item that assists a specific Pokémon type in battle. Speak to each sibling once a week to get as many of the items as you please.

Monica of Monday—Route 40: Sharp Beak
(Increases the effectiveness of flying-type attacks)

Tuscany of Tuesday—Route 29: Pink Bow
(Increases the effectiveness of normal-type attacks)

Wesley of Wednesday—Lake of Rage: Black Belt
(Increases the effectiveness of fighting-type attacks)

Arthur of Thursday—Route 36: Hard Stone
(Increases the effectiveness of rock-type attacks)

Frieda of Friday—Route 32: Poison Barb
(Increases the effectiveness of poison-type attacks)

Santos of Saturday—Blackthorn City: Spell Tag
(Increases the effectiveness of ghost-type attacks)

Sunny of Sunday—Route 37: Magnet
(Increases the effectiveness of electric-type attacks)

UNOWN POKÉDEX: THE RUINS OF ALPH

Inside the first cave is a scrambled puzzle; rearrange the blocks until they form a faded image of Kabuto. When you complete the puzzle, a path to the underground will appear. Drop down and begin collecting different shapes of the psychic Pokemon Unown. When you exit the ruins, if you've caught at least three variations of Unown, a researcher will greet you and upgrade your Pokédex to include a separate Unown Pokedex. When you get the Surf HM, you'll be able to access two new parts of the ruins, where more Unown permutations await capture.

APRICORNS

In addition to berries, fruit-bearing trees will also yield different colors of apricorns. Take an apricorn to Kurt in Azalea Town and he will spend one day transforming it into a custom Poké Ball. Different colors turn into different Poke Balls, each with special properties that enable them to capture specific types of Pokemon.

Black Apricorn: Heavy Ball—Use to capture large Pokémon like Snorlax.
Blue Apricorn: Lure Ball—Use to capture Pokémon hooked by your fishing rod.
Green Apricorn: Friend Ball—Use to capture a Pokémon you want to become very attached to you.
Red Apricorn: Level Ball—The higher your Pokémon's level in comparison to the wild Pokémon's, the easier it will be to catch.
Pink Apricorn: Love Ball—Use to catch a wild Pokémon who is the opposite gender from your Pokémon.
White Apricorn: Fast Ball—Use on Pokemon like Abra who try to escape from battle quickly.
Yellow Apricorn:Moon Ball—Helps catch Pokémon that evolve with a Moon Stone, like Clefairy or Jigglypuff.

Hidden Machines List

Some items and areas cannot be reached until you earn a certain HM that enables you to gain access to those places blocked off by trees, water or boulders. This brief chart will let you know where to find every HM.

HM 01: Cut

Ilex Forest—Herd the rogue Farfetch'd back toward the scared apprentice. Earn the Hive Badge from Azalea Town to use outside of battle.

HM 02: Fly

Cianwood City—Defeat the Cianwood City Gym Leader Chuck, then speak to his wife. She's right outside the gym. Earning the Storm Badge lets you use Fly outside of battle.

HM 03: Surf

Ecruteak City—Defeat all five of the Kimono girls in the Ecruteak dance theater. The Kimono girls each use a different form of Eevee. From left to right, expect to encounter Flareon (fire), Espeon (psychic), Umbreon (dark), Vaporeon (water) and Jolteon (electric). Speak to the old man with the Rhydon afterwards to get Surf. If you earn the Fog Badge, you can use Surf outside of battle.

HM 04: Strength

Olivine City—The sailor in the house next to the Poké Center will give you Strength. Earn the Plain Badge to use it outside of battle.

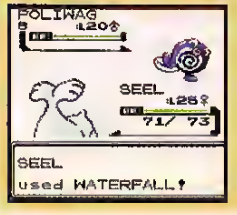

HM 05: Flash

Violet City, Sprout Tower—Defeat the elder at the top of Sprout Tower; you must earn the Zephyr Badge to use it outside of battle.

HM 06: Whirlpool

Mahogany Town, Rocket Hideout—After you and Lance rout Team Rocket from their underground hideout in Mahogany Town, Lance will give you Whirlpool. Earn the Glacier Badge to use Whirlpool outside of battle.

HM 07: Waterfall

Ice Path—Found on the first floor, on the right. Slide right, up, left, down, left, up and right to reach it. Earn the Rising Badge to use Waterfall outside of battle.

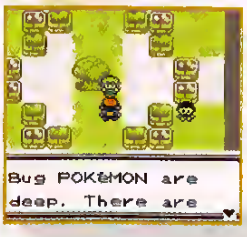

Johto Gym Leaders

Once you collect the eight badges from the gyms in Johto, you can head on to the Indigo Plateau. Some of the gyms can't be entered until certain events have taken place. The following is a synopsis showing how to get inside each gym, what to expect once you enter and the prizes you receive when you defeat the gym leader.

1. Violet City—Falkner uses mainly bird Pokémon, which means if you picked up Onix in a trade (a boy in Violet City will trade his Onix for a Bellsprout), you'll have a type advantage over the members of this gym. There are two trainers to face before Falkner, who also rely on bird Pokémon.

Win: A. Zephyr Badge B. TM 31: Mud-slap

2. Azalea Town—Thanks to Team Rocket's black market Slowpoketail operation, you can't head straight to the gym. Go to Kurt's house, then the Slowpoke Well. Defeat the Team Rocket members inside and Kurt will give you a Lure Ball, which easily captures Pokemon hooked by a fishing rod. If you chose Cyndaquil as your starting Pokémon, you should pick up Charcoal, which increases the power of fire attacks. Speak to the scientist in the southeast house to learn his apprentice is missing in Ilex Forest. Inside Ilex Forest, catch the Farfetch'd by herding it back toward the apprentice; you'll get the HM Cut. Go back to the scientist's house and you'll get Charcoal. Bugsy uses bug Pokémon, so use fire or flying Pokémon in his gym.

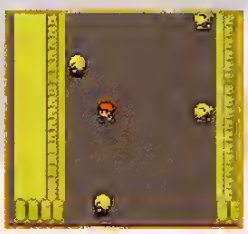

Win: A. Hive Badge B. TM 49: Fury Cutter

3. Goldenrod City—Whitney uses two normal Pokémon—Clefairy and Miltank—but they're both extremely powerful. Miltank's Rollout move increases in power each turn, so you may want to lead off with a rock Pokémon to absorb the damage. Fighting or rock types have an advantage against normal Pokémon. If you don't have a fighting Pokémon yet, you can get one from a boy inside the Goldenrod Poké Mart who will trade his Machop for a Drowzee. Drowzees can be captured near the entrance to Goldenrod City.

Win: A. Plain Badge boosts Pokémon's speed and lets you use Strength outside of battle. B. TM 45: Attract

4. Ecruteak City—Morty uses Ghost Pokémon, which are invincible against normal Pokémon attacks. There's an invisible floor in the gym which snakes between all the trainers in an S-curve. If you fall off the path, you'll be warped back to the beginning; a trainer inside gives you the hint that the path is right before their eyes. Use psychic or dark Pokémon in this gym.

Win: A. Fog Badge B. TM 30: Shadow Ball

5. Cianwood City—Chuck uses fighting Pokemon in his gym. Two trainers will ambush you when you enter, forcing you to fight them in tandem. Chuck himself is behind a blockade of three boulders, which you can move using Strength. Move the left and right boulders up, then push the middle block to the right to gain access. Use flying or psychic Pokémon in this gym.

Win: A. Storm Badge B. TM 01: Dynamic Punch

Johto Gym Leaders continued on next page ▶

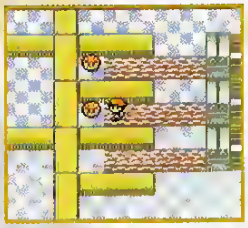

Johto Gym Leaders

6. Olivine City—Jasmine is caring for a sick Pokémon in the Lighthouse when you first arrive, so you won't be able to battle her. After speaking to Jasmine in the Lighthouse, surf to Cianwood City to get Secret Potion and return it to her. Jasmine will go back to her gym, where she'll be the only opponent you'll face. She uses the newly discovered steel Pokémon, which have a weakness against fire and fighting Pokémon.

Win: A. Mineral Badge B. TM 23: Iron Tail

7. Mahogany Town—Team Rocket resurfaces inside Mahogany Town, causing radio interference. Go to Lake of Rage and defeat or capture the Red Gyarados, then agree to help Lance rout Team Rocket from the city. Once you kick Team Rocket out of their hideout beneath the market, you can fight Pryce. The gym floor is paved with ice, which you need to slide across to reach the various trainers. Pryce and his followers use ice Pokémon, which are weak against fire and electric Pokémon.

Win: A. Glacier Badge B. TM 16: Fury Cutter

8. Blackthorn City—Clair uses dragon Pokémon and is your toughest opponent to date. In order to reach Clair's island across the lava, you need to go upstairs and push the two boulders on the right through the holes to create bridges below. Dragon Pokémon are especially difficult to defeat because they are strong against all the basic elemental Pokémon, making fire, water, grass and electric attacks useless. Only other dragon or ice Pokemon have an advantage over dragon Pokémon. Most of the trainers inside use Dragonair, tending to lead off battles with Thunder Wave to paralyze your Pokemon. Give your Pokémon przcureberries to hold so they can heal themselves. Even after defeating Clair, she won't give you the Rising Badge until you surf to the Dragon's Den behind the gym and find a Dragon Fang.

Win: A. Rising Badge B. TM 24: Dragonbreath

After winning your eighth gym badge from Johto, the next stop is the Indigo Plateau—in Kanto, your old stomping grounds in *Pokémon Red* and *Blue*. Check next month for a breakdown of the Elite Four and all the Kanto Gym Leaders.

POKÉMON TILT-N-TUMBLE RUMOR?

The first Game Boy Color title starring pink marshmallow Kirby, *Kirby's Tilt-N-Tumble*, appeared in Japan recently, it features a cart with a built-in motion sensor that can detect the angle at which the player is holding his or her Game Boy unit during play. Instead of using the D-pad, you maneuver Kirby through a series of mazes by holding the Game Boy at different angles to let "gravity" pull him in the desired direction. It has been rumored that *Kirby's Tilt-N-Tumble* may be converted into a Pokemon game for a U.S. release since Pokémon enjoys higher popularity in the States than Kirby, but there has been no official confirmation.

POKÉMON WORM LIGHT

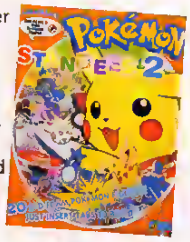

Nintendo still hasn't bought into the new-fangled concept of back-lighting—the Game Boy doesn't have it and the Game Boy Advance won't, either. Despite the widespread implementation of back-lighting in other portable electronic devices, insomniac Game Boy-philes are enslaved to that time-honored tradition known as "hiding-underneath-the-bedcovers-with-a-flashlight." Japanese midnight eye-strainers earned a reprieve in 1998 with the Game Boy Light, which could toggle between a regular and "indiglo-style" backlit screen, but the system was never released in the U.S.—perhaps a nefarious attempt to even out the myopic imbalance between Eastern and Western gamers? Conspiracy theorists aside, other folks who benefit from the Game Boy's screen design are manufacturers who hawk alternative light sources. Morugan's Pika Light plugs into the Game Boy's link cable port and spirals upwards like a curlicue on a flexible white stand, complete with Poké Ball topping. The design is similar to Nyko's Worm Light , but unlike Nyko's sproingy bulbs, the Pika Light requires a battery to power up to 50 hours of illuminated gameplay.

POKÉMON CRYSTAL

Cell phones are as ubiquitous as razor scooters these days—and even more so in Japan, where the sight of grade-school kids gabbing away during their power lunches is common. Nintendo released the Mobile GB Adapter and *Pokémon Crystal* on December 14, capitalizing on the popularity of cell phones by parlaying wireless communication into a Game Boy accessory. *Pokémon Crystal* utilizes the Mobile GB Adapter to allow players to trade and battle Pokémon over their cell phones. This function is probably going to be limited to the Japanese version of *Pokémon Crystal*, because Japan only utilizes a few cell phone technologies—whereas in the U.S., numerous cellular networks are still twisted into a Gordian knot that doesn't look like it's going to be hacked through anytime soon. Although there are no official announcements, it's possible that *Pokémon Crystal* will be released in the U.S. in 2001, sans the cell phone interface.

POKÉMON STANDEES 2

As long as you or your children are over the age of three—and are not obsessively curious about the taste of prepackaged foam—you're clear to enjoy Viz's simple arts and crafts kit, *Pokémon Standees 2*. All the artistic skill required is the ability to punch out the different shapes along their perforated edges and match the parts with corresponding numbers. There are 20 different images to build, including the three legendary birds (or are they titans now?) from *Pokémon the Movie 2000*. *Pokémon Standees 2* retails for $14.95.

JAPAN REPORT!

by Anatole Brown

CAPCOM GOES UNIVERSAL

Capcom of Japan just announced that it is creating new software that will allow game players to compete against each other over the Internet on any console, whether it be the Dreamcast, PlayStation 2, GameCube or X-Box. Since all these new consoles have (or plan to have) Internet support, Capcom sees this as a great opportunity to join players together regardless of what consoles they play on. There is no word yet as to which games will have multi-platform support, but Capcom has indicated that they will probably be classic 2-D Capcom titles. We'll keep you posted on this exciting news.

HOUSE OF THE DEAD GOES HOLLYWOOD

Sega of Japan just inked a deal with a Hollywood production company called Mindfire Entertainment to do a movie based on its popular arcade and console game *The House of the Dead*. Mindfire's recent productions include *The Specials* (starring Rob Lowe) and *Free Enterprise* with William Shatner. Mindfire was looking for a video game that would translate into a good picture. Hopefully, we'll be munching popcorn and kicking back with a reel of *House of the Dead* soon!

NEW SEGA MEMORY CARDS

In Japan, Sega released a new memory card for the Dreamcast called Memory Card 4X. Instead of having buttons and a screen like the regular Visual Memory Unit (VMU), the Memory Card 4X is nothing more than a memory storage device—but it holds four times more memory than the standard VMU. Most games will work with the new memory card, but Sega has issued a list of some games which will not work. The first game which will require the Memory Card 4X in Japan is *Phantasy Star Online*. A blue PSO Design Version is also available. Sega is not abandoning the VMU for the Dreamcast, however. A new Sonic Team special VMU is planned for the release of *Sonic Adventure 2*.

Sega's New Plan

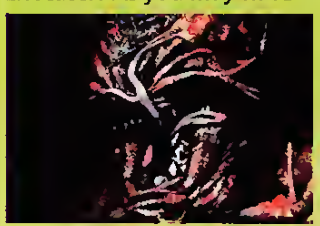

After posting another loss in its earnings report for a fourth year in a row, Sega recently announced some major changes in the company's future direction. Sega is currently negotiating to create software for various competing portable gaming machines, including cellular phones, Personal Digital Assistant devices and quite possibly Nintendo's Game Boy. There is even some hot talk of Sega developing games for other competing gaming consoles from Sony, Nintendo and Microsoft, but this has yet to be confirmed. This announcement comes along with Sega's new name change in Japan from "Sega Enterprises" to just "Sega", symbolizing its new direction as a multi-platform software company. The Dreamcast will obviously continue to be Sega's main machine, but the new changes signal Sega's move away from hardware and arcade development and on to a more Internet- and software-oriented business model. Get well soon!

BIOHAZARD 4D-EXECUTER

Koichi Ohata

At the 13th annual Tokyo International Fantastic Film festival held between October 27 and November 3 in Tokyo, Capcom presented a short 22-minute film feature called *Biohazard 4D—Executer*. As you may have guessed, the film is based on the *Resident Evil* (*Biohazard* in Japan) saga and takes place in the infamous town of Raccoon City. The story is about an emergency task force U.C.S.B. member who goes into the zombie-infested town to save a lost female researcher. The film is rendered in full 3-D computer graphics and audiences are given 3-D glasses as they enter the theatre. Koichi Ohata, the creator of famous anime works like *M.D. Geist* and *Genocyber*, is the director of *Biohazard 4D—Executer*. This is his first 3-D project.

WACKY PS2 CONTROLLERS

When a new system arrives it always means that someone will be making a wacky controller for it. Here are some unique PlayStation 2 peripherals that just arrived in Japan:

DANCE SUMMIT 2001

The PlayStation's *Bust-A-Groove* series moves over to the PlayStation 2 with Enix's *Dance Summit 2001* (Japan title). Together with ASCII, Enix created this odd pad controller that you wrap around the palm of each hand. Each side has a button represented; the left hand has the ✕ and ○ buttons on opposite sides, while the right hand has the △ and □ buttons. Basically, the controller is used by patting on a desk or some other flat surface—kind of like playing patty-cake by yourself. The controller is sold separately from *Dance Summit 2001* for 4,980 yen. I'll stick to the normal controller, thank you.

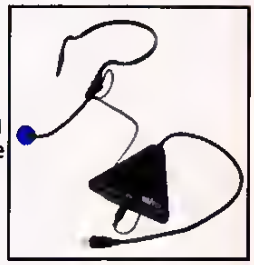

GREATEST STRIKER

Taito is known for putting together weird and elaborate controllers to go along with their games like *Jet de Go!* and *Densha De Go!* This time, Taito has created a voice-recognition device for the PlayStation 2 to accompany its soccer game, *Greatest Striker*. The mic is like a Janet Jackson/Sammy Hagar headset that you put over your head and connect to the USB port of the PlayStation 2. In *Greatest Striker*, you're basically like the coach of the team as you issue commands to the team through the microphone. A great gift for hyperactive soccer moms!

COOL ZONE

Don't you just hate magazines that get less interesting the closer you get to the back cover? Instead of filling up the back pages of Tips & Tricks with a bunch of fractional ads for X-Ray Specs and other junk, we like to save some of the best stuff for last. Like the collection of goodies on this page, which we call the...

This giant 11-inch Deluxe Transforming Wing Gundam figure is now available in stores from Bandai. The figure comes with a ton of accessories that you need to snap together, including its wings, cannon and shield. It is fully poseable with many different articulation points and can transform into Bird Mode as an aerial attack ship. This is by far the coolest and bulkiest Gundam figure yet. These are going to get snatched up fast, so hurry to the toy store!

Fox Interactive gave us this creepy Alien Resurrection coffee mug so Anatole can continue his caffeine-induced rants. You never know what will pop out of the dark concoction while you're drinking out of this thing. You gotta love the tail!

Pelican Accessories just released a slew of high-end PlayStation 2 cables so you can experience your new Sony machine in all its digital glory. The gold-plated controller Extension Cable allows you to increase the length of the cord by 10 feet. The S-video/Composite AV cable gives you access to both output types combined into one cable. The Optical Cable allows you to experience superior acoustics and sound with your DVDs, PS2 games or music CDs. The Component AV Cable is for those hard-core guys with component-ready TVs.

Pelican also makes a PlayStation 2 DVD Remote. Unlike the remote we showed last month, Pelican's remote receiver unit has a through port that allows you to plug in a controller for simultaneous use. The remote has the standard four buttons and directional pad so you can conceivably play some games with one hand—perhaps a role-playing game?

Blue Box Toys has a new line of video game figures following its Omega Boost and Fighting Force series figures. Shown here is Dart from The Legend of Dragoon. Also available in the Dragoon action figure series are Kongol, Lavitz, Rose, Shana and Lloyd. Collect them all!

Here are more toys from the Gundam Wing TV series. Shown here are three five-inch figures from Bandai's Mobile Suit Gundam Wing collection: Wing Gundam Zero, Gundam Deathscythe Hell and Altron Gundam. There are 13 figures altogether and each one comes with a load of accessories such as weapons, shields and sabers. Who knew there were so many different types of Gundams? Available at your local toy store!

When we get frustreted, we do whet Tron Bonne does: we teke it out on our little serve-bot! Capcom geve us this little servebot squeezie thingie to get us through the day.

McFerlene Toys introduces yet enother action figure series called "McFerlane's 3D Animation from Jepen." Some purists mey gesp at the idee of McFarlane doing Jepanese enime figures, but they're actually not thet bed. While the feces of the figures look e little "Americanized", the incredible focus on deteil is vintage McFarlane. Feetured in the series ere Keneda end Tetsuo from the enime classic, Akire. Also in the series ere Vesh the Stempede end Kuroneko-sama from Trigun and Ryoko and Ryo-Oh-Ki Chen from Tenchi Muyo (No Need for Tenchi). The biggest drawback: Kaneda can't be posed to ride his bike!

Lucky for Pet, we scored this killer Armored Core 2 figure from ARTFX Collectible Toys' Armored Core 2 High-End Action Model series. This Emeraud ECM-XR00 figure stands about five inches tall and comes with several cannon attachments. It's from Japan so you'll have to do e little hunting!

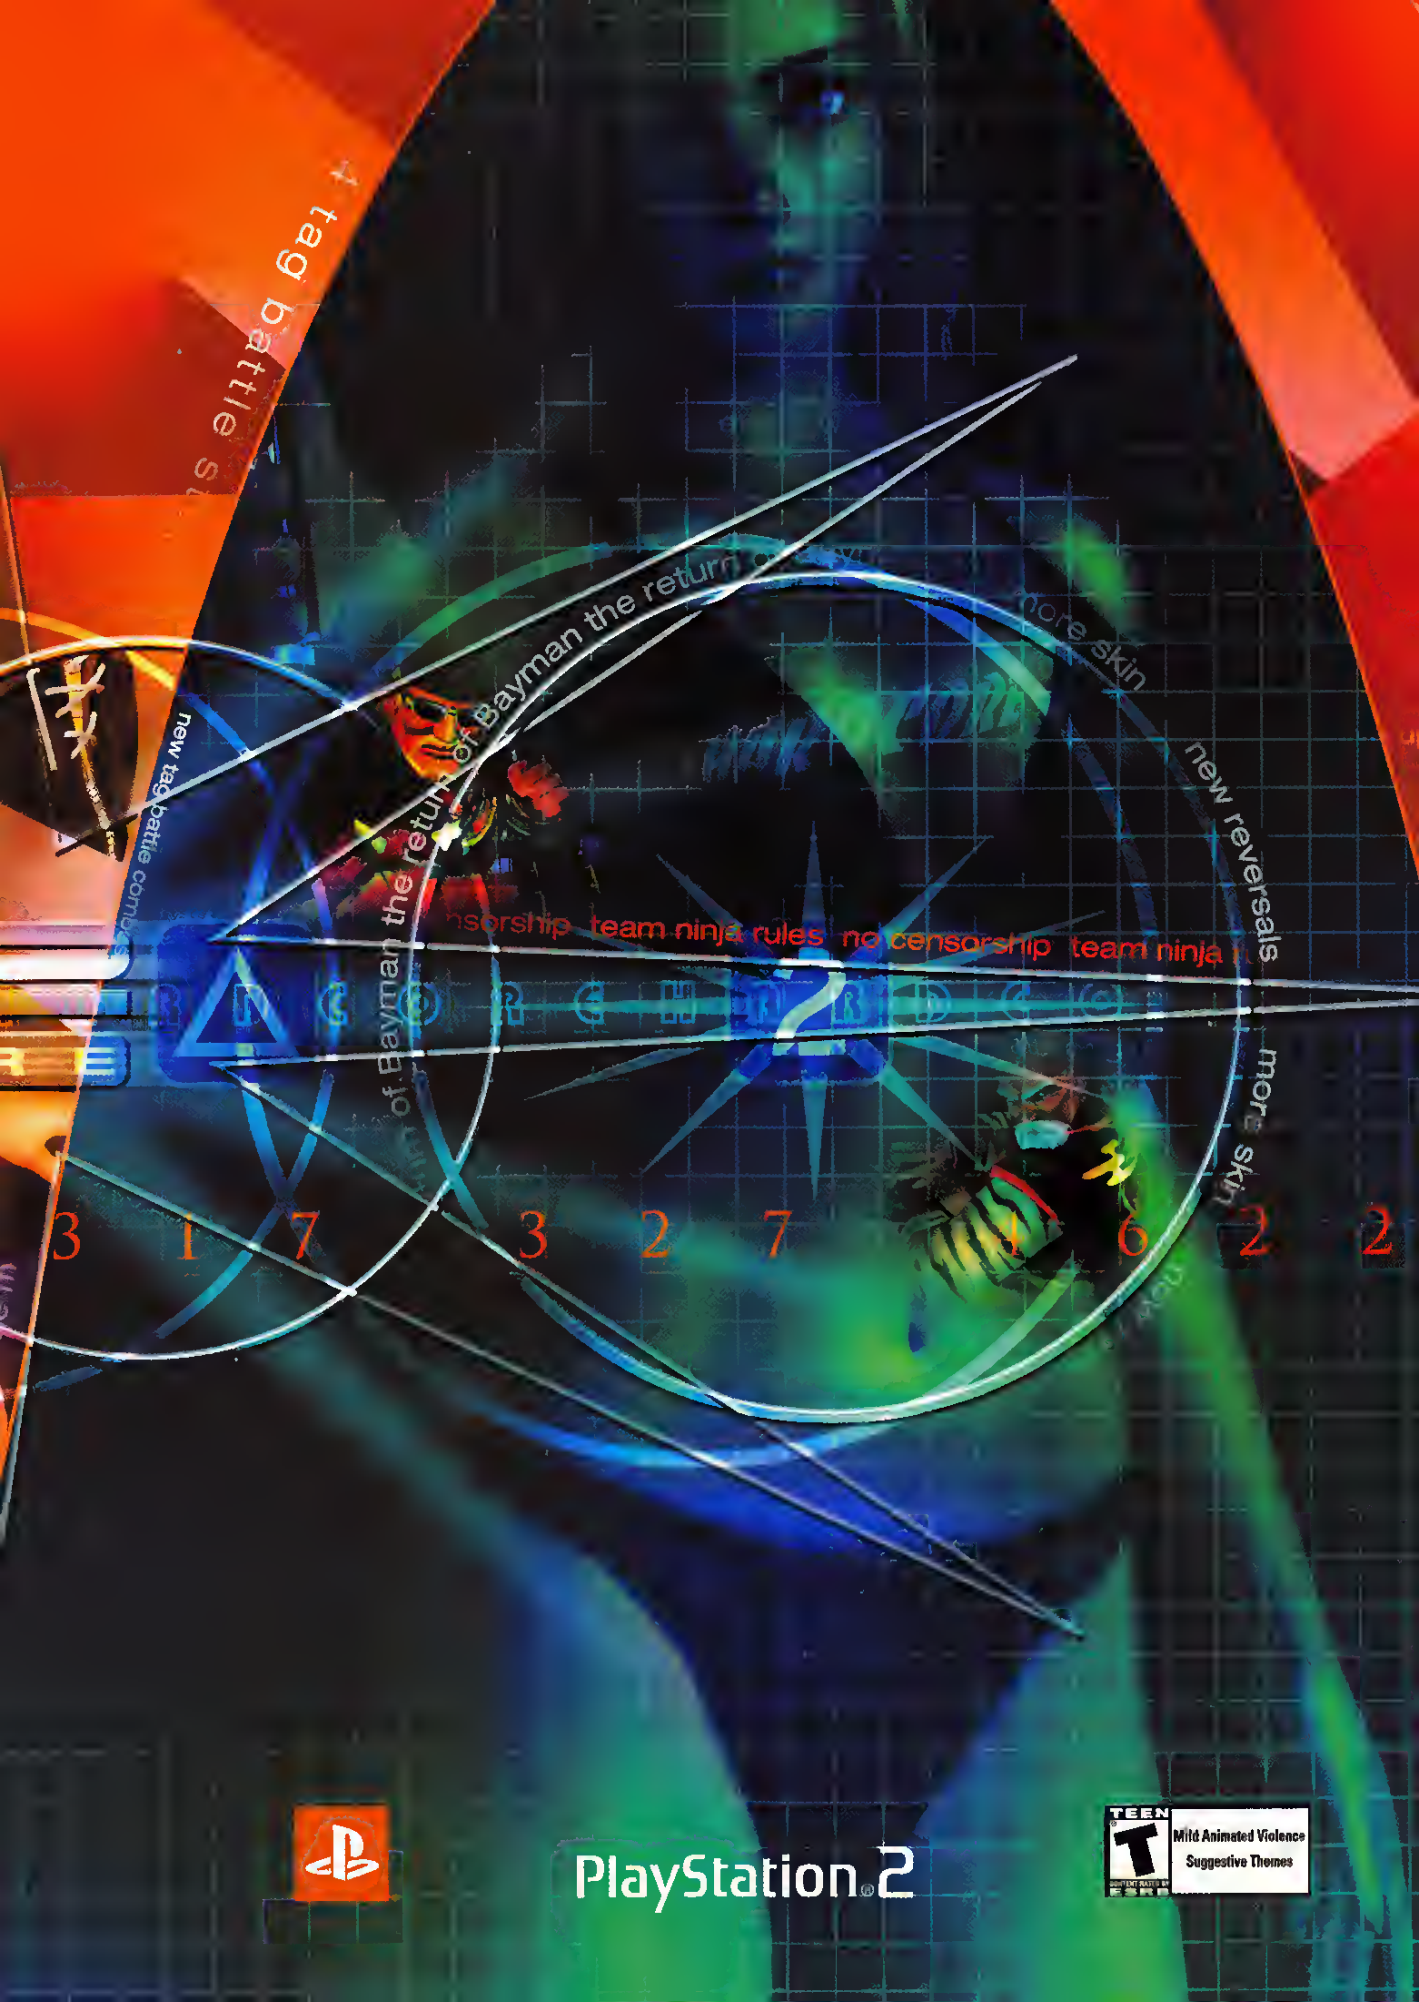

If you're pleying Unreal Tournament for the PlayStation 2 and are getting frustreted with using the reguler controller, you should probebly look into buying Logitech's iTouch Keyboerd end Wheel Mouse. We don't usually show geeky computer products, but only Logitech USB mice and keyboards were used in testing and developing Unreal Tournement for the PlayStation 2 by the folks at Epic Games and Infogremes. The mouse doesn't use a track bell, but insteed feetures en optical sensor for precision pointing. A nice little set-up for your PleyStetion 2.

The new Sege Dreemcast Mouse is now evailable to eccommodate your Dreamcast Keyboerd. Quake III Arene pleyers have no choice but to get this thing if they don't went to be schooled by other pleyers online. Point, click and freg!
